Lighting & Heating options may vary between Louvretec Dealers.

CONTENTS

3 LED Gutter Lighting

5 Blade Lightitng

7 Downlights

9-12 Outdoor Heaters (Kelray, Bromic & others)

LED GUTTER LIGHTING

ILLUMINATE & HIGHLIGHT YOUR OUTDOOR ROOM

LED Gutter Lighting has been crafted to integrate seamlessly in to your Opening Roof gutter.

LED gutter lighting can be installed on the front face or inside face of your opening roof's gutter to create atmosphere and set the scene. You can dim the lights if you wish, or brighten things up with RGB color options for your outdoor room, or choose classic warm white.

OUTWARD GLOW; FRONT FACE

LED Lights can be installed to the Front Face of your Opening Roof's Gutter.

SHINE UP & REFLECT; INSIDE FACE

Create the perfect ambiance by installing LED Gutter Lighting on the Inside Face of your Opening Roof's Gutter (as shown).

BLADE LIGHTING

FOR A DIRECT LIGHT

Blade Lighting has been designed to fit directly on to the louvre blades of your Louvretec Opening Roof

Blade Lighting brings an overhead, direct light to your outdoor room so you can carry on reading or continue with your activity when night falls.

Blade lights can be dimmed, they can be Warm White, Cool White or RGB and of course can be operated by your Louvretec Remote.

BLADE LIGHTING

Installed directly on to the span/length of your Opening Roof's louvre blades, Blade Lights bring functional overhead lighting to your outdoor room.

DOWN LIGHTS

CREATE A TRANQUIL ATMOSPHERE

Downlights can be installed around the perimeter of your Opening Roof or Sun Louvre system frame.

Downlights bring functionality to your Outdoor Room and highlight your beautiful Opening Roof or Louvre system. Choose to install as many downlights as you require.

Lights can be dimmed, they can be Warm White, Cool White or RGB and of course can be operated by your Louvretec Remote.

OTHER LIGHTING OPTIONS

Lighting options may vary between Dealerships. Please contact your local Louvretec Dealer.

KELRAY OUTDOOR HEATERS

AN EVEN, RADIANT HEAT COLOUR MATCHED TO YOUR OPENING ROOF

We recommend and regularly install Kelray Heaters not only because they are purpose built for NZ conditions but because they can be powder-coated the exact same colour as your Opening Roof or joinery.

Designed specifically with our salt-laden air in mind, Kelray Heaters use marine grade stainless steel, preventing deterioration, discolouration and rust. They are durable and come with a 5 year Warranty.

Kelray Heaters use Infrared which is the most energy efficient form of outdoor heating. No energy wastage!

Kelray Heaters will be powder-coated to your requirements to perfectly match your home and outdoor living area. While the most popular colours are powder-coated white or black options, if you would like a specific colour for your outdoor heater this is easily done.

Kelray Heaters are available in two lengths; 99cm long or 156cm long

.

KELRAY HEATERS

Transform your outdoor room into a cosy, welcoming environment that's useable even in Winter.

BROMIC OUTDOOR HEATERS

CLASSIC WHITE OR BOLD BLACK FOR A SLEEK DESIGN

For a fresh, modern design we recommend Bromic's Platinum Electric Marine Heater series - designed for coastal conditions.

Built to withstand corrosive environments, the Bromic Electric Marine Heater features a fully enclosed heater body that protects internal components and an easy-to-maintain ceramic-glass surface.

The Platinum Electric Marine Heater comes with a 5-year warranty and is available in both white and black finishes. Additionally, it offers a variety of mounting options including wall, ceiling, and recessed.

To learn about other heating options available from Bromic, please consult with your Louvretec Dealer.

Choose the Platinum Electric Marine Heater for an even more comfortable outdoor experience.

OTHER HEATING OPTIONS

Heating options may vary between Dealerships. Please contact your local Louvretec Dealer.
