

1. LIGHTING TO INSIDE FACE OF GUTTER

2. LIGHTING TO FRONT FACE OF GUTTER

3. DOWNLIGHTS IN CONDUIT

Designed for lighting outdoor spaces:

Louvretec has developed the Light-tec custom range of premium lighting options, specifically to enhance a Louvretec Room, but equally as well suited for any Louvretec installation.

New technology:

- Light-tec is environmentally friendly, incorporating the very latest in silicon extrusion technology
- Dot-free, flexible, ultra-thin, ultra powerful and fully dimmable, the Light-tec range has been designed to seamlessly blend into the gutter and frame extrusion.

Three Light-tec options:

1. Continuous LED Pure Flow strip lighting to inside face of gutter

This popular option shines diffused light onto the underside of the louvre blade.

2. Continuous LED Neon strip lighting to front face of gutter

The ultra slim strip sits flush with the front face of the lighting clip providing seamless, continuous lighting to the inside of the Louvretec Room.

3. Underframe downlights

This option allows for lighting across the width of the Opening Roof or Outdoor Room.

All on 1 controller:

- One controller takes care of all motorisation, lighting and heating
- Set-up by your Louvretec Dealer, very little instruction is required - simply scroll through the screen display until the graphic showing your desired option appears.
- A simple two-button operation covers all functions.

NOTE: LIGHTING OPTIONS CAN VARY BETWEEN DEALERS AND COUNTRIES. DISCUSS SPECIFIC OPTIONS WITH YOUR LOCAL LOUVRETEC DEALER.
