DISCLAIMER

Louvretec NZ Limited (which, as the context requires, shall be deemed to include its parent, subsidiaries, associated, Louvretec and related entities) ("we","our","us") has created this Design Manual as a resource for parties (such as our customers, affiliates and associates) interested in purchasing, distributing or reselling the products featured in the Design Manual (the "products"). We own this Design Manual and reserve all of our intellectual property rights in it. Your use of our Design Manual is subject to the following notices, disclaimers, terms and conditions ("Disclaimer & Notice").

The content, material and information contained in this Design Manual (the "Content") is provided on an "as is" basis for general reference and information purposes only to showcase our products and without responsibility or liability to you. For technical information you will need to contact us direct with your specific enquiry. To the fullest extent permitted by law, we make no representations, guarantees or warranties (express or implied) nor do we assume any liability to you whatsoever in relation to the accuracy, reliability, completeness or timeliness of the Design Manual or the Content therein. We believe that the Content is correct as at the day it was published within this Design Manual and based on the information available at the time of publication. We may, in our sole discretion, update, revise and/or amend the Content contained herein at any time without notice.

Nothing contained in the Design Manual should be construed as a recommendation by us to use any particular product in the range of products or that any particular product complies with all applicable laws and regulations relating to the importation, delivery, transportation nature, labelling, storage, offer for sale, marketing, installations, safety and use of the products or any other legal requirements in any country.

You acknowledge that the Content is supplied strictly on the condition that you will make your own determination as to its fitness or suitability for your purposes prior to acquisition and/or use of any products. The obligations, liabilities and responsibilities relating to the products are governed solely by the terms and conditions and warranties under which they are sold and none other.

We may, in our sole discretion update, revise, remove from sale and/or amend the products (including product specifications) contained herein at any time without notice and we may similarly remove from sale and/or make substitution of any products in our range.

Except for any express warranties that may be provided, to the fullest extent permitted by law, under no circumstances will we be liable to you or any third party claiming through you whatsoever for any:

- damages, losses, injuries or liabilities you may suffer (including, but not limited to special or consequential damages that you may suffer) as result of your use of this Design Manual, the Content and any products; or
- loss of profits, contract, incidental, indirect or consequential loss of any kind whatsoever, nor for any special, indirect, consequential or punitive damages arising out of the use of this Design Manual.

INTELLECTUAL PROPERTY NOTICE

You acknowledge that all of the following form part of our copyright and other intellectual property rights (collectively our "Intellectual Property"): trademarks, service marks and logos (collectively the "Trademarks"); all drawings, diagrams, schematics, illustrations, designs and design rights (whether or not registered); the Content and all text, images, graphics and other materials and may be protected by world-wide copyright and other intellectual property laws and treaty provisions, even if it is not stated to be so protected.

Nothing in this Design Manual should be construed as granting any license or right to the Intellectual Property. You are only granted permission to copy, download and print hard copy portions of the Design Manual for using as a resource to consider purchasing the products (the "Permitted Use"). You are not permitted to use the Content or any of our Intellectual Property for any purpose other than Permitted Use. Any other use outside of the Permitted Use of our Content and/or Intellectual Property without our prior written permission is strictly prohibited and will violate our rights in our Intellectual Property. All rights not expressly granted herein are reserved. Any unauthorised use of the Content and/or our Intellectual Property may violate copyright, trademark and other applicable laws and could result in criminal or civil penalties.

By using our Design Manual you are deemed to have accepted this Disclaimer and Notice.

This Design Manual has been created in New Zealand. Accordingly, this Disclaimer & Notice is to be governed and construed in accordance with the laws of New Zealand and shall be subject to the exclusive jurisdiction of the New Zealand Courts. THE STORY CONTINUES

IT'S BEEN SAID THAT TIMING IS EVERYTHING...

...and certainly the timing was right for starting up an Opening Roof company 25 years ago, even though it may not have always seemed like it at the time! We had humble beginnings and good ideas, and being a family business, as we grew our family grew.

Today the Louvretec family continues to grow. We have great products but equally importantly we have great people - Take a look over page at snapshots of some of the worldwide Louvretec family. Amazingly all Louvretec Dealerships are family run businesses,with most instances the family member actively involved in the business.

It makes for a well proven, trustworthy business model, something we are all proud to be part of.

No matter where in the world you are situated, we hope we can be of service to you as we continue to bring you innovative, smart sun control solutions that contribute to create a sustainable home or building – keeping it truly green, our number one goal in Louvretec's commitment to sustainable living.

Thank you for your support in the past, we look forward to the privilege of being of service now and in the future.

OVERVIEW

SECTION 1

It has been said of today's architecture that everything has a flow to the outside...
From Residential outdoor rooms to Commercial projects, the Louvretec product range lets you design for the sun and brings form and function to any home or building.

OPENING ROOFS

SECTION 2

Louvretec Opening Roofs create more space in your home by creating a stunning outdoor room, perfect for gatherings. With different styles of Opening Roofs to choose from we have you covered no matter what your location's wind zone.

©Louvretec 2025 – All Rights Reserved. Technical specifications subject to change without notice.

RETRACT ROOFS

SECTION 3

Louvretec is proud to bring you our Retract Roof range. Choose from two styles of Retract Roofs. With all of the functions of our standard Opening Roof range, the Retracts take it one step further by allowing the blades to retract back when you want. Enjoy the sky overhead or bring the Louvres back in place for operable overhead shelter.

STRUCTURAL FRAMES

SECTION 4

Louvretec Aluminium Structural Frames provide support and strength for Louvretec Opening Roofs & Sun Louvre systems. Made from aluminium, they come in different sizes and can be powder-coated or anodised in a different colour from the Louvre system frame for a two tone effect.

©Louvretec 2025 – All Rights Reserved. Technical specifications subject to change without notice.

SLIDETEC FRAMELESS GLASS DOORS & PANELS

SECTION 5

Louvretec's Slidetec Frameless Glass Doors are a great way to close in the sides of your Louvretec Opening Roof to create an ultimate outdoor room. The clear view of Slidetec Frameless Glass Doors provide excellent rain & wind protection when needed plus give the option of sliding them open to enjoy a gentle summer breeze if you wish.

OUTDOOR BLINDS

SECTION 6

Louvretec's range of Outdoor Blinds include Motorised or Hand Operable Mesh Shade Blinds as well as Hand Operable PVC Blinds. Outdoor Blinds are a great way of creating an outdoor room that will become the new favourite room in your home. Mesh Shade blinds are available in different colours and degrees of mesh 'openness'.

Outdoor Blind options may vary between Louvretec Dealers.

©Louvretec 2025 – All Rights Reserved. Technical specifications subject to change without notice.

LIGHTING

SECTION 7

Louvretec's Light-Tec Outdoor Lighting options adds that final finishing touch and creates atmosphere and functionality at night. Options include lighting to the front face or inside face of the gutter, or underframe downlights. Choose from Warm White,or RGB colours on request.

Lighting options may vary between Louvretec Dealers.

HEATING

SECTION 8

Cosy up your Outdoor Room with an Outdoor Heater that pairs perfectly with a Louvretec Opening Roof.
Create & enjoy a warm and inviting outdoor living space even when the temperature cools.
Heating options may differ among Louvretec Dealers.

©Louvretec 2025 – All Rights Reserved. Technical specifications subject to change without notice.

THE LOUVRETEC ROOM

SECTION 9

The Louvretec Room is the ultimate combination of a Louvretec Opening Roof with the addition of Slidetec Frameless Glass Doors, Outdoor Blinds or Coastal Shutters - all complemented with the addition of Louvretec outdoor lighting and heating. The Louvretec Room fast becomes the favourite gathering spot.

SUN LOUVRES OVERVIEW

SECTION 10

Louvretec Sun Louvres bring lots of design options. Our Sun Louvres are available in a range of different widths and shapes including Airfoil, Rectangular, Flush & Weatherboard-look. They can be Motorised, Hand Operable, or if you prefer End or Bracket fixed. Louvretec Sun Louvres bring privacy, sun control and style.

©Louvretec 2025 – All Rights Reserved. Technical specifications subject to change without notice.

KISS PIVOT SYSTEM HAND OPERABLE LOUVRES

SECTION 10.1

Operating off double drive-arms Louvretec's KISS Pivot System is an elegant, well proven and easy to operate Sun Louvre Pivot system.
Available in many powdercoat colours.

SPIRAL PIVOT SYSTEM | MOTORISED & HAND OPERABLE LOUVRES

SECTION 10.2

Louvretec's award winning Spiral Pivot System is hidden away at the heart of our motorised and hand operable mid sized Louvre systems.

©Louvretec 2025 – All Rights Reserved. Technical specifications subject to change without notice.

MAXI DRIVE | MOTORISED MAXI SIZED LOUVRES

SECTION 10.3

Designed to meet the ever increasing demand for motorised larger louvres, our Maxi Drive Pivot system is an excellent option. Somfy powered, the strong and capable Maxi Drive system is an ideal option.

SUN LOUVRES END FIXED

SECTION 10.4

Using internal screw fixing ports, Louvretec Sun Louvres can be End Fixed in place. Choose the pitch and centre you require. End fixing is a neat and tidy way of bringing style and function to your home or building.

©Louvretec 2025 – All Rights Reserved. Technical specifications subject to change without notice.

SUN LOUVRES BRACKET FIXED

SECTION 10.5

Louvretec Sun Louvres can be Bracket Fixed in place using our proprietary Bracket Fixing systems. Choose the pitch and centre you require.
Bracket Fixing provides long, unbroken runs of louvres bringing sun control and a fresh, modern, striking look.

RETRACT SUN LOUVRES

SECTION 11

Louvretec is continuing with design and development of the Retract Sun Louvre Range.
Please contact your Louvretec Dealer for further information.

©Louvretec 2025 – All Rights Reserved. Technical specifications subject to change without notice.

SHUTTERS

SECTION 12

Louvretec's all aluminium Coastal Shutters are designed to operate in the harshest of conditions.
Custom made with a choice of Airfoil or Rectangular Louvres, Coastal Shutters are available Sliding, Bifolding or Hinged and are always a welcome addition to any home or building.

ENGINEERING REPORTS

SECTION 13

The Louvretec range of products are fully engineered to AS/NZ Standards.
Refer to Engineering Section 13 for product specific details as determined by regional wind zones.

©Louvretec 2025 – All Rights Reserved. Technical specifications subject to change without notice.

ELECTRICAL WIRING DIAGRAMS

SECTION 14

Section 14 features a wide range of Wiring Diagrams with options covering numerous product combinations.

Your Louvretec Dealer will supply project specific wiring Diagrams for installs not covered in this section.

LOUVRETEC GREEN POLICY

LOUVRETEC'S COMMITMENT TO SUSTAINABILITY

Louvretec's Green Policy -Our commitment to Sustainability

At Louvretec, we are committed to sustainable & responsible business practices.

The Louvretec Green Policy outlines specific targets to achieve environmental sustainability efforts across our supply chain, with a goal of mitigating our carbon emissions every year.

We offset part of our carbon footprint by funding the planting of native trees through Trees That Count.

Louvretec Green aims to reduce the environmental impact of our products along their life cycle. Our careful supplier selection ensures that we meet our design requirements. We use brands such as Somfy, who have their own Act For Green® voluntary initiative, which further enhances our sustainability efforts.

Refer to pages 1.24 - 1.29 for more Louvretec Green info.

6-STAR GREEN STAR RATED BUILDING, AUCKLAND, NZ

THE ENVIRONMENTALLY SUSTAINABLE LITE-HOUSE, WAIHEKE ISLAND, NZ

LouvreTec® Green

OUR SUSTAINABILITY POLICY

Our commitment to sustainability

At Louvretec we are committed to sustainable and responsible business practices for a better future.
To achieve this, we have developed the 'Louvretec Green' policy that outlines our best practice including our goals & sets out our plans of reducing our carbon footprint every year. We are continually making environmental improvements.
By choosing Louvretec, you can trust that you are engaging with a company that cares about the planet and future generations.

What is our business?

- Our core business is to design, market, manufacture and install louvres. Louvretec products let you design for the sun by letting you set and control conditions including blocking UV rays - a sustainable building method.

Louvres are available in various options & can be a key component in sustainable building practices

- **Fixed Sun Louvres** can be installed with blades set to allow sunlight to enter the building for warmth and light in winter - yet also set to prevent direct sunlight from entering in summer.
- **Motorised Standard Sun Louvres & Opening Roof Louvres** are even more effective, giving a wide range of control options in all seasons. Louvretec Spiral Pivot Sun Louvres can pivot through up to 180 degrees, allowing for optimal setting options at any time.
- **Retracting Opening Roofs** provide the ultimate in sun protection & outdoor living choices. Offering everything that Motorised systems offer, Retract systems do exactly that - they Retract. When you want direct sunlight or wide-open spaces, a touch of the button achieves all of that.
- **The Louvretec Outdoor Room incorporates all the options.** With Opening or Retract Roofs, & a choice of side panels including Louvres, Shutters, Slidetec Glass or Outdoor Blinds to suit.

©Louvretec 2025 - All Rights Reserved. Technical specifications subject to change without notice.

LouvreTec® Green
OUR SUSTAINABILITY POLICY

All Louvretec Louvres are made from Aluminium

- Aluminium when first discovered, was worth more than gold

- It is a most abundant metal on the earth's crust, and the most frequently used, being versatile, lightweight, corrosion resistant and durable

- It is environmentally friendly because of its sustainability, being the most recycled industrial material on earth

- Recycling saves 95% of the energy used in its initial production from raw materials

- Over 75% of aluminium produced is still in use today – it is infinitely recyclable

- Aluminium is particularly easy to handle, the environmental impact is further reduced when used in construction as transportation cost are reduced

- Louvretec aluminium louvres are sourced ex-mill closest to where our Dealers are located:

1. In Australia & NZ for these regions
2. In the US for USA & Canada
3. In Belgium for Europe

- Aluminium is still known as "the wonder metal" for very good reason

A SUSTAINABLE SUPPLY CHAIN - ALUMINIUM FROM INEX WITH THEIR OWN SUSTAINABILITY PROGRAMME

Louvretec Green's Policy & Targets

A SUSTAINABLE SUPPLY CHAIN: Louvretec Green aims to reduce the environmental impact of our products along their life cycle. Our careful supplier selection ensures that we meet our design requirements. We use brands such as Somfy, who have their own Act For Green® voluntary initiative, which further enhances our sustainability efforts.

Our other key suppliers have been verified to ensure that our supply chain materials comply with environmental and health regulations.

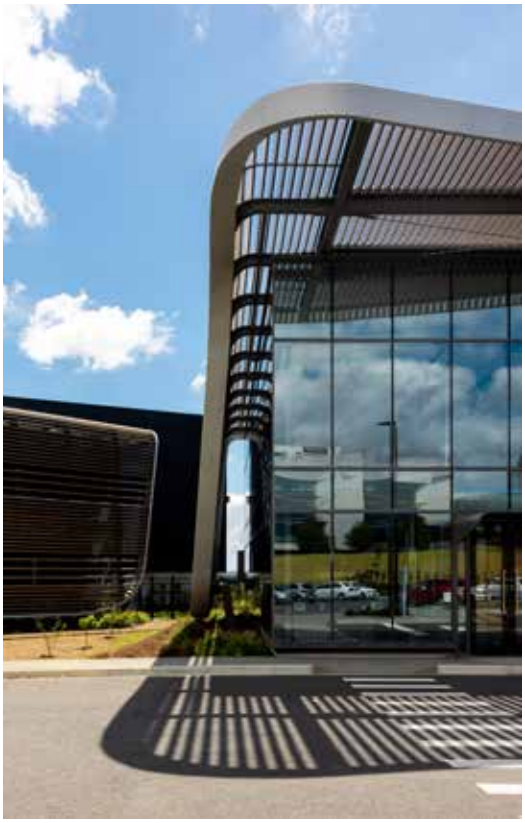

OPTIMISING & REDUCING VEHICLE FLEET EMISSIONS: We continue to reduce our transport emissions by choosing Battery Electric Vehicles (BEV) or Plug-in Hybrid Electric Vehicles (PHEV) wherever possible.

TREES THAT COUNT: We're working with Trees That Count to help mitigate parts of our carbon footprint over future years and help protect New Zealand's threatened biodiversity. That's good for our carbon footprint, and good for the planet.

TREES THAT COUNT
Native tree supporter

Reduce, Reuse, Repair, Recycle

- Louvretec recycles paper, plastic, glass and aluminium offcuts. Offcuts of aluminium are collected, baled & sent to be recycled into other products - by the original extruder or by a local recycling company of which there are many.
- Louvretec's Head Office in conjunction with our waste management provider have completed a Waste Audit that helped us understand our waste & the correct disposal of it. Every month we receive a Carbon Footprint Report that details our Scope 3 /Category 4 emissions associated with landfill disposal. This report also identifies areas of improvement.
- The Louvretec factory team reuses packaging from our suppliers, while our Dealers continue to reuse our packaging.
- Louvretec aspires to use more responsible packaging solutions and target to reduce the amount of petroleum plastic such as polystyrene in our packaging.
- We strive to use packaging that is recyclable, reusable or recycled wherever possible. Louvretec offices use responsibly sourced paper products with the Forest Stewardship Council® (FSC®) Chain of Custody certification.
- The Louvretec product range is designed for easy disassembly for maintenance and recycling.

Solar Solution

We're proud to bring you our first Solar Powered, Freestanding Opening Roof - The Suburban Express Solar Powered Roof.
The sun is an energy source that is renewable and inexhaustible by definition. Everywhere gets sunlight. The Suburban Express Roof is also available as a Hand Operable Roof with a handle.

Health, Safety & Wellbeing of our Staff

We are committed to providing a healthy and safe workplace for our employees. Safety in our workplace is paramount and we are committed to maintaining a SiteWise Gold Rating. We have a Louvretec Employee Health and Wellbeing Policy in place which provides staff access to mental health and wellbeing support.

Louvretec's Employee Induction document outlines our expectations for a safe workplace. We require our employees, suppliers & service providers to be compliant with all applicable laws.

The Louvretec Green team - Monitor, Review, Improve

The Louvretec Green Team meets quarterly with Louvretec Management to discuss achievements and to address areas needing improvement. This ensures Louvretec Green stays on a path of steady growth.

OUR SUSTAINABILITY POLICY

Off the grid

Solar Powered Spiral Pivot Opening Roofs

Using the very latest solar energy technology, Louvretec introduces our first solar powered Opening Roof option.

No power connection required, the quiet solar powered motor can be controlled by a wireless handheld remote.

Incorporated within the solar panel is a powerful battery with a 45-day life cycle based on two open/close cycles per day.

Specific algorithms for power management allow for battery charging without direct sunlight.

Innovative, efficient, clean & quiet - presenting Louvretec Solar.

LouvreTec® Green
OUR SUSTAINABILITY POLICY

OUR PRODUCTS HELP PEOPLE LIVE A MORE ENVIRONMENTALLY FRIENDLY LIFESTYLE

Explore the Green Side of our Product Range

Sustainability is a top priority in the design industry. Louvretec incorporates sustainability in to our best practice and our product range.
Louvretec Opening Roofs & Sun Louvres will always be made from recyclable aluminium.

Louvretec's product range helps create sustainable, aesthetically pleasing, functional, outdoor living spaces that enhance the user's lifestyle and can improve the environmental balance of a home or building.

Conscious future

The Louvretec product range helps you future proof your home for your family's changing needs or for the next homeowner to enjoy. Sustainability & innovation go together, along with adaptability. Creating a home that is energy-efficient, equipped with smart products that bring function to the user & that's ready to meet future needs & can evolve for future generations is the key to a comfortable and environmentally conscious future.

Easy access for Repair & maintenance

The Louvretec product range is easily cared for (either by Louvrecare which is our after-sales care division, or by the end user). Motors and other working parts have easy access for maintenance which means these can be repaired instead of replaced.

Situo 1 & Smoove 1 Wall Switch The Situo 1 Remote by Somfy is a one-channel handheld remote using Radio Technology Somfy (RTS). Smoove is a wireless wall mounted switch providing the same functionality as a remote. Perfect for controlling a single Opening Roof.	
Situo 5 & Smoove 4 Wall Switch The Situo 5 by Somfy is a five-channel handheld remote using Radio Technology Somfy (RTS). Perfect for controlling a group of motorised Louvretec products (excluding the Retract Roof). Smoove 4 is a wireless wall switch providing the same functionality as a remote but with 4 channels. With the addition of the BST11 Bridge, both remotes can control Lighting and Heating.	
Telis 16 The Telis 16 is a 16-channel handheld remote using Radio Technology Somfy (RTS). Made to control a larger group of motorised Louvretec products (excluding the Retract Roof). The addition of a BST 11 Bridge allows this remote to control Lighting & Heating.	
Noon Duo The Noon Duo is a 9-channel handheld remote. The Noon Duo allows control for Louvretec Retract Roofs, Lighting and Heating.	
Daisy App Daisy is an app by Teleco that allows the control of Louvretec Retract Roofs, Lighting and Heating. Download the free app and install a Daisy Box which communicates with your devices via radio signal.	
Solar Powered No power connection required, the solar powered motor can be controlled by a wireless handheld remote or a Smart Home solution. Battery has a 45-day life cycle based on two open/close cycles/ day. Algorithms for power management allow for battery charging without direct sunlight. SURFACE FINISHES

Powdercoating

- All Louvretec powdercoating carries a guarantee on the colour stability and surface finish as set out in both the Louvretec Product Warranty & the Louvretec PS1 document.
- Choose from over 100 powdercoat colours
- Dulux's Duralloy +PLUS solid range is also available as a powdercoating option. The +PLUS colour range is a collection of popular solid colours delivered with warranty grade advanced highly durable polyester thermosetting powder. The +PLUS range has a 15 year extended colour warranty. Contact Dulux for more information on the +PLUS range.
- Powdercoat options vary between countries. Discuss with your local Louvretec Dealer.

SELECTION OF WOODGRAIN & SPECIAL FINISHES

SURFACE FINISHES

Wood Grain Powdercoating

- A wood grain finish that has been bonded on to the Louvretec product is available. This type of finish looks like timber but the difference being it's durability and lower maintenance
- Choose from a range of wood grain and special finishes including pale timber colours through to reddish and dark brown timber shades
- Selection of finishes subject to change
- Options vary between countries
- Discuss with your local Louvretec Dealer

©Louvretec 2025 – All Rights Reserved. Technical specifications subject to change without notice.

SURFACE FINISHES

Anodising

- Louvretec products are constructed of aluminium and can be anodised providing a beautiful matte sheen and a durable tough wearing finish.
- Colour choices include natural silver, black and bronze
- Anodised finishes provide a unique look designed to subtly change in appearance as the light conditions alter in the day and according to the angle at which they are viewed.
- Contact Louvretec for an anodised colour swatch to view in natural light.
- Anodised options vary between countries.
- Discuss with your local Louvretec Dealer.

A SELECTION OF MATT NATURAL ANODISED & ELECTROLYTIC ANODISED COLOURS

IN-HOUSE EXPERIENCED LOUVRECARE MAINTENANCE & VALET TECHNICIANS

LOUVRECARE

Preventative maintenance and valet

Regular, scheduled servicing by a Louvrecare team has real benefits. Louvrecare Service teams are in-house, experienced technicians keeping your Louvretec product in good working order & optimum performance.

The Louvrecare programme is optional. Select as many service intervals as you require.

Louvrecare is available for any Louvretec product no matter how old.

A Louvrecare service includes

- Comprehensive cleaning of your Louvretec product
- Testing of moving parts
- Seals checked
- General wear and tear checked
- Replacement componentry if needed (as covered under the standard Louvretec Product Warranty).
- Louvrecare can vary between Dealerships. Discuss with your local Louvretec Dealer.

LOUVRETEC PRODUCT WARRANTY

OPENING ROOFS - SUN LOUVRES - SHUTTERS

warranty details	All product installed by Louvretec (excluding Outdoor Blinds – please refer separate warranty for this) , or an Authorised Louvretec Installer, is from date of invoice, fully warranted for the first two years. This warranty covers workmanship, louvres and all componentry, motors, switches and electronics with all labour costs included. In addition, from year two to end of year five, a warranty replacement of parts only applies for all motors, switches and electronics. Labour costs excluded. (Excludes any wiring and electrical connections done by others).
motorisation	Louvretec exclusively uses Somfy motors, switches and electronics. Somfy offers a 5-year warranty on all motors and electronics. Please contact Louvretec NZ or Somfy for a complete list of all terms and conditions.
product materials	All aluminium louvres and extrusions used in Louvretec's systems are manufactured in an ISO9002 quality assured environment to AS1866 & AS2902 standards. Marine grade T316 stainless steel is used for drive axles, with stainless steel componentry fixings being standard. Plastic injected moulded componentry is all UV stabilised
powdercoat finishes	A wide range of exterior powder coat finishes are available. Duralloy or equivalent is the standard finish supplied unless stated otherwise and this carries a 10 year film and colour integrity warranty as per the Dulux Powder and Industrial Coatings Warranty. If your project has used the Duratec powdercoat range please refer to the Dulux Powder and Industrial Coatings Warranty wording.
anodised finishes	The current specifications re anodised aluminium range from 12-20-25 microns depth. The greater the microns the better the protection. With regular cleaning anodised material will retain its original integrity for no less than 10 years.
fully engineered	Our louvre systems are designed to conform to New Zealand and Australian standards wind loadings. Full engineering details available on request.
cleaning	Periodic cleaning is essential to remove dirt, grime and accumulated salt deposits from both powder coated and anodised surfaces. Three steps for cleaning are: 1. Carefully remove any loose deposits with a wet sponge 2. Use a soft non abrasive brush and a mild car cleaning detergent solution to remove dust, salt and other deposits. 3. Rinse off with clean fresh water.

ALL NEW FOR 2025

INTRODUCING THE LOUVRETEC SLIMLINE RANGE OF OPENING ROOFS

These blades are also Retract Roof Compatible!

Louvretec's 2025 range of Opening Roofs incorporates new Slimline design with "Cushion Closing" functionality.

Louvretec Slimline is a completely new Louvre Roof range developed for both standard/pivoting Opening Roofs as well as Retract Roofs, making this range perfect for large, multi-roof projects.

Louvretec Slimline Roof Key Features

Available in four sizes;·

- 180/30 Slimline Roof & 200/35 Slimline Roof (Spiral Pivot only)
- 220/35 Slimline Roof (Spiral Pivot & Retract Compatible)
- 220/45 Alpine Roof (Spiral Pivot & Retract Compatible)

Completing the range

- 200 Suburban Roof – designed with quality and economy in mind. Also available as a 200 Suburban Express Free-Standing modular option
- 270 Translucent Roof – incorporating a Translucent Panel. ideal for use when loss of light is an issue

Proudly NZ & Australian designed and manufactured

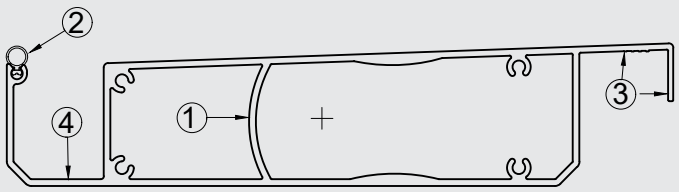

All jointly designed, manufactured and distributed worldwide by;

Louvretec NZ Ltd

& Louvretec Australia Pty Ltd.

OPEN UP YOUR HOME

220/45 ALPINE ROOF (SPIRAL & RETRACT COMPATIBLE)

Sleek, functional design, clean and uncluttered when open or closed. Somfy powered or hand-operated award winning Spiral Pivot operating system. Built with Alpine & Coastal conditions in mind.

1. Design strength of an extruded double box-section
2. "Cushion Closing" onto a bulb seal strip
3. Increased closing cover angle for added weather protection
4. Larger blade gutter incorporated for extra storm-water dispersal

©Louvretec 2025 – All Rights Reserved. Technical specifications subject to change without notice.

MINIMUM - MAXIMUM BLADE SPANS AT A GLANCE AS DETERMINED BY WIND SPEED. REFER TO SECTION 13 ENGINEERING REPORTS FOR FULL DETAILS ON BLADE SPANS.

DRIVE SYSTEMS

Spiral Pivot - four variants

Hidden away, the award winning Spiral Pivot system is the very heart of Louvretec's operating system. Linked to a custom made gear box and driven by Somfy - the world's leading tubular motor manufacturer.

1. MOTOR OVER SPIRAL PIVOT

This tried and tested system has been well proven over many years and continues to be used as standard on Louvretec's 200 Suburban Series Opening Roofs.

MOTOR OVER SPIRAL PIVOT

2. DOWNUNDER SPIRAL PIVOT

Designed specifically for Louvretec's new generation Super Roofs. As the name implies Down-under not only has the pivot operating system hidden from sight, so too is the motor and gearbox.

With neither operating mechanism nor motor to be seen Down-under provides for the cleanest look imaginable. Now available on request on all
Opening Roofs.

CONTROLLER OPTIONS
Refer Section 2 pages 2.17 - 2.18 for range of options.

DOWNUNDER SPIRAL PIVOT

3. SOLAR POWERED SPIRAL PIVOT

Louvretec now offers a Solar Powered option for all Opening Roofs.

SOLAR POWERED SPIRAL PIVOT

4. HAND OPERATED SPIRAL PIVOT

Using a custom engineered gearbox with stainless steel crank handle, all Louvretec Opening Roofs are available as a hand operable option in lieu of motorised.

The roofs can be operated with ease, with the crank handle being detachable for storage when operation is complete.

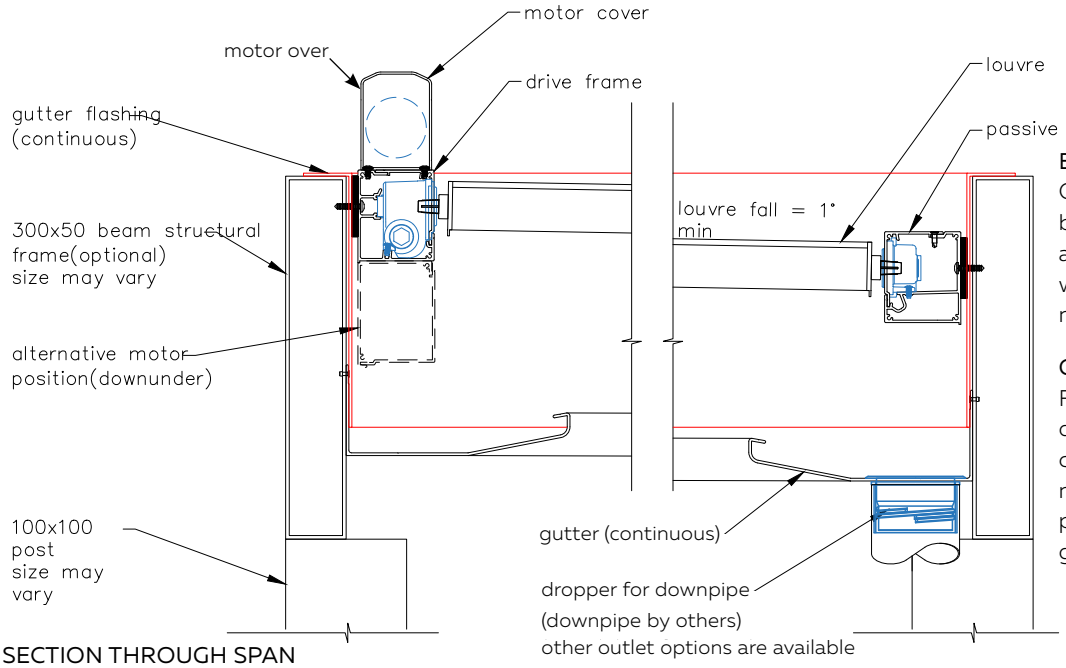

HAND OPERATED SPIRAL PIVOT

©Louvretec 2025 – All Rights Reserved. Technical specifications subject to change without notice.

DETAILS AT A GLANCE

Motor location

Ideally locate motor on high side, passive on low side. If due to down-pipe location or power source that the motor must be located on low side it is strongly recommended to use Motor Over option.

SECTION THROUGH SPAN

BLADE FALL

Opening Roof louvre blades are installed at a minimum pitch of 1° which equals 17mm per metre.

GUTTER FALL

Falls in gutters is determined by location of down-pipe outlet. A minimum fall of 3mm per metre is required for gutters.

IN MOST INSTANCES STRUCTURAL OUTER FRAME IS INSTALLED LEVEL

This allows for ease of other installation options such as Louvre Panels, Slidetec Frameless Glass Sliding Doors or Outdoor Blinds.

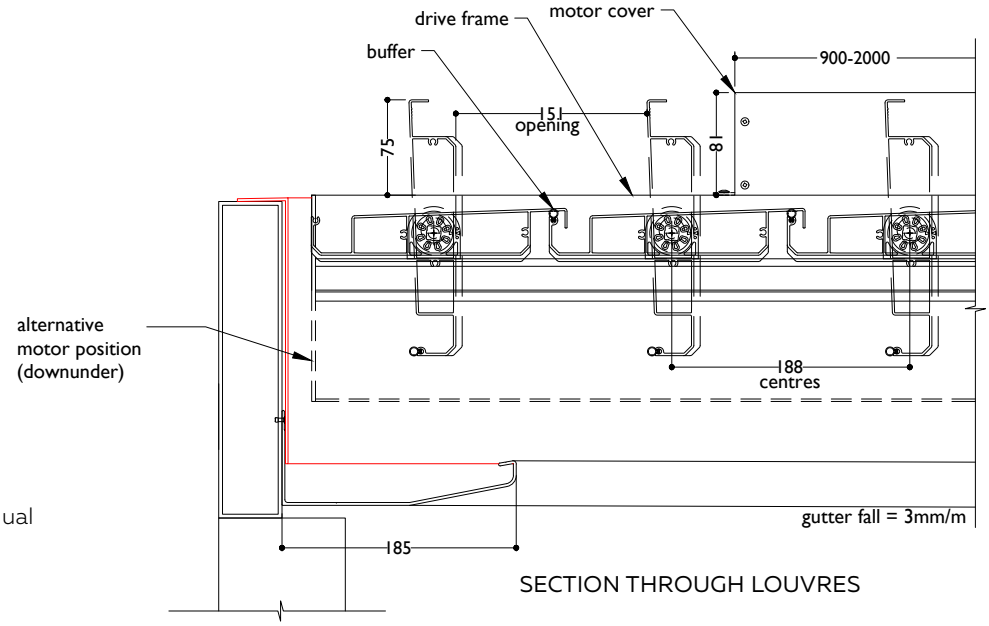

Clearance

When fixing under a soffit or overhead obstruction remember to check clearances above drive frame (or passive frame if passive is highest side). Check for motor cover and when opening roof blade is in vertical open position.

As a rule of thumb allow clearance of 100mm for all Opening Roofs excluding the 270 Translucent Roof.

For the 270 Translucent Roof allow clearance of 120mm.

Exact clearances are shown on individual spec sheets in this Design Manual.

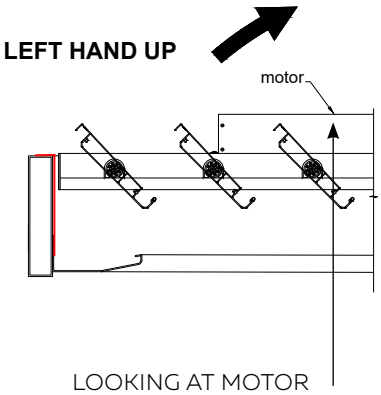

SECTION THROUGH LOUVRES

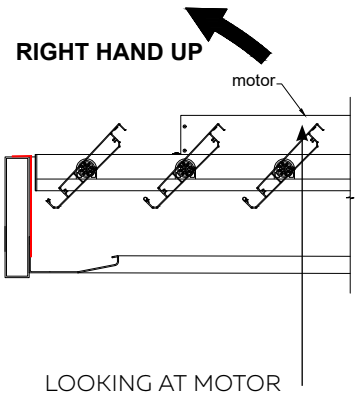

©Louvretec 2025 - All Rights Reserved. Technical specifications subject to change without notice.

DETAILS AT A GLANCE

Specifying direction of blade pivot

Determine which direction the Louvretec Spiral Pivot system opens the blades. Direction of left hand or right hand up is as viewed **when looking at the motor.**

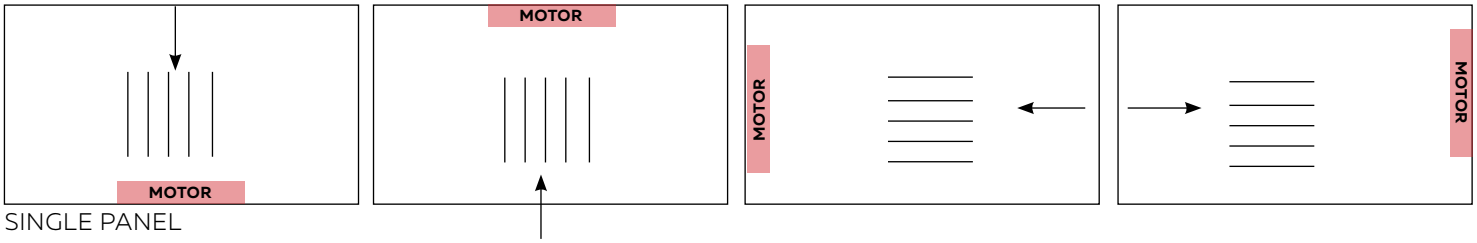

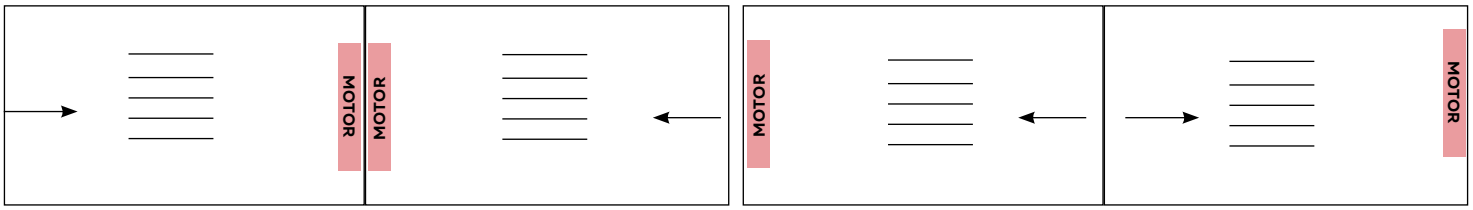

DIFFERENT CONFIGURATIONS

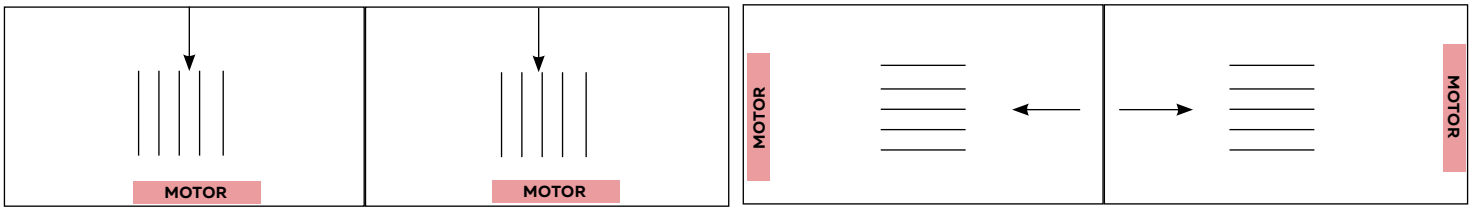

The same rule applies - determine which direction the Louvretec Spiral Pivot system opens the blades. Direction of left hand or right hand up is as viewed **when looking at the motor.**

SINGLE PANEL

DOUBLE OR MULTIPLE PANELS

STANDARD OPTION

Motor Over is the Standard Option.

If Downunder is preferred specify as the Option.

ADD ON

Rain sensor available on all motorised Opening roofs - our most requested option.

©Louvretec 2025 – All Rights Reserved. Technical specifications subject to change without notice.

DURABILITY AT ITS BEST

THE LOUVRETEC STRUCTURAL FRAME

Post and Beam sizes determined by wind and loading

Refer to relevant design information for your project;
Section 13 | Engineering/Engineering Reports.

- The post and beam sizes are calculated and determined by wind speeds with loading factors applied to allow for uplift, down pressure and deflection.
- Please refer to Section 13 | Engineering for full engineering and design data.
- For any queries please contact your nearest Louvretec Dealer.

Solar Powered Spiral Pivot Opening Roofs
New Technology

LouvreTec Green

Using the very latest solar energy technology, Louvretec introduces our first solar powered Opening Roof option.

No power connection required, the quiet solar powered motor can be controlled by a wireless handheld remote or by a Smart Home solution.

Incorporated within the solar panel is a powerful battery with a 45-day life cycle based on two open/close cycles per day.

Specific algorithms for power management allow for battery charging without direct sunlight.

Innovative, efficient, clean & quiet - presenting Louvretec Solar.

REMOTE CONTROL OPTIONS FOR OPENING ROOFS & OTHER LOUVRETEC MOTORISED PRODUCTS

Remote options

Louvretec's Remote Control options can manage a single Opening Roof or up to 16 Motorised Louvretec products. Remote Control technology is constantly changing and upgrading. Please discuss with your Dealer.

Situo 1 & Smoove 1 Wall Switch

The Situo 1 Remote by Somfy is a one-channel handheld remote using Radio Technology Somfy (RTS).
Smoove is a wireless wall mounted switch providing the same functionality as a remote.
Perfect for controlling a single Opening Roof.

Situo 5 & Smoove 4 Wall Switch

The Situo 5 by Somfy is a five-channel handheld remote using Radio Technology Somfy (RTS). Perfect for controlling a group of motorised Louvretec products (excluding the Retract Roof).
Smoove 4 is a wireless wall switch providing the same functionality as a remote but with 4 channels.
With the addition of the BST11 Bridge, both remotes can control Lighting and Heating.

Telis 16

The Telis 16 is a 16-channel handheld remote using Radio Technology Somfy (RTS). Made to control a larger group of motorised Louvretec products (excluding the Retract Roof).
The addition of a BST 11 Bridge allows this remote to control Lighting & Heating.

Noon Duo

The Noon Duo is a 9-channel handheld remote.
The Noon Duo allows control for Louvretec Retract Roofs, Lighting and Heating.

Daisy App

Daisy is an app by Teleco that allows the control of Louvretec Retract Roofs, Lighting and Heating. Download the free app and install a Daisy Box which communicates with your devices via radio signal.

Solar Powered

No power connection required, the solar powered motor can be controlled by a wireless handheld remote or a Smart Home solution. Battery has a 45-day life cycle based on two open/close cycles/ day. Algorithms for power management allow for battery charging without direct sunlight.

Heating

Connexoon Connexoon is an app by Somfy that allows the control of Louvretec Opening Roofs from your device. The addition of a BST 11 Bridge also allows control of Louvretec Lighting & Heating. Download the app & install the RTS Box (plugs in to your router & wall socket) which communicates with your devices via signal.	 BST 11 BRIDGE & CONNEXOON APP BY SOMFY
TaHoma Tahoma by Somfy is the central hub that connects and controls the smart home ecosystem. Convenient, intuitive & easy to configure across a wide range of smart home systems.	 TAHOMA CENTRAL HUB
BMS A Building Management System (BMS) is a pad from which you can manage a home's shading, heating, cooling, ventilation & lighting controls. Louvretec Opening Roofs can be integrated into a home or building's BMS. Retract Roof, Heating & Lighting can be integrated via an RS232 Transmitter.	  BUILDING MANAGEMENT SYSTEM (BMS)
Hard Wired Switch A Somfy Hard Wired Switch provides control of a motorised Opening Roof via a 230v wall switch wired directly to the motor.	 SOMFY SWITCH FOR AN OPENING ROOF
Wall Mounted Remote A Teleco Wall Mounted Remote provides control of a single Retract Roof, LED Lights, or a Dimmable Heater.	 TELECO WALL MOUNTED REMOTE FOR A RETRACT ROOF

RAIN SENSOR OPTION

Teleco Wired Rain102H

The Rain102H by Teleco Rain Sensor can be programmed to automatically close the Louvres & includes integrated heating function for preventing false activation in case of ice and snow.

PURPOSE BUILT OUTDOOR LIVING AREA
BY LOUVRETEC AUCKLAND

180/30 SLIMLINE ROOF

The smallest Roof in the Slimline series

This Roof replaces the original 180 Linear and 180 Classic Opening Roofs.

The modern Slimline styling works particularly well with the narrower 180mm wide blade, and is an ideal choice for smaller spanning Opening Roofs.

Key Features

- Sleek, functional design, clean and uncluttered when open or closed
- Design strength of an extruded double box-section
- Somfy powered or hand-operated award winning Spiral Pivot operating system
- "Cushion Closing" onto a bulb seal strip
- Increased closing cover angle for added weather protection
- Larger blade gutter incorporated for extra storm-water dispersal

CONTROLLABLE OUTDOOR LIVING SPACE CREATION. BY LOUVRETEC AUCKLAND

200/35 SLIMLINE ROOF

A Handy 200mm Wide Opening Roof Louvre Blade

Since its release, the 200/35 Slimline Roof Opening Roof is a popular option that features a 200mm wide design.

The sleek, clean modern design provides excellent spanning capacity for the majority of residential installations.

Key Features

- Sleek, functional design, clean and uncluttered when open or closed
- Design strength of an extruded double box-section
- Somfy powered or hand-operated award winning Spiral Pivot operating system
- "Cushion Closing" onto an external sun-resistant PVC bulb seal
- Increased closing cover angle for added weather protection
- Larger blade gutter incorporated for extra stormwater dispersal

220/35 SLIMLINE ROOF

A Multi-purpose Louvre blade compatible as a Standard Spiral Pivot Roof as well as a Retract

Perfect for most Installations

The multi-purpose 220/35 Slimline Opening/Retract Roof replaces the 200 Super Roof Lite, and we believe it will be our most used system.

The sleek, clean modern design provides excellent spanning capacity for the majority of residential installations.

Key Features

- Sleek, functional design, clean and uncluttered when open or closed
- Design strength of an extruded double box-section
- Somfy powered or hand-operated award winning Spiral Pivot operating system
- "Cushion Closing" onto an external sun-resistant PVC bulb seal

EVERYTHING HAS A FLOW TO THE OUTDOORS
BY LOUVRETEC CANTERBURY

220/45 ALPINE ROOF

A Multi-purpose Louvre blade compatible as a Standard Spiral Pivot Roof as well as a Retract

For Larger Spans

This Roof replaces the 200 Super Roof Heavy option and is a larger spanning version of the 220/35 Slimline Roof. The 220/45 Alpine Roof leads the way with outstanding spanning capabilities – Ideal for high wind zone and alpine regions.

Key Features

- Sleek, functional design, clean and uncluttered when open or closed
- Design strength of an extruded double box-section
- Somfy powered or hand-operated award winning Spiral Pivot operating system
- "Cushion Closing" onto an external sun-resistant PVC bulb seal
- Increased closing cover angle for added weather protection
- Larger blade gutter incorporated for extra storm-water dispersal

220/45 ALPINE ROOF BLADE
Available Spiral Pivot or Retract

RETRACT

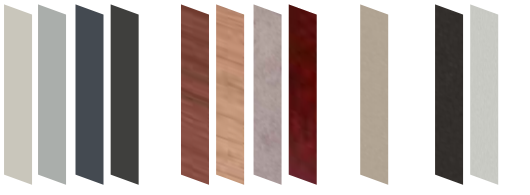

- Due to the extended span of this blade, the 220/45 Alpine Louvre has a 20x3 End Cap Connecting Bar fitted below the blade to eliminate any individual blade movement in extreme conditions.

A FILTERED LIGHT-FILLED OUTDOOR ROOM BY LOUVRETEC AUCKLAND

270 TRANSLUCENT ROOF

Let there be light

If loss of light is an issue when the Opening Roof is closed then the unique 270 Translucent Roof provides the answer.

The Translucent Roof has now been re-designed to include "Cushion Closing" on to an external sun-resistant bulb seal. This Opening Roof also features an all new white in-fill panel of Acrylic Naturelite Plexiglas

Plexiglas offers natural UV protection throughout the material - it does not rely on an applied surface coating for UV protection. It is one of the reasons Plexiglas is used in aircraft cabin windows to protect from strong UV light and substantial differences in pressure and extreme cold.

This same material is now used on all 270 Translucent Roof Opening Roofs - high light transmission coupled with naturally UV-stable technology is as good as it gets.

This style of Opening Roof now comes with a 185mm extra wide gutter to all four sides as standard.

LOUVRETEC PRODUCT WARRANTY

OPENING ROOFS - SUN LOUVRES - SHUTTERS

The Louvretec range of products:

All Louvretec branded products are designed and engineered in Australia & New Zealand by Louvretec to comply with relevant AS/NZS standards - refer to full Louvretec Engineering data Design Manual 2025 Section 13.

Louvretec has the most extensive range of outdoor sun shading/ outdoor living products available in Australasia, backed by a comprehensive network of Louvretec Dealers.

Most Louvretec products sold in Australia are made in Australia*

Most Louvretec products sold in New Zealand are made in New Zealand*

*Some specialised products may only be made in Australia or in NZ and are shipped between each country.

The Authorised Louvretec Dealer Network:

Your Louvretec product will have been supplied and installed by your local Authorised Louvretec Dealer. All Louvretec Dealerships are privately owned, and the same Louvretec Dealer who supplied your Louvretec will also service your Louvretec.

Your Louvretec product has been "Engineered for Life" and we are committed to ensuring that happens.

Louvrecare:

Preventative maintenance and valet. Regular scheduled servicing by a Louvrecare team has real benefits. Louvrecare can vary between Dealerships - consult your local Louvretec Dealer.

LOUVRETEC PRODUCT WARRANTY

OPENING ROOFS - SUN LOUVRES - SHUTTERS

warranty details	All product installed by Louvretec (excluding Outoor Blinds - please refer separate warranty for this) , or an Authorised Louvretec Installer, is from date of invoice, fully warranted for the first two years. This warranty covers workmanship, louvres and all componentry, motors, switches and electronics with all labour costs included. In addition, from year two to end of year five, a warranty replacement of parts only applies for all motors, switches and electronics. Labour costs excluded. (Excludes any wiring and electrical connections done by others).
motorisation	Louvretec exclusively uses Somfy motors, switches and electronics. Somfy offers a 5-year warranty on all motors and electronics. Please contact Louvretec NZ or Somfy for a complete list of all terms and conditions.
product materials	All aluminium louvres and extrusions used in Louvretec's systems are manufactured in an IS09002 quality assured environment to AS1866 & AS3902 standards. Marine grade T316 stainless steel is used for drive axles, with stainless steel componentry fixings being standard. Plastic injected moulded componentry is all UV stabilised
powdercoat finishes	A wide range of exterior powder coat finishes are available. Duralloy or equivalent is the standard finish supplied unless stated otherwise and this carries a 10 year film and colour integrity warranty as per the Dulux Powder and Industrial Coatings Warranty. If your project has used the Duratec powdercoat range please refer to the Dulux Powder and Industrial Coatings Warranty wording.
anodised finishes	The current specifications re anodised aluminium range from 12-20-25 microns depth. The greater the microns the better the protection. With regular cleaning anosided material will retain its original integrity for no less than 10 years.
fully engineered	Our louvre systems are designed to conform to New Zealand and Australian standards wind loadings. Full engineering details available on request.
cleaning	Periodic cleaning is essential to remove dirt, grime and accumulated salt deposits from both powder coated and anodised surfaces. Three steps for cleaning are: 1 Carefully remove any loose deposits with a wet sponge. 2 Use a soft non abrasive brush and a mild car cleaning detergent solution to remove dust, salt and other deposits. 3 Rinse off with clean fresh water.
product description	_____
louvrecare	Louvrecare is a planned preventative maintenance and valet service designed to keep your Louvretec product clean and in good working order. Contact your Louvretec Dealer for full details.

220/35 SLIMLINE RETRACT ROOF BLADE SHAPE
(RETRACT & SPIRAL PIVOT COMPATIBLE)

POWERED BY SOMFY MOTORS

INTRODUCING THE LOUVRETEC SLIMLINE RANGE OF RETRACTING ROOFS

These blades are also Spiral Pivot Opening Roof compatible

Louvretec's new range of Retract Roofs incorporates new Slimline design including quiet closing on to a bulb seal strip - so an extra snug fit & additional overlap cover is achieved when closed.
Louvretec Slimline is a completely new Louvre Roof range, developed for both Retract and standard Opening Roof usage.

Slimline Retract Roof Key Features

Available in two sizes;

- 220/35 Slimline Retract Roof (Retract Roof & Spiral Pivot Opening Roof Compatible!)
- 220/45 Alpine Retract Roof (Retract Roof & Spiral Pivot Opening Roof Compatible!)
- Sleek, functional design, clean and uncluttered when open or closed
- Design strength of an extruded double box-section
- Somfy powered
- "Cushion Closing" onto a bulb seal strip
- Increased closing cover angle for added weather protection
- Larger blade gutter incorporated for extra storm-water dispersal

Now powered by Somfy

The same tried and true motorisation that operates our award winnning Spiral Pivot system now operates our Retracts - Two Somfy Motors per Retract.

Customised Louvretec Controller

A wireless handheld remote, custom made for Louvretec by Teleco Italy is standard. These multi-function remotes can also control lighting, heating and other Somfy powered items such as motorised outdoor blinds.

Proudly NZ & Australian designed and manufactured

All jointly designed, manufactured and distributed worldwide by Louvretec NZ Ltd & Louvretec Australia Pty Ltd.

RETRACT ROOFS CONFIGURATION OPTIONS

OPTION 1

THREE SIDED FRAME - BLADES STACK TO REAR

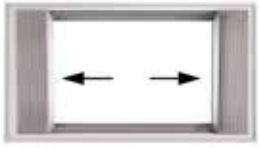

- No front beam, blades stack to rear
- Can be even or uneven number of blades

OPTION 2

FOUR SIDED FRAME - BLADES STACK TO ONE END

- Blades can stack to either one end
- Can be even or uneven number of blades

OPTION 3

FOUR SIDED FRAME - BLADES STACK AT EACH END

- Blades split stack from centre to each end
- Must be even number of blades

OPTION 4

FOUR SIDED FRAME - DOUBLE RETRACT (MID-BEAM MAY BE REQUIRED)

- Two Retracts meeting at mid-beam
- No mid-beam gutter required, blades close onto mid-beam flashing
- Blades stack from centre to each end
- Can be even or uneven number of blades
- Maximum length; up to 13.734mm

220/35 SLIMLINE RETRACT ROOF

A Multi-purpose Louvre blade compatible as a Retract Roof, as well as a Standard Spiral Pivot Opening Roof. Very versatile!

The multi-purpose 220/35 Slimline Retract ROOF combines sleek, clean modern design along with excellent spanning capacity. Because the 220/35 Slimline Louvre is compatible with not only the Retract system but also as an Opening Roof it's a great choice for large, residential installations with multi Louvretec product applications.

OUTSIDE IN YOUR COMFORT ZONE
BY LOUVRETEC SYDNEY NORTH

220/35 Slimline Retract Roof BLADE

LOUVRETEC MULTI-CHANNEL CONTROLLER
Custom programmed.

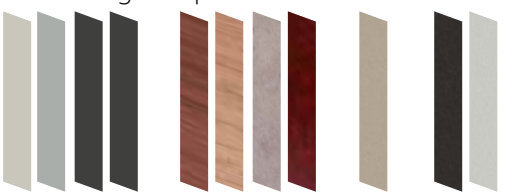

Key Features

- Sleek, functional design, clean and uncluttered when open or closed
- Design strength of an extruded double box-section
- Somfy powered
- "Cushion Closing" onto a bulb seal strip
- Increased closing cover angle for added weather protection
- Larger blade gutter incorporated for extra storm-water dispersal

Clean uncluttered lines

At only 35mm high with a tapering topside, the blades stack superbly and cast minimal shadow when in use.
All the operating mechanism, electronics and motors are incorporated within the side frame extrusions, completely hidden from sight and protected from the weather.
Louvretec Retracts are factory assembled, tested and calibrated as part of the manufacturing process. They come to site pre-wired ready for the electrician to connect through a standard junction box.

SURFACE FINISHING OPTIONS
A wide range of options are available.

220/45 ALPINE RETRACT ROOF

A Multi-purpose Louvre blade compatible with Retract as well as a Standard Spiral Pivot Roof

For Larger Spans & Alpine Locations

This Roof is a larger spanning version of the 220/35 Slimline.
The 220/45 Alpine Retract Roof leads the way with outstanding spanning capabilities – Ideal for high wind zones and alpine regions.

Key Features

- Sleek, functional design, clean and uncluttered when open or closed
- Design strength of an extruded double box-section
- Somfy powered
- "Cushion Closing" onto an external sun-resistant PVC bulb seal
- Increased closing cover angle for added weather protection
- Larger blade gutter incorporated for extra storm-water dispersal

Market Leading Design

Motorised by powerful twin Somfy Tubular motors, a multi-purpose Louvretec controller comes as standard. The system can also be configured for home automation technology.

All the operating mechanism. Electronics and motors are incorporated within the side frame extrusions, completely hidden from sight and protected from the weather.

Louvretec Retracts are factory assembled, tested and calibrated as part of the manufacturing process. They come to site pre-wired ready for the electrician to connect through a standard junction box.

TWO MOTORS FOR TWO FUNCTIONS

Louvretec's Retract Roofs have two operating functions, each controlled by separate Somfy 25Nm motors

Motor 1 - Retract Motor

This Motor Retracts | Extends the Louvre Blades

Motor 2 - Rotate motor

This Motor functions like a standard Opening Roof - rotating the Louvre Blades between 0 to 135°

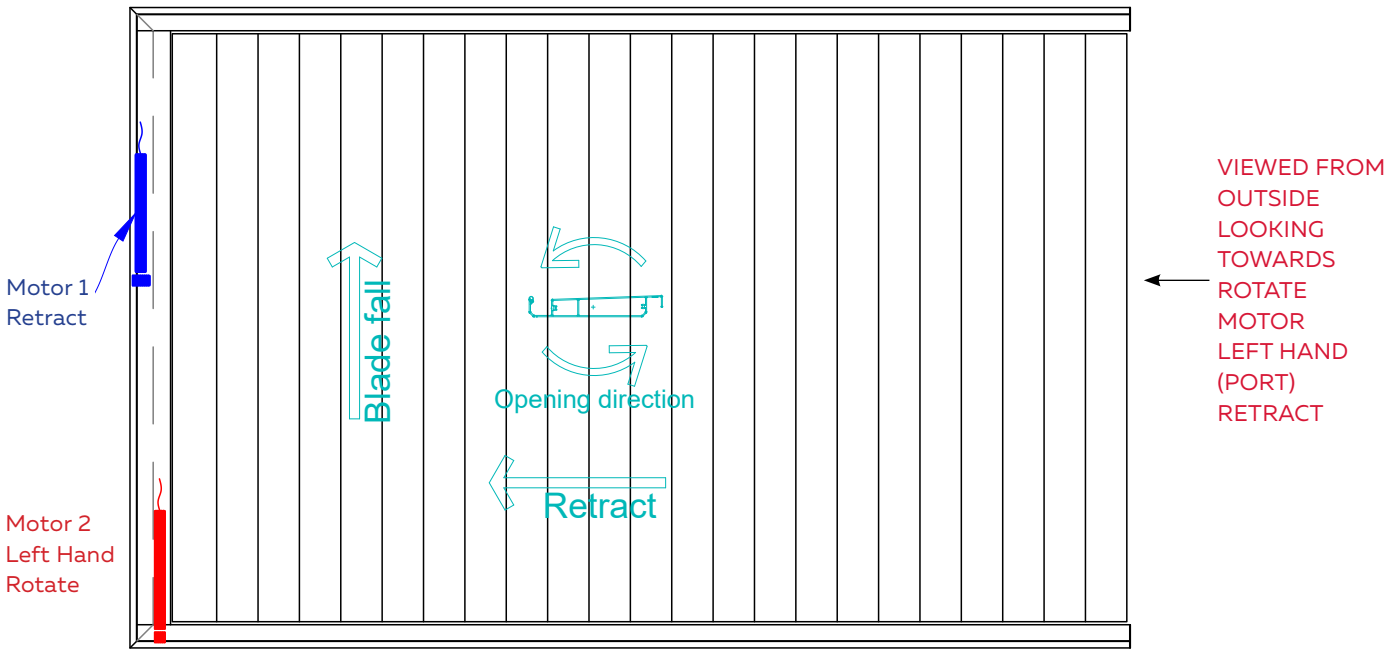

Fall on blades

This is determined by the location of the **Rotate Motor** which is always located on the high side of the Blade. Fall on Blades is always 60mm from Drive Side down to Passive Side.

ROTATE MOTOR &
RETRACT DRIVE SHAFT

TECHNICAL DETAILS **WIRE POSITIONS FOR RUNNING POWER TO CONTROLLER**

- When preparing to run power to the Retract, plan to enter the frame approximately 300mm away from the motor corner (the controller side) and 100mm down from the top.
- Leave enough excess cable to reach the middle of the frame.
- Protect the wire from sharp metal edges by using flex conduit or other suitable sheathing.
- A local isolation switch is required.

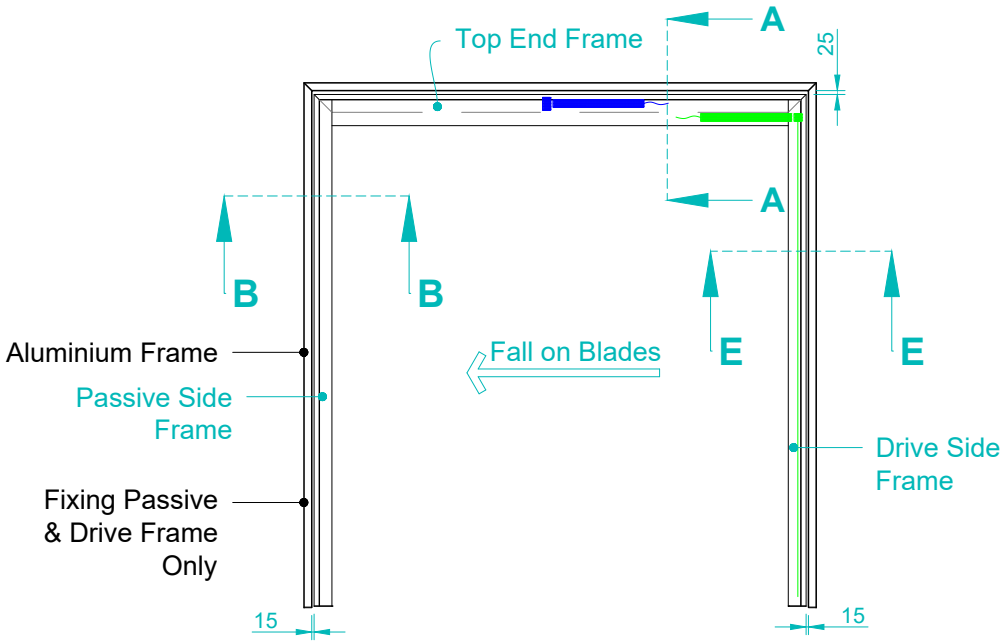

©Louvretec 2025 – All Rights Reserved. Technical specifications subject to change without notice.

CONFIGURATIONS **OPTION 1: 3 SIDED FRAME**

CALCULATING RETRACT FRAME SIZES

The overall length of a Louvretec Retract Roof is a module size pre-determined by the frame configuration, ie: 3 sided frame or 4 sided frame plus the number of blades.

OPTION 1: THREE SIDED FRAME

FOR RETRACT THREE SIDED BLADE CALCULATIONS SHEETS REFER TO PAGES 3.23 - 3.24 IN THIS SECTION

These sizes cannot be varied or altered. Take great care when site measuring and calculating frame length.

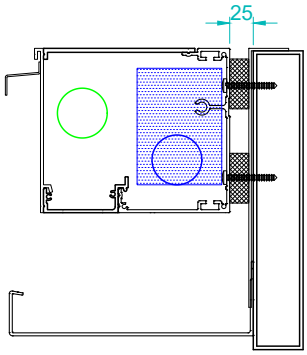

On a 4 sided frame additional room is required to site assemble the mitred corners, therefore 15mm spacing is allowed for sides with 25mm spacing allowed on the top and bottom frames.

Due to the additional depth required with a Retract Roof a 300x50 aluminium box section is the standard structural outer frame.

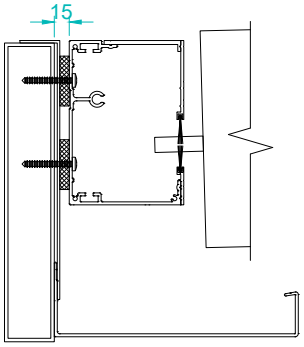

15mm SPACING
= 10mm PACKER = 5mm FLASHING

25mm SPACING
= 20mm PACKER + 5mm FLASHING

CALCULATING RETRACT FRAME SIZES

The overall length of a Louvretec Retract Roof is a module size pre-determined by the frame configuration, ie: 3 sided frame or 4 sided frame plus the number of blades.

OPTION 2: FOUR SIDED FRAME

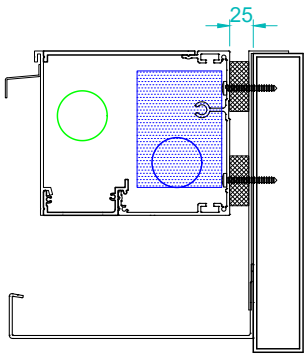

FOR RETRACT FOUR SIDED BLADE CALCULATIONS SHEETS REFER TO PAGES 3.30 - 3.35 IN THIS SECTION

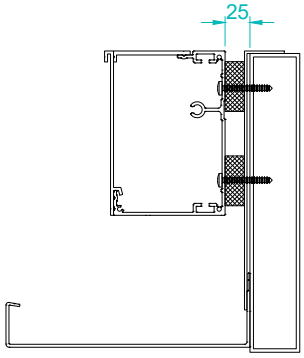

These sizes cannot be varied or altered. Take great care when site measuring and calculating frame length.

On a 4 sided frame additional room is required to site assemble the mitred corners, therefore 15mm spacing is allowed for sides with 25mm spacing allowed on the top and bottom frames.

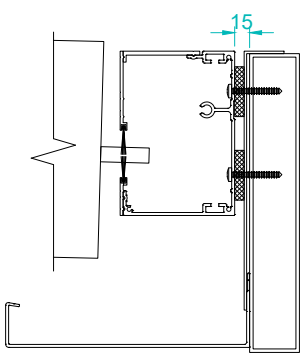

Due to the additional depth required with a Retract Roof a 300x50 aluminium box section is the standard structural outer frame.

NOON DUO CONTROLLER BY TELECO/SOMFY – A CUSTOM PROGRAMMED RETRACT ROOF CONTROLLER.

REMOTE CONTROLLER

Custom programmed

The Louvretec customised Noon Duo Retract Remote Controller has 11 channels which enables 11 different Louvretec products to be programmed on to the remote control.

This one remote is a sophisticated solution for installations that feature both Teleco and Somfy receivers, such as Retractable Roof & Motorised Blinds.

A demonstration of the remote control is given to each customer along with an easy to follow customised remote control instruction card.

Retractable Roofs can be operated from a Smartphone - please ask your Louvretec Dealer for the latest options.

RETRACT AFTER SALES CARE & WARRANTY

Operating instructions, Warranty and care

On completion of a Louvretec Retract Roof the owner is provided with a Retract Warranty that also contains information such as operating instructions & care and cleaning advice.

A Retract Roof is a high value item that benefit's from regular servicing. Louvretec Retracts are designed to an exacting standard, incorporating the very latest in Retract technology.
Retracting Louvre systems means more moving parts - these will require regular cleaning, servicing and protective maintenance to keep your Retract system in good working order.

Regular servicing every 12 months

We recommend a regular maintenance service on a twelve month basis.
Some Louvretec Dealerships also offer a full valet cleaning service. Check with your local Dealer to see if this service is available.
Please refer to the Retract Warranty regarding general care, cleaning, key points regarding safe operation of the Retract System, along with the full Product Warranty.

RETRACTED. AUCKLAND, NZ

RETRACT ROOF CLOSED. AUCKLAND, NZ

SAFE OPERATION

Any object that obstructs the path of the louvres during the rotating and/or retract/extend operation can cause damage. Objects can include but not limited to branches, bottles, broom handles, balls, tools etc.

Ensure gutters and surrounding areas are free of any objects before operating.

EASE OF OPERATION

IN HIGH WINDS IT IS RECOMMENDED NOT TO USE THE RETRACT MODE. THE FORCE OF THE WIND ON THE LOUVRE BLADE WHEN RETRACTING CAN AFFECT THE MOVEMENT OF THE LOUVRE BLADES.

IN HIGH WINDS WE RECOMMEND HAVING THE LOUVRES PARKED IN THE FULLY CLOSED POSITION. HIGH WINDS CAN CAUSE THE LOUVRE BLADES TO RATTLE AGAINST EACH OTHER WHEN RETRACTED BACK.

- The Retract Roof remote has preset keys to rotate/tilt the louvres to 45°, 90° & 135°. By pressing the key a second time will stop the louvres at any point in between the above tilt angles.
- When in retracting mode the roof the louvres will always go to 90° before retracting back.
- Once the louvres have moved from the fully retracted position, the louvres will automatically close. Simply rotate them open and close (just like a standard Opening Roof) for operable shelter when they are fully returned.
- A rain sensor option is available. The rain sensor is activated by detecting drops of water. When activated the remote unit will move the roof to the extended position and close the louvres.
- The remote unit executes no further commands until 20 seconds after the sensor no longer detects any drops.
- Lighting & heating options can also be operated on the Retract's remote control unit.

INSTALLATION NOTE:
Take care, never install a flashing over the motor, end frame, drive and passive frame covers.

LOUVRETEC PRODUCT WARRANTY

RETRACT ROOFS

The Louvretec range of products:

All Louvretec branded products are designed and engineered in Australia & New Zealand by Louvretec to comply with relevant AS/NZS standards - refer to full Louvretec Engineering data Design Manual 2025 Section 13.

Louvretec has the most extensive range of outdoor sun shading/ outdoor living products available in Australasia, backed by a comprehensive network of Louvretec Dealers.

Most Louvretec products sold in Australia are made in Australia*

Most Louvretec products sold in New Zealand are made in New Zealand*

*Some specialised products may only be made in Australia or in NZ and are shipped between each country.

The Authorised Louvretec Dealer Network:

Your Louvretec product will have been supplied and installed by your local Authorised Louvretec Dealer. All Louvretec Dealerships are privately owned, and the same Louvretec Dealer who supplied your Louvretec will also service your Louvretec.

Your Louvretec product has been "Engineered for Life" and we are committed to ensuring that happens.

Louvrecare:

Preventative maintenance and valet. Regular scheduled servicing by a Louvrecare team has real benefits. Louvrecare can vary between Dealerships - consult your local Louvretec Dealer.

LOUVRETEC PRODUCT WARRANTY

RETRACT ROOFS

louvretec retract

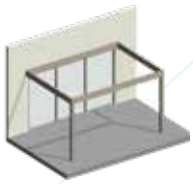

warranty details	All Retract Roofs installed by Louvretec, or an Authorised Louvretec Installer, is from date of invoice, fully warranted for the first two years. This warranty covers worksmanship, louvres and all componentry, motors, switches and electronics with labour costs included. From year two to end of year five, a warranty 'replacment of parts' only applies for all motors. Labour costs excluded (also excludes any wiring and electrcial connections by others).
motorisation	Louvretec exclusively uses Somfy motors. Somfy offers a 5 year warranty on all motors and electronics. Please contact your Louvretec Dealer or Somfy for a complete list of all terms and conditions.
product materials	All aluminium louvres and extrusions used in Louvretec's systems are manufactured in an IS09002 quality assured environment to AS1866 & AS3902 standards. Marine grade T316 stainless steel is used for drive axles, with stainless steel componentry fixings being standard. Plastic injected moulded componentry is all UV stabilised.
powdercoat finishes	A wide range of exterior powder coat finishes are available. Duralloy or equivalent is the standard finish supplied unless stated otherwise and provides excellent resistance to weather and salt spray. This carries warranties of a maintainable service life of 25 years, film integrity of 10 years and colour integrity of 7 years.
anodised finishes	The current specifications re anodised aluminium range from 12-20-25 microns depth. The greater the microns the better the protection. With regular cleaning anosided material will retain its original integrity for no less than 10 years.
fully engineered	Our louvre systems are designed to conform to New Zealand and Australian standards wind loadings. Full engineering details available on request.
cleaning	1. Periodic cleaning is essential to remove dirt, grime and associated salt deposits from both powder coated and anodised surfaces. 2. Carefully remove any loose deposits with a wet sponge. 3. Use a soft non-abrasive brush and a mild detergent or car cleaning solution to remove dust, salt and other deposits. Rinse well with clean water. 4. If your Retract roof downpipe connects to tank water supply be sure to dis-connect before cleaning. 5. Most importantly – USE REGULARLY! We recommend at least once every two weeks.
product description	_____
louvrecare	Louvrecare is a planned preventative maintenance and valet service designed to keep your Louvretec product clean and in good working order. Contact your Louvretec Dealer for full details.

LOUVRETEC STRUCTURAL FRAMES | POSTS | CONNECTIONS

No substitution is permitted

REFER TO RELEVANT DESIGN INFORMATION
Engineering Section 13; ENGINEERING REPORTS

The following structural drawings and fixing details are for use with Louvretec Aluminium Louvre Systems and supporting structures.

No substitution is permitted – please read in conjunction with relevant design tables as applicable in Engineering Reports Section 13.

The Louvretec Structural Frame

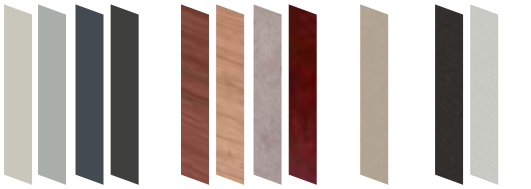

- As part of the Louvretec Opening Roof / Retract Roof package Louvretec offers a fully engineered structural aluminium frame system.
- This frame system has been designed to meet the structural requirements for a Louvretec Outdoor Room.
- Beams & posts are custom designed to be structurally compliant to the specific wind zone.
- Louvretec structural frames provide for clean, aesthetically pleasing lines and with regular cleaning are virtually maintenance free.
- They are also designed to include wall infills such as outdoor blinds, Slidetec Frameless Glass Sliders, Louvre panels - sliding or fixed.

Connections to building

- This section also covers a comprehensive range of options for fixing structural beams to existing buildings.
- Options also include braced free-standing posts where fixing to house is not possible.

SURFACE FINISHING OPTIONS

A wide range of options are available.

CONNECTING TO THE BUILDING

Three typical fixing locations

In most instances, the aluminium structural frame connects either directly to or directly alongside the existing building.

There are three typical fixing locations:

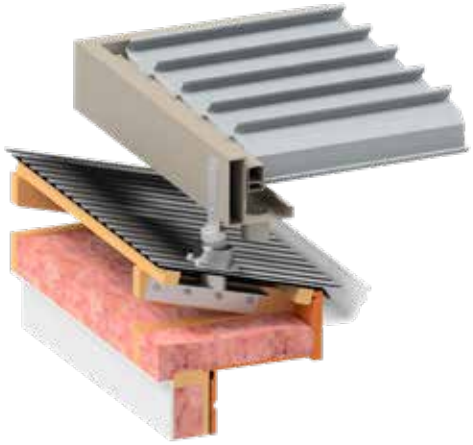

1. Fixing above the existing roof
2. Fixing flush with the existing gutter
3. Fixing directly to - or free standing next to the building

MT EDEN, NZ

AUCKLAND, NZ

CONNECTING TO THE BUILDING

Fixing options

Location determines which suitable fixing options are available and are permissible.

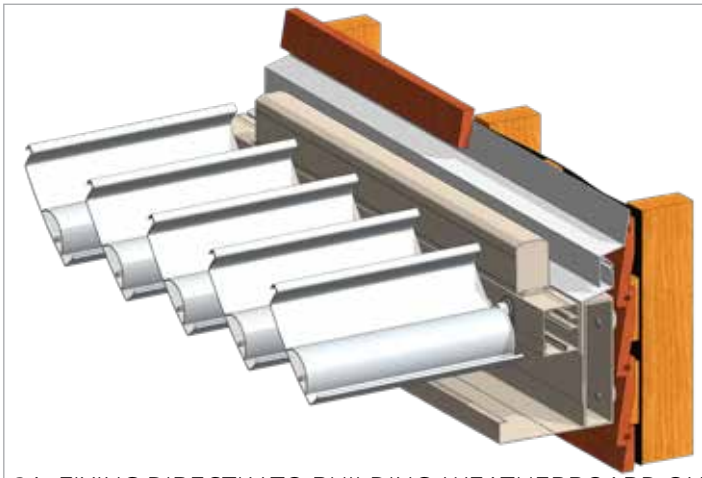

Fixing options must take into consideration the structural integrity of the building - i.e, is there solid fixing available? Also ensuring the watertight integrity of the building is not compromised. .

SLIDETEC GLASS DOORS & WINDOWS & FIXED PANELS

A freshly designed range of engineered sliding & fixed glazed options.

Slidetec Frameless Glass Sliding Doors & Windows, along with Slidetec Fixed Glazing Panels offer a freshly designed range of engineered sliding and fixed glazed options.

Specifically designed for the closing in of outdoor spaces. Ideal as sliding wall infills for your Louvretec room, or simply for closing off any outdoor deck space.

1. Slidetec ST10 & ST12 Frameless Glass Sliding Doors

Available in 10mm & 12mm toughened glass Slidetec has been designed to meet the rigors and demands of Australian and New Zealand climatic conditions.

The sliding systems have been considerably upgraded to meet these demands, with new extrusions, and heavy duty adjustable stainless-steel ball bearing mounted sliding carriages.

Simple, clean functional lines offering clear view and wonderful protection from the elements.

2. Slidetec Glazed Fixed Panels

Available in 6mm or 8mm toughened glass, Slidetec fixed panels are designed to complement and enhance the Slidetec sliding door range.

Ideal as overhead fixed panels if overall height exceeds sliding door design specifications.

Can also be used as conventional glazed fixed panels if sliding access is not required.

Enhance your outdoor space

Enhance and enjoy your outdoor spaces protected from the weather without compromising your view.

Close up snug for wet days, open wide for cooling breezes. Enjoy the best of whatever the weather has on offer.

SLIDETEC 3 PANEL FRAMELESS GLASS SLIDING DOOR

1. SLIDETEC ST10 & ST12 FRAMELESS GLASS SLIDING DOORS & WINDOWS

Close in the sides of an outdoor area

Slidetec Frameless Glass Sliding systems have been specifically designed for the closing in of outdoor areas.

The frameless design ensures maximum view with clean, uninterrupted lines. Designs such as these are only suitable for closing in outdoor areas and can not be used as house joinery.

Key features

- A wide range of panel configurations. Refer to page 5.09
- Floor mounted sliding system
- Standard and rebated bottom track options available.
- Has 3, 4 or 5 track sliding options giving a range of panel choices
- Slides to the left or right as desired
- System is easy to use, with pick up blocks to ensure easy following function when closing the panels
- Stainless steel pull handle rebated into glass standard
- Optional locking with easy to use Foot Lock
- Glazing with 10mm or 12mm toughened glass
- Silver anodised bottom rail to enhance smooth gliding function of stainless steel bearing bottom rollers
- Powder coat finish of your choice

DIFFERENT CONFIGURATIONS & COMBINATIONS

Slidetec systems are extremely versatile

While appearing both simple and minimal in design, Slidetec has been designed to meet a wide range of varied applications.

Please familiarise yourself with the design options and combinations available.

Standard panels

- Panels range in sets from 2 glass panels to 10 glass panels
- Panels sliding in one direction are the most typically specified
- Panels may also meet-in-the-middle (MIM), installation details being the same for both options

Tracks

- Track options vary between 3 track, 4 track and 5 track
- Tracks are available standard, flush or recessed

Glass options

- Sliding doors and windows are available in 10mm & 12mm toughened glass, determined by wind and glass size
- Fixed Panels are available in 6mm & 8mm toughened glass

Locking

- Doors are easily locked from the inside with Louvretec's new Foot Lock
- This is an options, please specify if required
- A 58mm round stainless steel door pull is standard

Full installation details

- A fully illustrated step by step Slidetec Installation Manual is available.

WIND LOADS & DEFLECTIONS

Calculating glass & overall maximum opening height

DEFLECTION

The amount of movement of glass under uniform wind pressure (wind load).

When wind loads are applied to glass it causes both compression and tensile stresses as illustrated in the diagram above.

The face of the glass that has the load imposed on it is subject to compressive stresses for which the glass has a high resistance. The opposite face has the tensile stresses applied to it for which glass has a lower resistance.

10mm & 12mm toughened glass deflects to the same extent, but toughened glass can withstand more deflection before breaking.

DETERMINING THE WIND LOAD

The actual design wind load pressure for each individual application can be determined by specific engineering design using NZS 4203 or AS/NZS 1170. Most regulatory authorities offer information relevant to the job specific site – on larger projects the project engineer will provide this information. Loads will vary due to ground terrain, building height and glazing location, with much higher loads on the corners of buildings and edges of roofs.

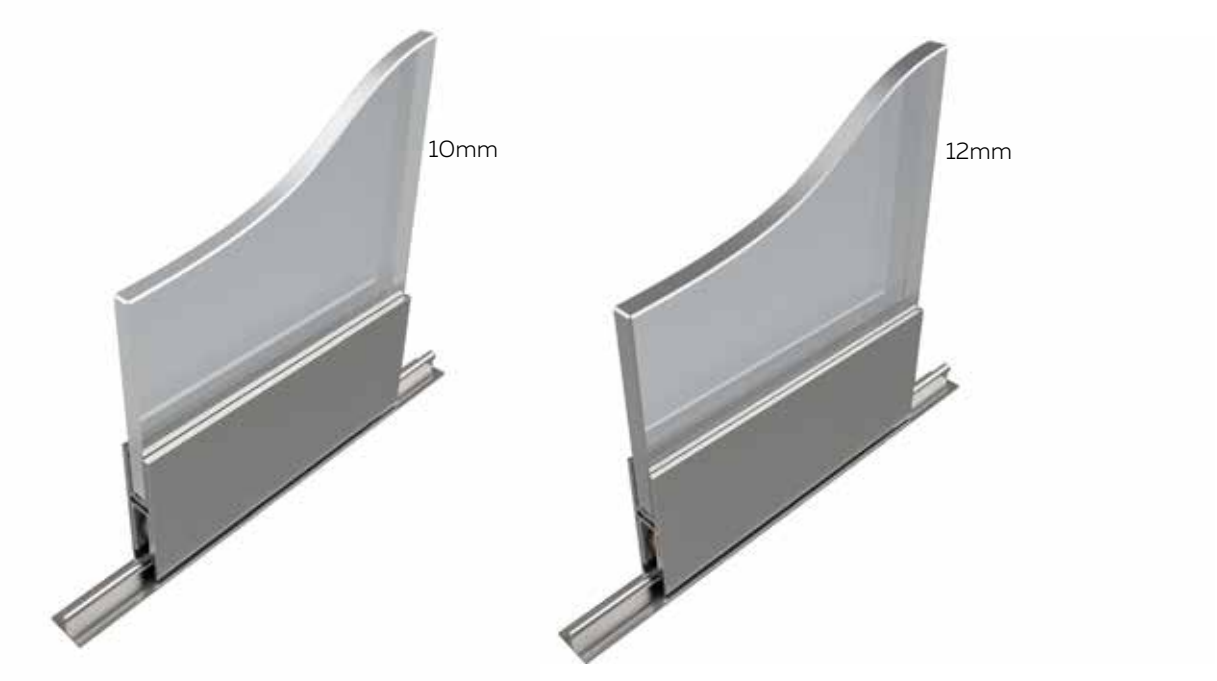

ULTIMATE WIND PRESSURE (UWP)

WIND ZONE	WIND ZONE SYMBOL	BASIC WIND SPEED M/S	ULTIMATE WIND PRESSURE PA
Low	L	32	650
Medium	M	37	850
High	H	44	1200
Very High	VH	50	1550
Extra High	EH	55	-

©Louvretec 2025 – All Rights Reserved. Technical specifications subject to change without notice.

GLASS

The key component - A sheet of toughened 10mm or 12mm glass

Everything revolves around the glass

- Slidetec Glass Sliders are designed around the tensile strength or toughened glass.
- The Glass Span Charts (further on in this manual) determine (based on wind zones) the required glass thickness and heights of the panels
- Spans to NZ Standards are based on a specific deflection of span/60 with a max of 40mm in the given wind zone
- The deflection is based on a minimum tensile strength requirement of 70 mPa and is covered by a generic PS1
- This surpasses the NZ/AU Standard minimum and can only be signed off by a suitably qualified engineer with a site specific PS1
- Slidetec can be supplied as completed panels or as pre-finished extrusion cut and milled to size, along with all componentry required. A job specific glass cutting sheet will be supplied to the Dealer who will source the glass locally
- A step by step Installation Guidelines document will be supplied specific to each job

©Louvretec 2025 – All Rights Reserved. Technical specifications subject to change without notice.

SLIDETEC SPAN CHART

Glass Span (visible sight line)						
	NZS3604 Wind Zone:	Low	Medium	High	Very High	Extra High
Glass Thickness						
10mm	Maximum Span	2285	2080	1855	1705	1600
12mm	Maximum Span	2760	2510	2235	2055	1930

*Glass spans in this chart limited to installations associated with buildings up to importance level 2, under 10m high, and within a designated general wind-zone (not SED).
*This span chart can only be used in conjunction with toughened safety glass supplied by Viridian Glass (NZ).
*All glass panel related PS1 documents to be supplied by Viridian Glass (NZ).
*This standard design PS1 covers glass selection to NZS4223.3 and NZS4223.4 only (frame design and support of the glass panels is excluded).
*Max glass spans to the NZ standard are based on a maximum allowable deflection of span/60 in the given wind-zone.
*The glass span tables do not take into account any deflection caused by bending of the SlideTec frames.
*Glazing safeguarding a fall of 1m or more requires specific design.

*Minimum panel width = 500mm. Maximum panel width = 2400mm.

The figures below give the maximum opening height per type of application. Refer to sheet 2 of this publication for further explanation / detail.

PS1 no: (By Viridian) .
CPEng 1163388
Auckland Council Author Number: 124000
SBGC Author Number: PSA/2020/14

Building Code Clause(s) B1, F2

PRODUCER STATEMENT – PS1 – DESIGN

ISSUED BY: Viridian Glass Ltd Partnership
(Design Firm)

TO: LouvreTec NZ
(Owner/Developer)

TO BE SUPPLIED TO: ### Council
(Building Consent Authority)

IN RESPECT OF: Maximum Viridian Toughened Safety Glass Spans for SlideTec Sliding Panel System.
(Description of Building Work)

AT: ###
(Address)

Town/City: ### **LOT** ..... **DP** ..... **SO** .....
(Address)

We have been engaged by the owner/developer referred to above to provide:

Design services with respect to maximum Viridian Toughened Safety Glass spans for SlideTec Sliding Panel System.
This PS1 excludes the design of all supporting structure and substrate beyond the immediate fixings which must be designed by others to NZ Building Code and AS/NZS 1170.
(Extent of Engagement)

services in respect of the requirements of Clause(s) B1, F2 of the Building Code for:

☐ All or ■ Part only (as specified in the attachment to this statement), of the proposed building work.

The design carried out by us has been prepared in accordance with:

■ Compliance Documents issued by the Ministry of Business, Innovation & Employment B1/VM1/AS1 F2/AS1 or
(verification method/acceptable solution)

☐ Alternative solution as per the attached schedule

The proposed building work covered by this producer statement is described on the drawings titled:

Refer attached drawings and numbered Refer attached drawings;
together with the specification, and other documents set out in the schedule attached to this statement.

On behalf of the Design Firm, and subject to:
(i) Site verification of the following design assumptions Refer attachment below
(ii) All proprietary products meeting their performance specification requirements;

I believe on reasonable grounds that a) the building, if constructed in accordance with the drawings, specifications, and other documents provided or listed in the attached schedule, will comply with the relevant provisions of the Building Code and that b), the persons who have undertaken the design have the necessary competency to do so. I also recommend the following level of construction monitoring/observation:

☐ CM1 ☐ CM2 ☐ CM3 ☐ CM4 ☐ CM5 (Engineering Categories) or ■ as per agreement with owner/developer/Architect

I, Woo Ching, Yong (Dominic) am: ■ CPEng 1163388
(Name of Design Professional)

I am a member of: ■ Engineering New Zealand and hold the following qualifications: BEng.(Hons), Mst Eng

The Design Firm issuing this statement holds a current policy of Professional Indemnity Insurance no less than $200,000*.
The Design Firm is a member of ACE New Zealand: ☐

SIGNED BY Woo Ching, Yong (Dominic) (Signature)
(Name of Design Professional)

ON BEHALF OF Viridian Glass Ltd Partnership Date Feb 2025
(Design Firm)

Note: This statement shall only be relied upon by the Building Consent Authority named above. Liability under this statement accrues to the Design Firm only. The total maximum amount of damages payable arising from this statement and all other statements provided to the Building Consent Authority in relation to this building work, whether in contract, tort or otherwise (including negligence), is limited to the sum of $200,000.*

This form is to accompany **Form 2 of the Building (Forms) Regulations 2004** for the application of a Building Consent.

THIS FORM AND ITS CONDITIONS ARE COPYRIGHT TO ACE NEW ZEALAND AND ENGINEERING NEW ZEALAND

GUIDANCE ON USE OF PRODUCER STATEMENTS

Producer statements were first introduced with the Building Act 1991. The producer statements were developed by a combined task committee consisting of members of the New Zealand Institute of Architects, Institution of Professional engineers New Zealand (now Engineering New Zealand), ACE New Zealand in consultation with the Building Officials Institute of New Zealand. The original suit of producer statements has been revised at the date of this form as a result of enactment of the Building Act (2004) by these organisations to ensure standard use within the industry.

The producer statement system is intended to provide Building Consent Authorities (BCAs) with reasonable grounds for the issue of a Building Consent or a Code Compliance Certificate, without having to duplicate design or construction checking undertaken by others.

PS1 Design Intended for use by a suitably qualified independent design professional in circumstances where the BCA accepts a producer statement for establishing reasonable grounds to issue a Building Consent;

PS2 Design Review Intended for use by a suitably qualified independent design professional where the BCA accepts an independent design professional's review as the basis for establishing reasonable grounds to issue a Building Consent;

PS3 Construction Forms commonly used as a certificate of completion of building work are Schedule 6 of NZS 3910:2013 or Schedules E1/E2 of NZIA's SCC 2011[2]

PS4 Construction Review Intended for use by a suitably qualified independent design professional who undertakes construction monitoring of the building works where the BCA requests a producer statement prior to issuing a Code Compliance Certificate.

This must be accompanied by a statement of completion of building work (Schedule 6).

The following guidelines are provided by ACE New Zealand and Engineering New Zealand to interpret the Producer Statement.

Competence of Design Professional

This statement is made by a Design Firm that has undertaken a contract of services for the services named, and is signed by a person authorised by that firm to verify the processes within the firm and competence of its designers.

A competent design professional will have a professional qualification and proven current competence through registration on a national competence based register as a Chartered Professional Engineer (CPEng).

Membership of a professional body, such as Engineering New Zealand (formerly IPENZ) provides additional assurance of the designer's standing within the profession. If the design firm is a member of ACE New Zealand, this provides additional assurance about the standing of the firm.

Persons or firms meeting these criteria satisfy the term "suitably qualified independent design professional".

***Professional Indemnity Insurance**

As part of membership requirements, ACE New Zealand requires all member firms to hold Professional Indemnity Insurance to a minimum level.

The PI Insurance minimum stated on the front of this form reflects standard, small projects. If the parties deem this inappropriate for large projects the minimum may be up to $500,000.

Professional Services during Construction Phase

There are several levels of service which a Design Firm may provide during the construction phase of a project (CM1-CM5 for Engineers[3]). The Building Consent Authority is encouraged to require that the service to be provided by the Design Firm is appropriate for the project concerned.

Requirement to provide Producer Statement PS4

Building Consent Authorities should ensure that the applicant is aware of any requirement for producer statements for the construction phase of building work at the time the building consent is issued as no design professional should be expected to provide a producer statement unless such a requirement forms part of the Design firm's engagement.

Attached Particulars

Attached particulars referred to in this producer statement refer to supplementary information appended to the producer statement.

E dyong@viridianglass.net.nz

Re: Clause B2 Statement for Viridian Glass System -:

We are unable to provide a Producer Statement for Clause "B2 - Durability" of the Building Code because the Ministry of Business Innovation and Employment compliance documents do not contain an effective verification method.

However, for the specific designed structural elements in Viridian Glass Producer Statement PS1, we can confirm the following:

When glass is installed in accordance with NZS 4223 and installation instructions, it will meet the durability requirements of Table 1 Acceptable Solution B2/AS1.

To ensure the durability of the system, the care and maintenance requirements included in the Viridian Glass product manual must be met. Please refer attached documents.

Yours sincerely,

Dominic Yong
CPEng 1163388

Viridian Glass

E dyong@viridianglass.net.nz

To Whom It May Concern

Construction Monitoring

The design is based on the verification of construction specified in the PS1 by a suitably qualified professional.

Inspection shall include at least the following:

- The glass type, thickness and dimensions are as provided by the PS1, and are supplied by Viridian Glass.
- The permanent glass markings are visible after installation, and meet the requirements of NZS 4223.
- The hardware and fixings are supplied and installed at the specified centres as per the PS1.
- Substitution of glass or hardware is not allowed.
- The supporting structures has been engineered by a suitably qualified design professional to support design loads from the glass. This is not responsibility of Viridian Glass.

We note additional inspections will be required as part of the Council's normal inspection regime.

Yours sincerely,

Technical Manager
CPEng | CMEngNZ | Mst.Eng

www.viridianglass.co.nz

CARE AND MAINTENANCE

To ensure the long-term durability of glass, regular washing and drying are necessary. In urban areas, it is recommended to wash them every three to six months. The following guidelines should be followed:

a. When washing, soak the glass surface with a mild soap detergent solution, warm water, or proprietary glass cleaners to loosen dirt and debris.

b. Use a soft, grit-free cloth or sponge to wash the glass and avoid washing in direct sunlight. Do not use scrapers or razor blades.

c. After washing, rinse the glass with clean water and dry it using a clean, grit-free squeegee, cloth, or paper towel. Remember that wet glass can be dirty.

d. Ensure that all water and cleaning solution residue is dried from the gaskets, sealants, and frames to prevent water spots.

e. Avoid cleaning tinted and reflective glass surfaces in direct sunlight.

f. For laminated glass, use the same washing procedures as above, but be careful not to allow solvents to come into contact with the edge laminate interlayer.

g. It is recommended to check that hardware drainage is not blocked, as this can affect laminated glass.

OVERHEAD RECTANGULAR PANELS

OVERHEAD RAKING PANEL

FULL HEIGHT FIXED PANEL

2. SLIDETEC FIXED PANELS GLAZING SYSTEM

Fixed glass panels to compliment Slidetec Doors & Windows

Slidetec Fixed Panels are designed to compliment the Slidetec Sliding Door & Window system.

Two typical applications

1. Fixed overhead panels

If the sliding panel is over height and exceeds design limitations, a suitably sized fixed overhead panel can be fitted.

Fixed overhead panels can also be used on pitched roof frames to square up the opening to allow for a sliding panel to be installed under.

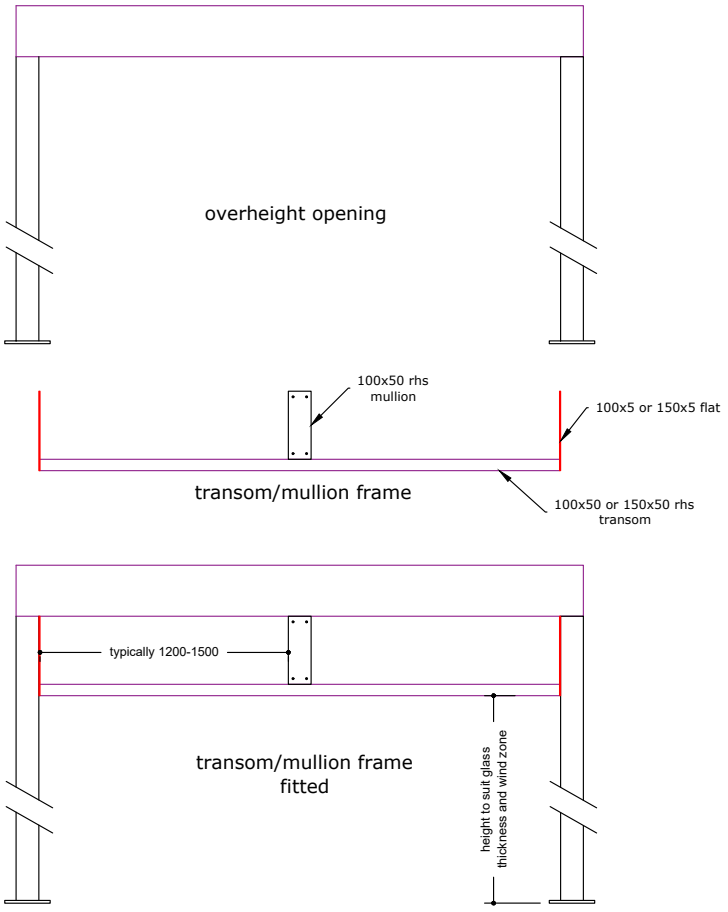

2. Full height fixed panels

Ideal to use to provide light and shelter as a full height fixed panel when sliding access is not required.

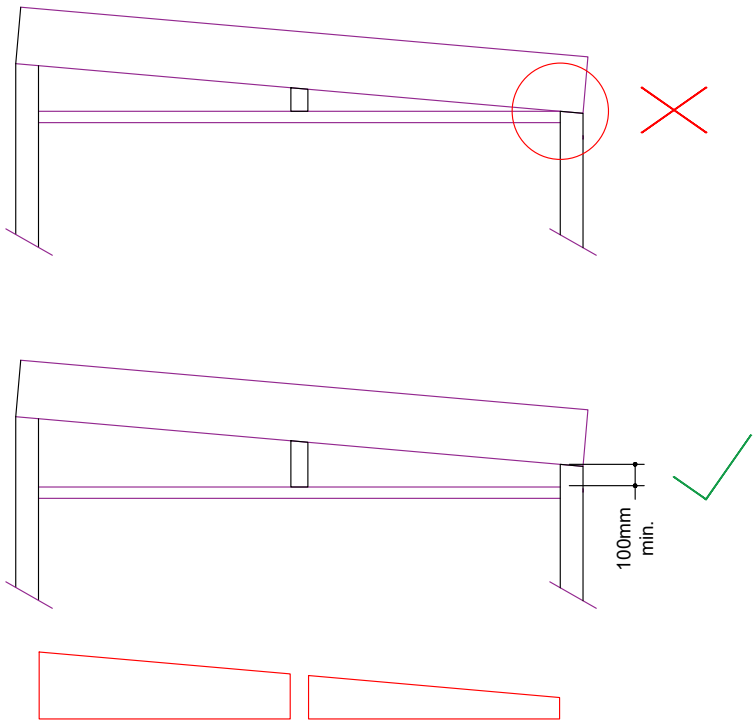

©Louvretec 2025 – All Rights Reserved. Technical specifications subject to change without notice.

PANEL DETAILS

Top fixed panels to reduce the height of an over height opening.

RAKING FIXED PANELS

GLASS DEDUCTIONS

CROSS SECTION WIDTH - GLASS WIDTH = OVERALL WIDTH -20MM

CROSS SECTION HEIGHT - GLASS HEIGHT = OVERALL HEIGHT -38MM

©Louvretec 2025 – All Rights Reserved. Technical specifications subject to change without notice.

TWO FIXING SYSTEMS

2. Face Fixed option

This system is based on typical aluminium joinery design, incorporating a facing to all four sides of the outer frame.

In contrast to the Flush Fixed option, this section incorporates a flange to the outer frame enabling the glass panel to be fixed directly through the flange to the face of the opening.

A glazing channel clip provides cover to hide the fixings.

The flange may be ripped smaller at the glazing channel rip line.

LOUVRETEC PRODUCT WARRANTY

slidetec
By Louvretec

SLIDETEC FRAMELESS GLASS SLIDING DOORS & PANELS

warranty details	All product installed by Louvretec (excluding glass*) or an Authorised Louvretec Installer, is from date of invoice, fully warranted for the first two years. This warranty covers workmanship, all componentry (except glass*) with all labour costs included.
product materials	All aluminium extrusions used in Louvretec's systems are manufactured in an IS09002 quality assured environment to AS1866 & AS3902 standards. Marine grade T316 stainless steel is used for drive axles, with stainless steel componentry fixings being standard. Plastic injected moulded componentry is all UV stabilised
powdercoat finishes	A wide range of exterior powder coat finishes are available. Duralloy or equivalent is the standard finish supplied unless stated otherwise and this carries a 10 year film and colour integrity warranty as per the Dulux Powder and Industrial Coatings Warranty. If your project has used the Duratec powdercoat range please refer to the Dulux Powder and Industrial Coatings Warranty wording.
anodised finishes	The current specifications re anodised aluminium range from 12-20-25 microns depth. The greater the microns the better the protection. With regular cleaning anosided material will retain its original integrity for no less than 10 years.
fully engineered	Our systems are designed to conform to New Zealand and Australian standards wind loadings. Full engineering details available on request.
cleaning	Periodic cleaning is essential to remove dirt, grime and accumulated salt deposits from both powder coated and anodised surfaces. Three steps for cleaning are: 1 Carefully remove any loose deposits with a wet sponge. 2 Use a soft non abrasive brush and a mild car cleaning detergent solution to remove dust, salt and other deposits. 3 Rinse off with clean fresh water. 4 Dry glass using a clean grit-free squeegee, cloth or paper towel
glass*	The glass chosen for your Slidetec system is fit for all purposes for which they are commonly supplied and are acceptable in appearance and finish to the standard referred to in AS/NZS 4667 and are safe and durable to the standard referred to in NZS 4223

OUTDOOR BLINDS

External screening options

Outdoor Blinds are a popular option when considering closing in a Louvretec Room or outdoor space.

Louvretec does not offer a proprietary 'Louvretec branded' Outdoor Blind. There are many excellent brands of Outdoor Blinds available, giving Louvretec Dealers a wide range of product options best suited to compliment a Louvretec installation. The best of both worlds.

Custom made

All Outdoor Blinds destined to fit within a Louvretec installation are individually site measured and custom made accordingly.

Many Louvretec Dealers carry mill finish stocks & manufacture the Outdoor Blinds themselves with others receiving kits from their local Outdoor Blind supplier.

LOUVRETEC ROOM (OPPOSITE PAGE) AS VIEWED FROM INSIDE

OPTIONS & FEATURES

- Outdoor Blinds provide great protection during every season, protecting from UV, wind, rain and dust.
- Outdoor Blinds are custom made to exact measures ensuring a perfect fit.
- Easy to operate, lightweight spring-loaded Outdoor Blinds are easy to push up or pull down. Let the blind go and it will stay in the chosen position.
- All Mesh Outdoor Blinds can be motorised. The same Louvretec remote control that operates your Opening Roof also operates your Outdoor Blinds.
- Most Outdoor Blinds incorporate a centrally mounted locking mechanism in the handle allowing the blinds to be locked when fully down.
- 'Ziptrack' style systems fit snug between the side frame and the skin. This provides a no rattle fit.
- Modern, heavy duty option Outdoor Blinds with mesh infills can now span up to 5.8m wide.
- Your Louvretec Dealer will advise how best to integrate the Outdoor Blind seamlessly into the Louvretec installation. Powder coat colour of your choice.

THE OUTDOOR BLIND INFILL OR SKIN:

MESH SHADE BLIND

A LARGE RANGE OF MESH DENSITY OPTIONS IS AVAILABLE

Mesh Outdoor Blinds

By far the majority of Outdoor Blinds in residential installations choose Mesh skins.

- There is an ever increasing range of superb fiberglass based skin options available.
- Choose from a wide range of colours. Warranties differ between manufacturers - enquire when ordering.
- Choose from a wide range of mesh density options providing up to 99% UV block and 96% wind block.
- Outdoor Blinds over 3500mm width (depending on wind zone) must have mesh skins.
- Mesh Outdoor Blinds can span up to and in some cases over 6000mm depending on wind zone.
- Only Mesh Outdoor Blinds can be motorised.

OR PVC

CLEAR PVC BLIND

PVC Outdoor Blinds

- Louvretec supplied PVC Outdoor Blinds carry a one year workmanship and product warranty - excluding the PVC skins.
- PVC skins provide for maximum views and rain protection, however due to the unstable nature of PVC there is no manufacturers warranty available for the PVC skin itself.
- PVC Blinds cannot be motorised.
- PVC Blinds can span up to a maximum of 3500m depending on wind zone.
- PVC Blinds can react adversely to both heat and cold. Please discuss further with your Louvretec Dealer.

©Louvretec 2025 – All Rights Reserved. Technical specifications subject to change without notice.

KEY OPTIONS & FEATURES AT A GLANCE

Moveable Walls:

- Outdoor Blinds are a perfect fit with a Louvretec Room.
- With an Opening or fully Retractale Roof overhead, vertically retractable walls further enhance the total indoor/outdoor experience.

Weather Protection when you need it:

- Sealed Mesh & Clear PVC outdoor blinds can be customed to provide the level of weather protection you require.
- Protect your space from wind, rain, glare and cold weather

Environmentally Friendly:

- Protection from heat and UV in summer
- Helping to close in and capture warmth in winter - enjoy outdoor living all year round.

Easy to Operate:

- Mesh blinds only can be motorized, as well as hand operable - simple individual or group control at the touch of a button.
- Clear PVC blinds are only offered as hand operable
- Hand operated push up / pull down is made easy with the use of an internally mounted spring balanced assist system.
- Lightweight and simple to use, the blind will stay firm in the designated position without rattling in the wind.

©Louvretec 2025 – All Rights Reserved. Technical specifications subject to change without notice.

KEY OPTIONS & FEATURES AT A GLANCE

Recommended Maximum Spans:

- The inclusion of extra heavy-duty bottom rails has enhanced achieveable spans.
- Mesh blinds up to 3500mm high can span up to, and in some cases over 5800mm depending on wind zones.
- Clear PVC blinds up to 3500mm high are recommended to span no more than 3500mm.
- Openings exceeding the above require either a fixed or removable mid-post.

Pelmets for Louvretec Blinds:

- Unless stated otherwise by your Louvretec Dealer full aluminium pelmets are standard for all Mesh blinds.
- A half pelmet only, protecting the outside of the roll is recommended for Clear PVC blinds.

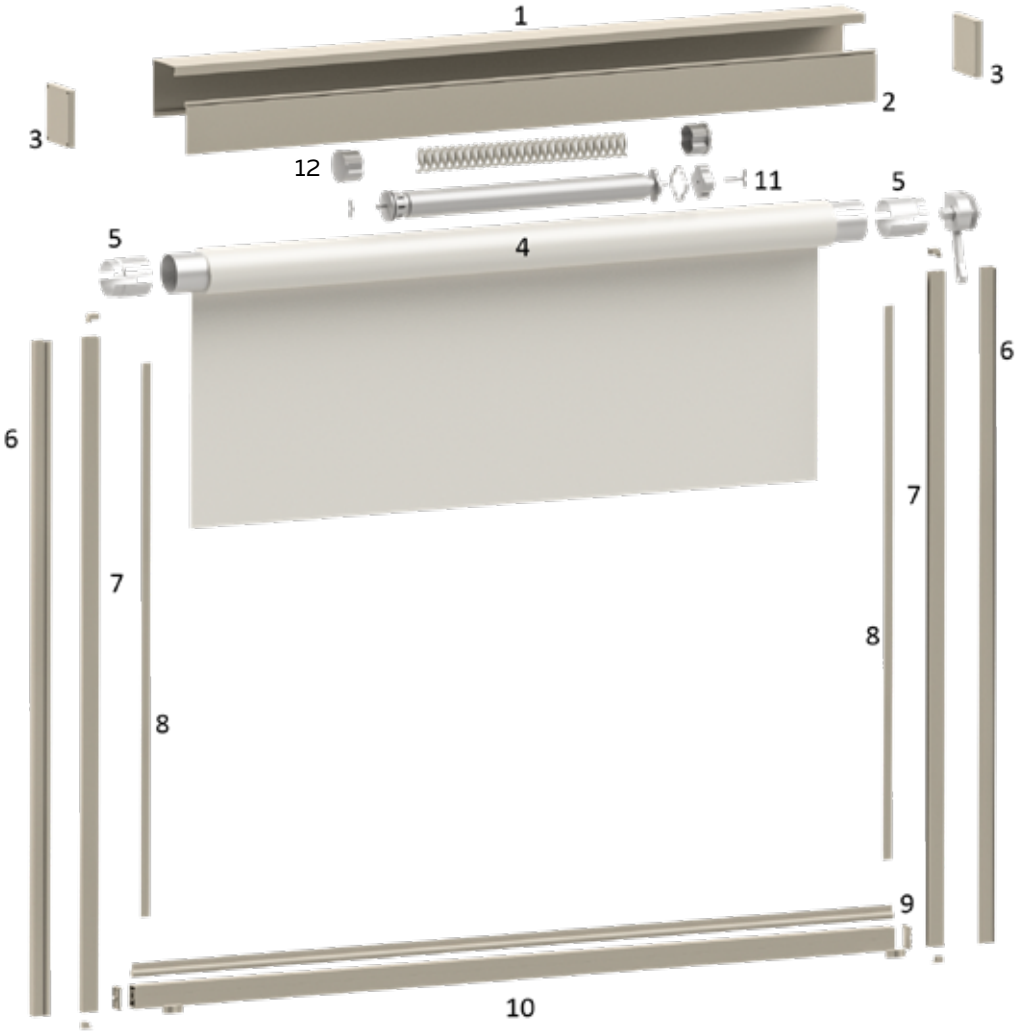

Colour Options:

- A full range of powder coat colours ensure the perfect match for stand-alone or Louvretec Room installations

Sunscreen Mesh:

- Is available in a wide range of colours and transparencies
- Up to 99% UV block
- Up to 96% wind block
- Allows airflow and reduces sun glare
- Easy to maintain, extremely durable and provides high degree of privacy during the day

LOUVRETEC PRODUCT WARRANTY

OUTDOOR BLINDS

outdoor blinds
By Louvretec

warranty details	All outdoor blinds installed by Louvretec , or an Authorised Louvretec Installer, is from date of invoice, fully warranted for the first year. Mesh blind skins are also covered by a five year manufacturer's warranty. Due to the unstable nature of PVC, there is no manufacturer's warranty available on the PVC skin itself. This warranty covers workmanship, and all componentry, motors, switches and electronics with all labour costs included. In addition, from year two to end of year five, a warranty replacement of parts only applies for all motors, switches and electronics. Labour costs excluded. (Excludes any wiring and electrical connections done by others).
motorisation	Louvretec exclusively uses Somfy motors. Somfy offers a 5 year warranty on all motors and electronics. Please contact your Louvretec Dealer or Somfy for a complete list of all terms and conditions.
product materials	All aluminium and extrusions used in Louvretec's systems are manufactured in an IS09002 quality assured environment to AS1866 & AS3902 standards. Marine grade T316 stainless steel is used for drive axles, with stainless steel componentry fixings being standard. Plastic injected moulded componentry is all UV stabilised.
powdercoat finishes	A wide range of exterior powder coat finishes are available. Duralloy or equivalent is the standard finish supplied unless stated otherwise and provides excellent resistance to weather and salt spray. This carries warranties of a maintainable service life of 25 years, film integrity of 10 years and colour integrity of 7 years.
anodised finishes	The current specifications re anodised aluminium range from 12-20-25 microns depth. The greater the microns the better the protection. With regular cleaning anosided material will retain its original integrity for no less than 10 years.
fully engineered	Our systems are designed to conform to New Zealand and Australian standards wind loadings. Full engineering details available on request.
cleaning	All blinds require regular cleaning and use to prolong their performance and to help prevent scratching and mould. A warm soapy water washdown is recommended using a car wash detergent. For the Louvretec Ziptrak system, the side guide channels and fabric in the side guide channel should be sprayed with a food grade silicone spray like CRC 808 every 3 months. To apply the lubricant, lower your blind all the way down and apply the silicone spray in the groove between the spline tape and the track, one on each side of the skin. Vuplex or Plexus sprays can be used to rejuvenate your clear PVC screen and reduce the accumulation of dust and other dirt.

LOUVRETEC PRODUCT WARRANTY

OUTDOOR BLINDS

outdoor blinds
By Louvretec

GENERAL INFORMATION AND MAINTENANCE

Louvretec Outdoor Blinds come with a wide range of options. These options determine both the aesthetics and functionality of the blinds. Please take a moment to familiarise yourself with the following:

options

There are two Outdoor Blind options, both with differing features and benefits: Mesh Blinds - for privacy & airflow. These Blinds are typically a composition pvc/polyester mesh, available in a range of colours with varying degrees of openness. PVC Blinds - for weather protection. PVC Blinds can be clear or tinted. Coloured PVC provides full privacy.

operating systems

Hand operated - Blinds are pulled down or pushed up by a spring assisted axle.
Manual Gearbox - Blinds are operated by a gearbox and crank handle.
Motorised - Blinds are operated by a Somfy Tubular motor fitted within the axle, with hand held remote controls as standard. Note - it is not recommended to motorise PVC blinds.

design choices & additional warranty info

- There is a wide range of Mesh fabrics and colours available
- PVC is available clear or tinted.
- Mesh fabrics vary with the percentage of openness and are best selected according to desired levels of privacy and wind protection.
- A full range of powdercoat colours are available for frame and headbox.
- Headboxes or pelmets are additional with Mesh blinds. They are not supplied with PVC blinds due to the potential, when retracted on hot days, to bunch and wrinkle around the axle.
- All Louvretec Outdoor Blinds carry a 1 year workmanship and installation warranty.
- Mesh blinds skins are also covered by a five year manufacturer's warranty.
- Due to the unstable nature of PVC there is no manufacturer's warranty available for the PVC skin itself.

general information

LOUVRETEC OUTDOOR BLINDS ARE COVERED BY A ONE YEAR WORKMANSHIP + INSTALLATION WARRANTY.

SPARE PARTS AND REPAIRS ARE AVAILABLE FROM YOUR LOUVRETEC DEALERSHIP.

ONLY LOUVRETEC APPROVED PARTS ARE TO BE USED.

- In windy conditions, (winds greater than 30km/h) your Outdoor Blinds should be fully retracted all the way up. Moving blinds in windy conditions can be difficult. Wait for a break in the wind, then move your blinds, pushing on the skin with your hand against the wind - in order to free it between the tracks.
- If you're going away, retract the blind up to the top position (fully retracted) to keep it safe in the event of bad weather.
- All blinds require regular cleaning and use to prolong their performance and to help prevent scratching and mould. Use warm soapy water & wash down using household grade mild detergent.
- For the Louvretec Ziptrack system, the fabric and side guide channels should be sprayed with a food grade silicone spray like CRC 808 every 3 months. To apply the lubricant, lower your blind all the way down, and apply the silicone spray in the groove between the spline tape and the track, on each side of the skin.
- For our Ziptrack system, manual hand operated blinds should be operated from the CENTRE of the bottom rail, for even rolling of the blind's skin on the top tube. Motorised blinds should be supervised while in motion.
- Sagging as a result of the blinds own weight will occur. This is not a fault in the system and is unavoidable.
- Once a week fully extend your blind to even out the fabric and let it breathe. Leave it down all day to let it retain its shape.

LOUVRETEC PRODUCT WARRANTY

OUTDOOR BLINDS

outdoor blinds
By Louvretec

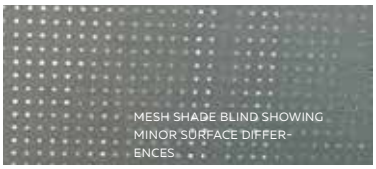

summary of standard maintenance required by owner

- Visually check the state of the fabric at least twice a year - in the spring before summer use and in the autumn before winter.
- Make sure the fabric is clean and that there is no mould caused by dust or other materials before the summer.
- Lubricate the moving parts with silicone lubricant every 3-6 months.
- Clean the fabric, if required, using a damp sponge or cloth soaked in warm water and mild car wash detergent. Allow fabric to dry before retracting.
- DO NOT use solvents, ammonia or hydrocarbons.
- DO NOT use alkaline products on PVC fabrics as they cause opaqueness and decrease transparency.

PVC Blinds

- PVC will expand and shrink depending on ambient temperatures. When warm, the PVC is soft and pliable. When cold the blind will tighten up and the PVC will be less pliable. This may affect the ease of movement of the screen.
- In hot weather, leave your blind down at night and operate it during the day to stop it burning on the tube.
- The PVC stiffness in cold weather is not a problem with a manually operated blind, but in a motorised blind, the weighted bottom rail cannot always overcome the PVC stiffness.
- Avoid rolling up your blind when it is wet. This will result in the clear PVC blind having a milky appearance (this should dissipate naturally when the screen is rolled down in warmer conditions and with sun-light), and accelerate the growth of mould or mildew on PVC blinds.
- VuPlex or Plexus Sprays can be used to rejuvenate your clear PVC screen and reduce the accumulation of dust and other dirt.
- Crumpling or wrinkling will occur with PVC blinds, this is very normal due to it's volatile nature.

Mesh Blinds

MESH SHADE BLIND SHOWING MINOR SURFACE DIFFERENCES

PVC BLINDS SHOWING SLIGHT CRUMPLING

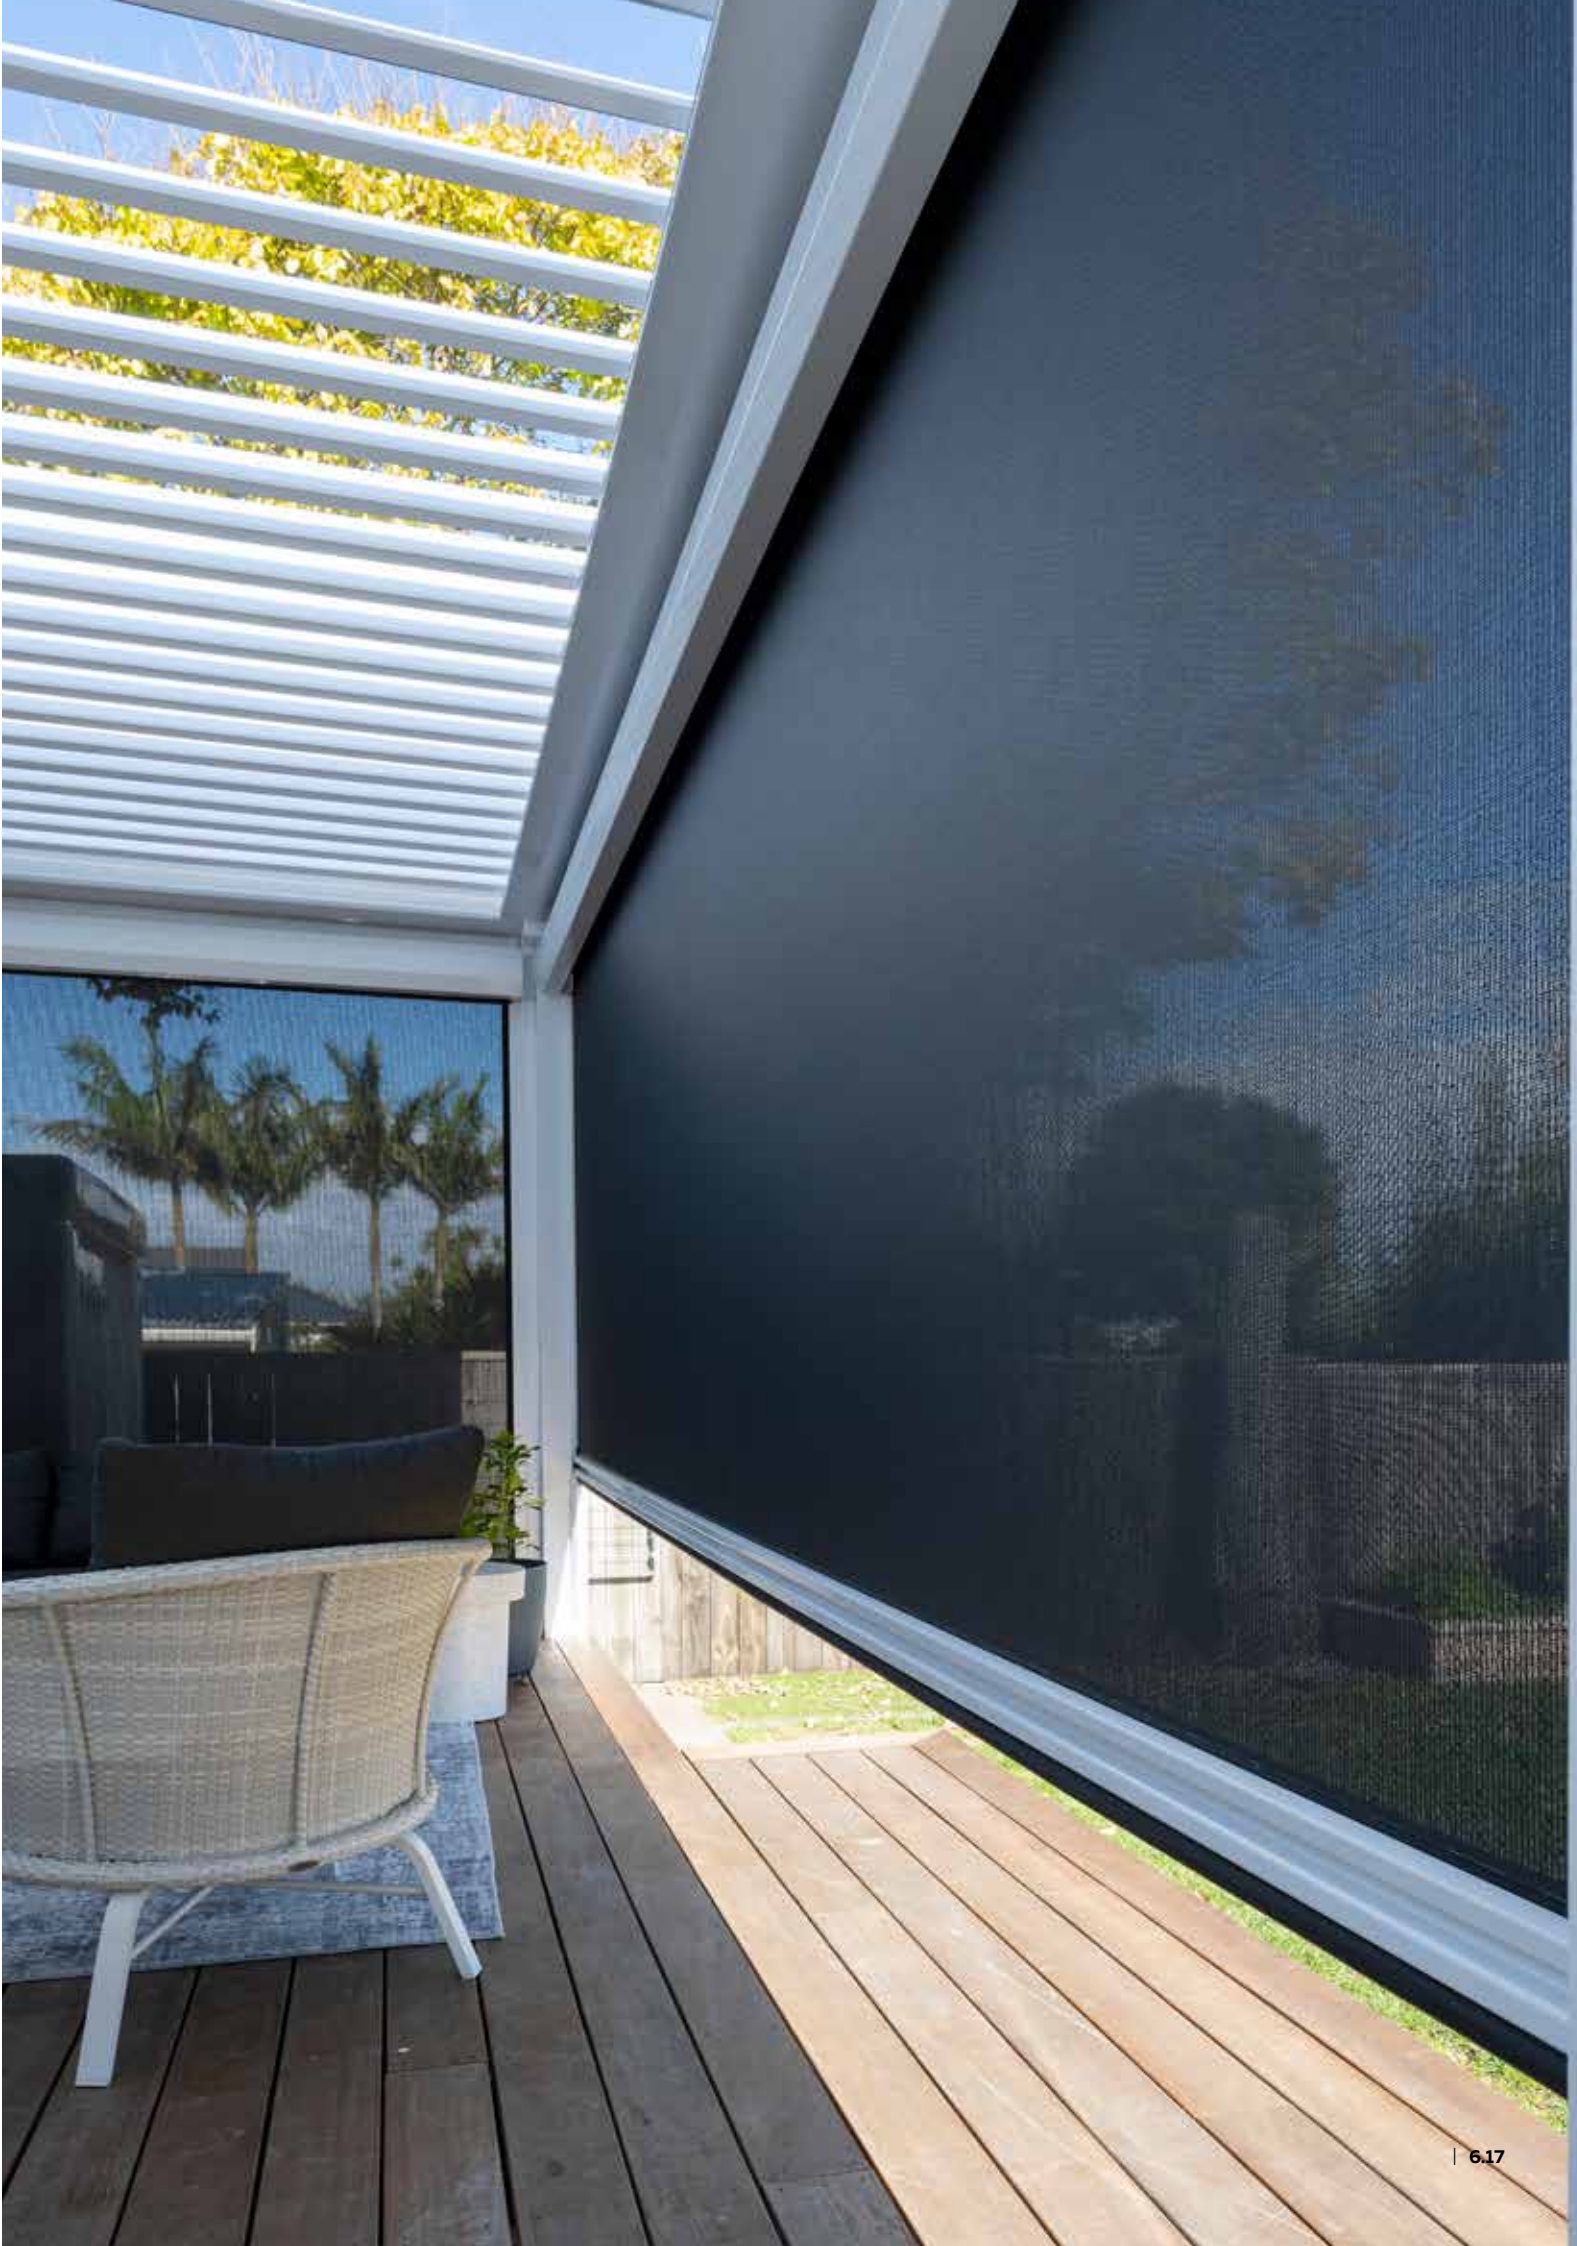

PVC BLINDS SHOWING SLIGHT CRUMPLING

- Mesh/Fabric materials as with other fabrics can occasionally have small knots, spots of colour, short cord breaks, irregular runs of thread or minor differences in the surface of uniformity or colour and are unavoidable.
- Lighter coloured fabrics will allow more light to pass through than darker coloured fabrics. This is a result of light being absorbed by the darker coloured fabrics.
- Fabric with a stripe or pattern may experience crumpling along the bands of colour. If there is a stripe or pattern on your fabric like the example below, specify to Louvretec how you want the pattern to run (vertical or horizontal) as there is an aesthetic consideration to this.
- Given the high level of pollutants in our atmosphere which lead to acid rain, if the blind is installed near to road, air ducts, forest trees with risk of dripping resin and leaves, and even though they are treated with anti-mould, if they are not frequently cleaned the fabrics can be attacked by micro organisms which make it impossible to clean after.
- Cobweb effect can form when the fabric is being made up, especially in light colours these creases become darker marks, however they do not affect the quality of the blind.
- Waves can form near to the sewing and side edges due to the double thickness of the fabric.
- If the blind is exposed to continuous strong winds, it may show signs of wear, fraying and abrasion.

The above are not product defects and are not covered by the warranty.

©Louvretec 2025 – All Rights Reserved. Technical specifications subject to change without notice.

1. LIGHTING TO INSIDE FACE OF GUTTER

2. LIGHTING TO FRONT FACE OF GUTTER

3. DOWNLIGHTS IN CONDUIT

Designed for lighting outdoor spaces:

Louvretec has developed the Light-tec custom range of premium lighting options, specifically to enhance a Louvretec Room, but equally as well suited for any Louvretec installation.

New technology:

- Light-tec is environmentally friendly, incorporating the very latest in silicon extrusion technology
- Dot-free, flexible, ultra-thin, ultra powerful and fully dimmable, the Light-tec range has been designed to seamlessly blend into the gutter and frame extrusion.

Three Light-tec options:

1. Continuous LED Pure Flow strip lighting to inside face of gutter

This popular option shines diffused light onto the underside of the louvre blade.

2. Continuous LED Neon strip lighting to front face of gutter

The ultra slim strip sits flush with the front face of the lighting clip providing seamless, continuous lighting to the inside of the Louvretec Room.

3. Underframe downlights

This option allows for lighting across the width of the Opening Roof or Outdoor Room.

All on 1 controller:

- One controller takes care of all motorisation, lighting and heating
- Set-up by your Louvretec Dealer, very little instruction is required - simply scroll through the screen display until the graphic showing your desired option appears.
- A simple two-button operation covers all functions.

NOTE: LIGHTING OPTIONS CAN VARY BETWEEN DEALERS AND COUNTRIES. DISCUSS SPECIFIC OPTIONS WITH YOUR LOCAL LOUVRETEC DEALER.

©Louvretec 2025 – All Rights Reserved. Technical specifications subject to change without notice.

1. LIGHTING TO INSIDE FACE OF GUTTER

Light-tec Gutter Lighting

Inside face gutter lighting is our most requested lighting option

Louvretec's new reversible strip gutter lighting extrusion provides a lighting option to the inside face of the gutter.

The continuous LED Pure Flow strip fits to the top inside face of the gutter, providing a warm diffused light shining directly onto the underside of the opening roof blades.

Available in Warm white, fully dimmable.

DOT FREE LINEAR FOR PERFECT COLOUR CONSISTENCY

FLEXIBLE WITH A WIDER LIGHTING AREA

INSIDE FACE LIGHT-TEC GUTTER LIGHTING

2. LIGHTING TO FRONT FACE OF GUTTER

Light-tec Gutter Lighting

Continuous LED Neon Strip lighting is now available fixed to the front face of the gutter.

Featuring ultra-slim uniform dot free lighting, incorporating the latest in advanced silicone technology and high weather resistance.

This option provides direct illumination into the Opening Roof or Louvretec Room, with mitre cut light corners blending seamlessly.

Available in Warm white, fully dimmable

FRONT FACE LIGHT-TEC GUTTER LIGHTING

ADVANCED PROCESS SILICONE EXTRUSION DOT-FREE TECHNOLOGY

SUPER FLEXIBLE WITH ULTRA SLIM SIZE

LOUVRETEC HEATING

BROMIC HEATING - supplied by Louvretec

Sleek, Seamless, Modern. Introducing the Bromic range of Outdoor Heaters. Make the most of your outdoor spaces all year long.

Designed for heating outdoor spaces

- Most Louvretec Dealers offer a suitable outdoor heater option. This can vary between Dealers.
- Louvretec recommends and distributes throughout NZ the Bromic range of Outdoor Heaters
- Manufactured in Italy, Bromic Heaters are also available throughout our Australian Dealer network
- They are a stylish, effective and functional addition to a Louvretec Outdoor Room.

Bromic Heaters

- Award winning design made of high quality stainless steel
- Superior technology allowing the heater to spread radiant heat evenly across a large area creating ideal comfort
- With a wide range of sizes available, find the ideal heater to suit your outdoor space
- Black and white colours available
- With a wide array of mounting options, Bromic offers solutions to compliment any decor and provide functionality for ambiance and comfort.

Bromic's free complimentary design service

- Bromic offers a full design service, covering floor plans, layout and environment, heater selection and installation requirements.
- Contact your Louvretec Dealer for further information.

Up to two heaters can operate via Louvretec's hand held controller or wall mounted wireless remote switches.

BROMIC HEATING

PLATINUM SMART-HEAT ELECTRIC

- Available in black and white, Platinum Smart Heat Electric heaters are an ideal option to consider when heating under a Louvretec Opening Roof or full Louvretec outdoor room.
- These slim-line stainless steel units spread warmth and comfort evenly, and are installed to blend seamlessly into the background.

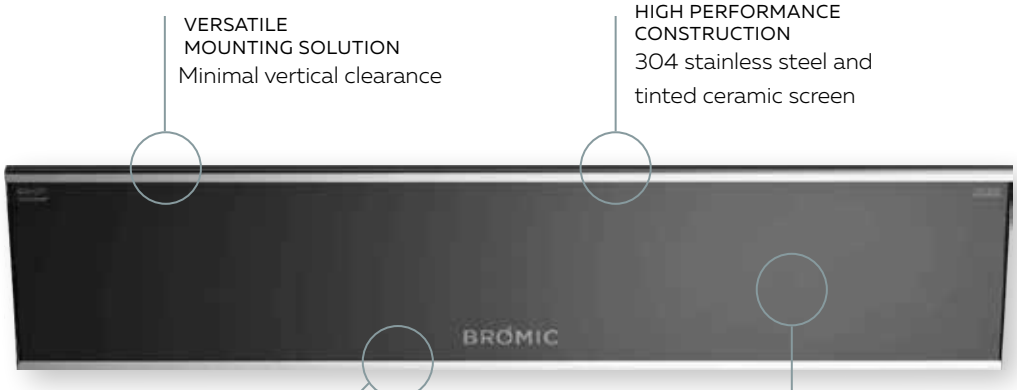

2300W; 3400W & 4500W SERIES WHITE

2300W; 3400W & 4500W SERIES BLACK

PLATINUM SMART-HEAT™ ELECTRIC

VERSATILE MOUNTING SOLUTION
Minimal vertical clearance

HIGH PERFORMANCE CONSTRUCTION
304 stainless steel and tinted ceramic screen

CLEAN, COMPACT AND ELEGANT DESIGN
For seamless integration

ADJUSTABLE MOUNTING BRACKETS
Allows for directional heat distribution

COMPATIBLE WITH SMART-WIRELESS TECHNOLOGY

©Louvretec 2025 – All Rights Reserved. Technical specifications subject to change without notice.

PLATINUM SMART-HEAT™ ELECTRIC MARINE

PLATINUM SMART-HEAT ELECTRIC MARINE

· Made in high-quality AIS316-grade stainless steel, Platinum Smart-Heat Marine heaters provide superior resistance in marine or coastal environments.

· Available in black or white finish this exceptional heater is backed by an industry leading 5-year warranty.

2300W; 3400W & 4500W SERIES WHITE

2300W; 3400W & 4500W SERIES BLACK

VERSATILE MOUNTING SOLUTION
Ability to wall-mount, ceiling-mount, or recess using either the Standard or Low Clearance Recess Kit

HIGH PERFORMANCE STAINLESS-STEEL CONSTRUCTION
Premium 316 grade stainless steel suitable for marine and coastal environment

CLEAN, COMPACT AND ELEGANT DESIGN
Minimized light emissions and easy to clean in a black or white finish

DURABILITY YOU CAN TRUST
Backed by an industry-leading 5-year warranty

SEALED ELEMENT
Sealed compartment with thin film elements to prevent corrosion

COMPATIBLE WITH SMART-WIRELESS TECHNOLOGY

©Louvretec 2025 – All Rights Reserved. Technical specifications subject to change without notice.

BROMIC HEATING

PLATINUM SMART-HEAT ELECTRIC MARINE

Why Platinum Marine

· To counteract the hurdles of installing an outdoor heater near the coast where standard stainless steel can "tea-stain"and deteriorate, Bromic engineered the Platinum Electric Marine grade heater series.

AISI 316 Marine-Grade Stainless Steel

· Built to withstand corrosive environments with high grade materials and a fully enclosed heater body to protect internal elements.

Industry-Leading 5-Year Warranty

· Offering peace of mind that the heater is built to last

Versatile Mounting Options

· Wall, ceiling and recessed mounting options

Convenient Control Options

· The controller that operates your Louvretec Opening or Retracting Roof also operates your heater

WHAT ARE CORROSIVE ELEMENTS

The high level of relative humidity in coastal areas can add to the deterioration of metals, accelerating the electrochemical reactions that cause rusting and other forms of corrosion.

Some of the major threats include those made primarily of sodium chloride such as salt spray from breaking waves and onshore winds, or other atmospheric pollutants like sulfur dioxide within fog, mist and dew.

©Louvretec 2025 – All Rights Reserved. Technical specifications subject to change without notice.

ECLIPSE SMART-HEAT™ ELECTRIC

ECLIPSE SMART-HEAT ELECTRIC

· Dim the lights and turn up the heat with the new Eclipse Smart-Heat Electric heater

· Ideal for mid-beam mounting, the Eclipse series adds style, warmth and light to your Louvretec Outdoor space.

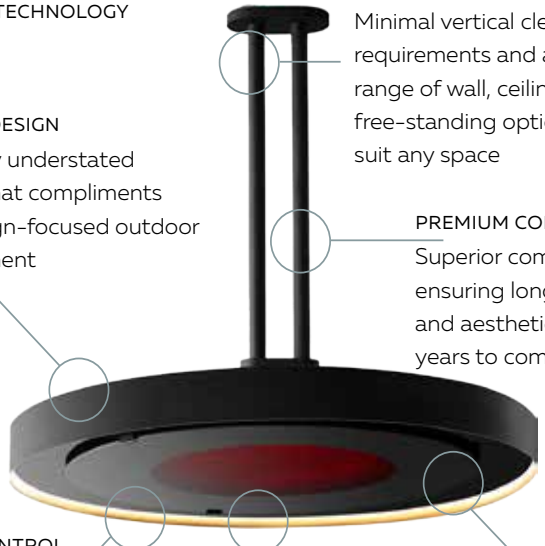

3000W ECLIPSE SERIES BLACK

COMPATIBLE WITH SMART-WIRELESS TECHNOLOGY

FLEXIBLE MOUNTING OPTIONS
Minimal vertical clearance requirements and a wide range of wall, ceiling and free-standing options to suit any space

UNIQUE DESIGN
Elegantly understated design that compliments any design-focused outdoor environment

PREMIUM CONSTRUCTION
Superior components ensuring longevity of use and aesthetic appeal for years to come

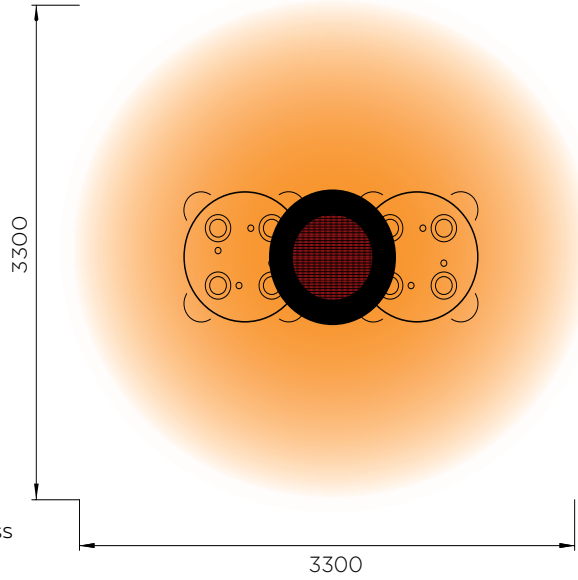

PRECISE CONTROL
Accurately adjust the heat output 0/30/60/100 % for complete control over the level of comfort

DIMMABLE LIGHT
Complete flexibililty over lecel of brightness for the right amount of ambience

CERAMIC SCREEN
Spreads heat evenly across any area while minimising light emissions from the heating element

HEAT AREAS

3000W SERIES
HEATING APPROXIMATELY 11M2. 3000W HEATING POWER

BROMIC HEATING

PLATINUM SMART-HEAT & PLATINUM SMART-HEAT ELECTRIC MARINE

Extend the outdoor experience:
A well designed outdoor heating solution will extend the year-round use of your Louvretec outdoor space by adding warmth and comfort. The use of outdoor heaters are a great aid in keeping your outdoor space usable all year long. Bromic heaters supplied by Louvretec will maximise the use in both residential and commercial outdoor spaces

Understanding the challenges:
· An outdoor area is not a confined space - forced air systems are not effective in controlling ambient air temperature.
· In an outdoor environment hot air rises and quickly dissipates.
· A breeze diminishes the effect of a forced air system, making it unsuitable to use effectively for outdoor spaces.

The solution:
· The only way to heat an outdoor area is through radiant heat.
· Radiant heat warms objects, not in air in the way similar to the sun warming your skin.
· Radiant heaters are wind resistant and can still warm people even in mild wind conditions.
· This method involves projecting radiant heat onto people rather than moving warm air into the outdoor space
· Radiant heating is the foundation for all Bromic heaters - heating outdoor spaces effectively.

©Louvretec 2025 – All Rights Reserved. Technical specifications subject to change without notice.

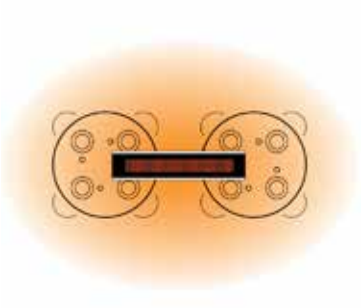

CHOOSE WHICH HEATER FOR YOUR APPLICATION:

Note: An outdoor area is defined as being at least 30% open (front, back, wall or sides.)

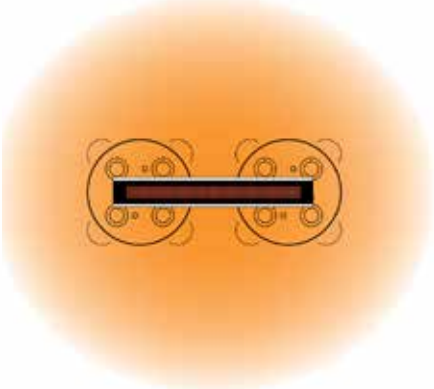

If these areas under an Opening Roof are closed in with Shutters, Outdoor Blinds or Slidetec Frameless Sliding Glass Panels, then more heat will be captured, creating a convectional heating affect.

TYPICAL HEATER OUTPUT:

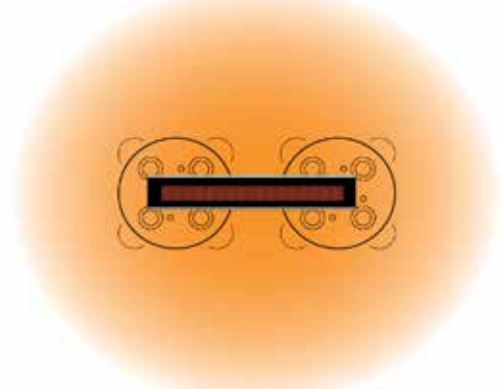

2300W Series
Heating approximately 6m2

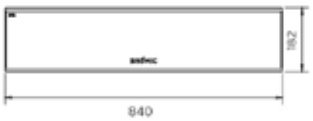

3400W Series
Heating approximately 10m2

4500W Series
Heating approximately 13m2

2300W Dimensions:

3400W Dimensions:

4500W Dimensions:

CONTROLLER AND ACCESSORIES: REMOTE OPTIONS

Hand Held
Remote Control

Wall Mounted
1 Heater
Remote Control

Wall Mounted
2 Heater
Remote Control

STANDARD

On/Off Controller operates up to two heaters, with individual controls for each heater

Features:
Individual control of each heater
Controls both 2400W and 3000W heaters
Dimensions 145w x 210h x 80d
Must be installed in a dry, shaded area eg under an eave

DIMMER OPTION

A Dimmer Controller is available. This controls both heaters at the same time (ie, there is no individual control of each heater).

Features:
Dimmer function
Controls both heaters at the same time (ie no individual control)
Controls both 2300W and 3000W heaters
Dimmer dimensions 200w x 230h x 80d
Must be installed in a dry, shaded, well ventilated area
Must be installed upright ie heat sink at the top

FOR WIRING DETAILS
REFER TO SECTION 14

©Louvretec 2025 – All Rights Reserved. Technical specifications subject to change without notice.

MOUNTING OPTIONS:

· How your heater is mounted is as critical to the aesthetic design as it is to the functional output of the heater.

· Typically under a Louvretec Opening Roof the heater will be mounted to the underside of a structural beam.

· Where appropriate, the heater can also be mounted to the wall of the structure to which the Opening Roof is attached.

· Louvretec has custom brackets that also include a wiring conduit for under-beam mounting.

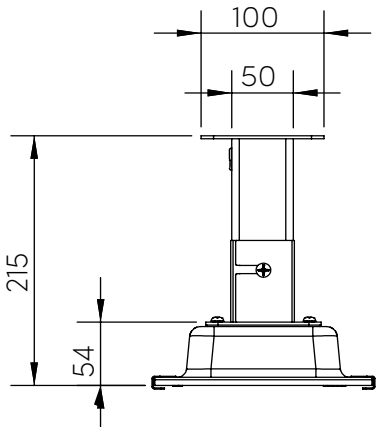

· Discuss with Louvretec which option is best suited for your installation.

· Discuss with Louvretec and your electrician the electrical feed requirements.

The Louvretec range of products:

All Louvretec branded products are designed and engineered in Australia & New Zealand by Louvretec to comply with relevant AS/NZS standards - refer to full Louvretec Engineering data Design Manual 2025 Section 13.

Louvretec has the most extensive range of outdoor sun shading/ outdoor living products available in Australasia, backed by a comprehensive network of Louvretec Dealers.

Most Louvretec products sold in Australia are made in Australia*

Most Louvretec products sold in New Zealand are made in New Zealand*

*Some specialised products may only be made in Australia or in NZ and are shipped between each country.

The Authorised Louvretec Dealer Network:

Your Louvretec product will have been supplied and installed by your local Authorised Louvretec Dealer. All Louvretec Dealerships are privately owned, and the same Louvretec Dealer who supplied your Louvretec will also service your Louvretec.

Your Louvretec product has been "Engineered for Life" and we are committed to ensuring that happens.

Louvrecare:

Preventative maintenance and valet. Regular scheduled servicing by a Louvrecare team has real benefits. Louvrecare can vary between Dealerships - consult your local Louvretec Dealer.

THE LOUVRETEC ROOM

"The heart of the home"

In modern architecture today everything has a flow to the oustide.....

Which is wonderful, however the outside is always changing and isn't always that hospitable.

A Louvretec Room genuinely gives you options to make the most out of whatever is going on outside all year round.

Roofs and walls can be opened, closed, retracted.....

Walls can be glass, mesh, louvres in many configurations - all of which can slide or raise should you so wish.

Lighting and heating can be added - all operable from a single hand held wireless remote controller

Be creative, have some fun, look and consider how this would work at your place.

5 BASIC STEPS

1. Decks: You will need a deck

2. Structural Frame: Add custom Louvretec engineered beams and posts

3. Opening Roof: Now you can choose between Opening only or fully Retractable

4. Infill options: Choose from Slidetec Frameless Glass, Outdoor Blinds or Louvred Shutters

5. The finishing touches: Add Lighting or Heating to suit

Please turn over for an easy-to-follow step x step guide.

STEP 1 DECKING

Most Louvretec Dealers don't do decks (so make sure you check this first with your local Louvretec Dealer) - this is the only part of the five steps not undertaken by Louvretec. You may have an existing deck, or the deck may be part of your new home build.

Decks are typically timber or composite such as eco-deck or concrete with tiled finish. Deck construction is critical as it forms the foundation to support your Louvretec Room structure. For decks under construction, discuss layout and fixing options with Louvretec.

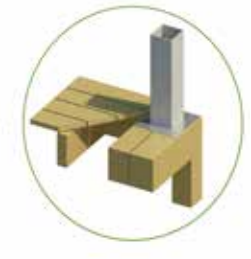

TIMBER DECKING

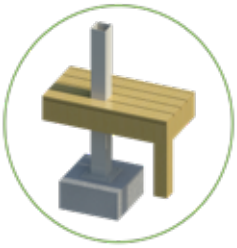

Make sure your deck complies with council requirements.

On existing decks additional structural support may be required. Posts can sit outside of deck or within deck structure with decking cut around post.

If the structural posts are fitting directly to the deck ensure there is adequate solid timber fixing at post connection points. Alternatively extend the posts to ground level and fix to a suitably engineered concrete pad.

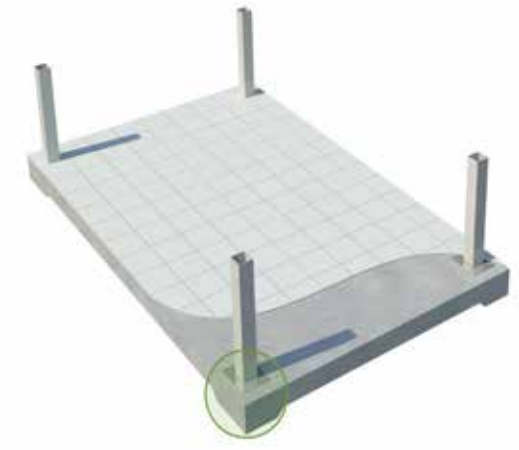

POSTS SITTING DIRECTLY ON TO DECK

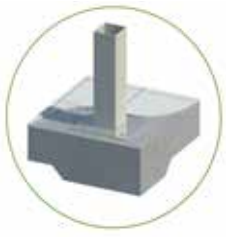

POSTS PROJECTED THROUGH DECK ON TO CONCRETE PAD

CONCRETE DECKING

A typical 100mm concreted reinforced patio requires a concrete foundation under the post fixing points. Tiles or decorative surfaces can be laid to cover the base plate.

FIXING TO CONCRETE

louvretec structural
Frames | Posts | Connections

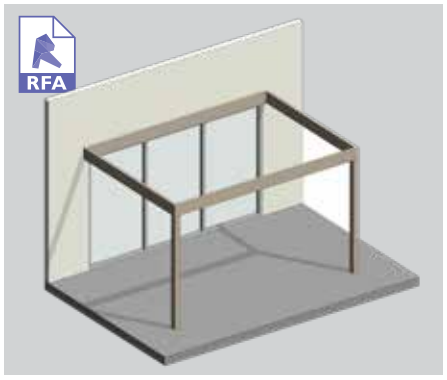

STEP 2 THE LOUVRETEC STRUCTURAL FRAME

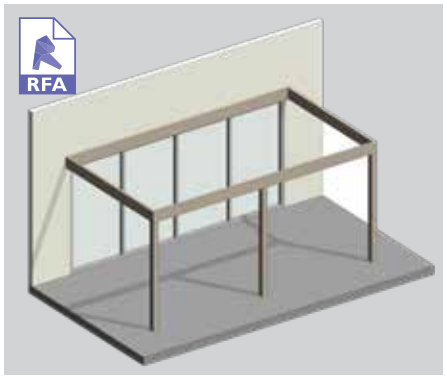

- Louvretec offers a fully engineered structural aluminium frame system specifically designed for Outdoor Rooms.
- Beams & posts are custom designed to be structurally compliant to the specific wind zone.
- Louvretec structural frames provide for clean aesthetically pleasing lines and with regular cleaning, are virtually maintenance free. They are also designed to incorporate wall in-fills such as outdoor blinds, frameless sliding glass doors as well as a range of louvre panel infills.

STEP 3 1 OF 2 OPENING ROOF OPTION

Opening Roof

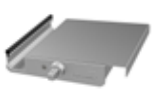

We have a range of six different Opening Roofs to choose from. Offering a range of design styles, blade sizes and even a Translucent choice. Factors such as wind zones, and blade spans must be considered, with bigger spans and higher wind speeds requiring heavy duty blades.

Refer to Section 13 for Engineering Reports covering not only choice of blade but also structural frame and post sizes. A visit to your nearest Louvretec showroom is strongly recommended to see the actual range of options before deciding

outdoor blinds
By Louvretec

STEP 4 2 OF 3 OUTDOOR BLINDS

Outdoor Blinds

Outdoor Blinds are a popular option when considering closing in a wall of a Louvretec Room.

Outdoor Blinds provide great protection during every season, protecting from UV, wind, rain and dust.

Easy to operate, either pull down/push up, or motorised, speak to your local Louvretec Dealer regarding the best custom-made option for your installation.

sun louvres
By Louvretec

STEP 4 3 OF 3 LOUVRE SHUTTERS

Louvre Shutters

Louvretec has a wide range of Operable and Fixed Shutters available, ideally suited for closing in Outdoor Room walls.

There is a range of Airfoil and Rectangular shaped louvre blades, ranging from 90mm to 150mm that fit within Fixed panels, Sliding or Bi-Folding panels.

Larger Fixed, Hand Operated or Motorised louvres ranging from 120mm to 200mm can also be incorporated into half or full walls providing aesthetically pleasing fit for purpose design options.

REFER SECTIONS 10 & 12 FOR FULL DETAILS

CHOOSE FROM A RANGE OF SLIDING / BIFOLDING LOUVRED DOORS OR WINDOWS

STEP 5 1 OF 2 LIGHTING

Lighting

Louvretec has developed the Light-tec custom range of premium lighting options, specifically to enhance a Louvretec Room, but equally as well suited for any Louvretec installation. Choose from three Light-tec options:

1. Continuous LED Pure Flow strip lighting to inside face of gutter. This popular option shines diffused light to the underside of the louvre blade.

2. Continuous LED Neon strip lighting to the front face of gutter. The ultra slim strip sits flush with the front face of the lighting clip providing seamless, continuous lighting to the inside of the Louvretec Room.

3. Underframe downlights

Discuss options that can be custom fitted to your Outdoor Room with your Louvretec Dealer.

LOUVRETEC PRODUCT WARRANTY

OPENING ROOFS - SUN LOUVRES - SHUTTERS

warranty details	All product installed by Louvretec (excluding Outoor Blinds - please refer separate warranty for this) , or an Authorised Louvretec Installer, is from date of invoice, fully warranted for the first two years. This warranty covers workmanship, louvres and all componentry, motors, switches and electronics with all labour costs included. In addition, from year two to end of year five, a warranty replacement of parts only applies for all motors, switches and electronics. Labour costs excluded. (Excludes any wiring and electrical connections done by others).
motorisation	Louvretec exclusively uses Somfy motors, switches and electronics. Somfy offers a 5-year warranty on all motors and electronics. Please contact Louvretec NZ or Somfy for a complete list of all terms and conditions.
product materials	All aluminium louvres and extrusions used in Louvretec's systems are manufactured in an ISO9002 quality assured environment to AS1866 & AS3902 standards. Marine grade T316 stainless steel is used for drive axles, with stainless steel componentry fixings being standard. Plastic injected moulded componentry is all UV stabilised
powdercoat finishes	A wide range of exterior powder coat finishes are available. Duralloy or equivalent is the standard finish supplied unless stated otherwise and this carries a 10 year film and colour integrity warranty as per the Dulux Powder and Industrial Coatings Warranty. If your project has used the Duratec powdercoat range please refer to the Dulux Powder and Industrial Coatings Warranty wording.
anodised finishes	The current specifications re anodised aluminium range from 12-20-25 microns depth. The greater the microns the better the protection. With regular cleaning anosided material will retain its original integrity for no less than 10 years.
fully engineered	Our louvre systems are designed to conform to New Zealand and Australian standards wind loadings. Full engineering details available on request.
cleaning	Periodic cleaning is essential to remove dirt, grime and accumulated salt deposits from both powder coated and anodised surfaces. Three steps for cleaning are: 1 Carefully remove any loose deposits with a wet sponge. 2 Use a soft non abrasive brush and a mild car cleaning detergent solution to remove dust, salt and other deposits. 3 Rinse off with clean fresh water.

STYLE & SUN CONTROL

OUTDOOR LIVING YEAR ROUND

LOUVRE CHIMNEY SURROUND, FIXED LOUVRE PANELS & COASTAL SHUTTERS FOR PRIVACY, STYLE & WEATHER PROTECTION

SUN LOURES OVERVIEW

Style with function

Sun Louvres form our most varied and versatile product range.

Many options

All Louvretec Sun Louvre systems have been beautifully designed to provide an unparalleled degree of choice. Their uses are many and varied including;

- sun protection
- shelter
- privacy control
- style giving a dramatic effect
- for both Residential & Commercial projects

Available in an Airfoil or Rectangular shape with functionality choices

Due to the range of louvre blade sizes, three different types of motorisation or hand operable systems are available:

1. **KISS Pivot system (Hand operable)** - Blades: 90mm to 150mm
   Section 10.1
2. **Spiral Pivot system (Motorised)** - Blades: 120mm to 200mm
   Section 10.2
3. **Maxi-Drive system (Motorised)** - Blade: 300mm
   Section 10.3

Additionally, all Louvretec louvres can be:

4. **End Fixed** - Blades: All
   Section 10.4
5. **Bracket Fixed** - Blades: All
   Section 10.5

Plus, for a Retractable Louvre option refer to:

Retract Sun Louvre system - At time of printing this product is under design & development. See Section 11 & contact your local Louvretec Dealer for more info.

All options are fully engineered and certified for Residential and Commercial use.

Need more Sun Louvre systems/applications info?

For specific information regarding louvre blade & application/system choice, please refer to one of the five Sun Louvre applications (listed above) in Sun Louvres Sections 10.1 to 10.5 of this Design Manual.

KISS PIVOT - 95MM BELLA VISTA RECTANGULAR LOUVRE PANEL

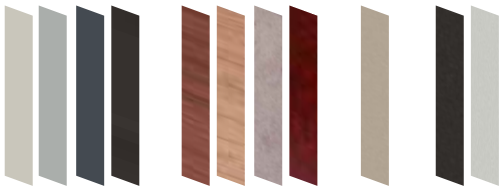

KISS PIVOT LOUVRES IN SLIDING PANEL

Ease of Operation

- The KISS Pivot system is elegant and simple, tried and true and well proven in the market place.
- An easy to operate, well proven Sun Louvre pivot system.
- Operates off double drive-arms that can be locked closed or in various open positions.
- Offers fully adjustable louvres at little more than fixed louvre prices.
- Ideal as a stand-alone panel or used within Sliding, Bifolding and Hinged doors.
- KISS Pivot louvres allow for greater versatility and design options when considering hand adjustable louvres.
- A flush fitting stainless steel Slidelock provides locking points at fully closed, 45°, 90° and 135°
- Each blade has a woolpile closing strip to ensure snug rattle free closing.
- Functional, reliable operable louvre design.

SURFACE FINISHING OPTIONS

A wide range of options are available.

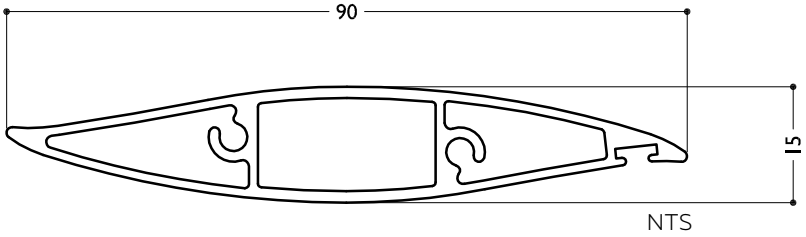

©Louvretec 2025 – All Rights Reserved. Technical specifications subject to change without notice.

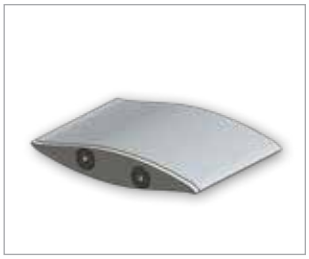

HAND OPERABLE KISS PIVOT LOUVRES

Compatible Louvres: 90 Airfoil, 150 Midi

90MM MIDI LOUVRE

Small to medium size

90MM AIRFOIL LOUVRE

The 90mm Midi Louvre is similar to the 'wave' shape of the 150mm blade & is a perfect mix of compact width with good spans. This blade can be hand operated using the KISS Pivot system. The blades can be locked closed or in a number of opening positions. A woolpile closing insert ensures a snug fit when closed.

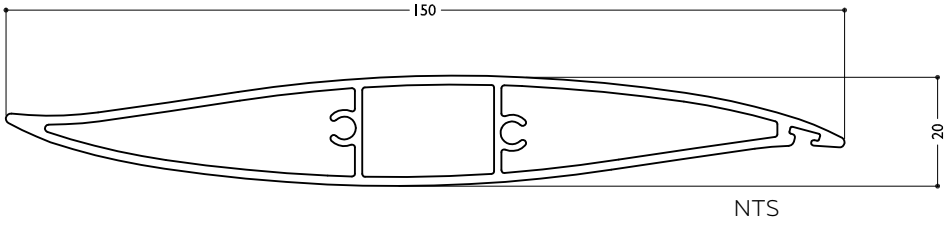

The 90mm Midi Louvre is well suited fixed within an opening or within sliding, bi-folding or hinged doors.

Also available end and bracket fixed.

REFER TECHNICAL DETAILS PAGE 10.1.06

150MM MIDI LOUVRE

Wave shaped blade

150MM AIRFOIL LOUVRE

The 150mm Midi is the largest of the 'wave' shape group of louvres.

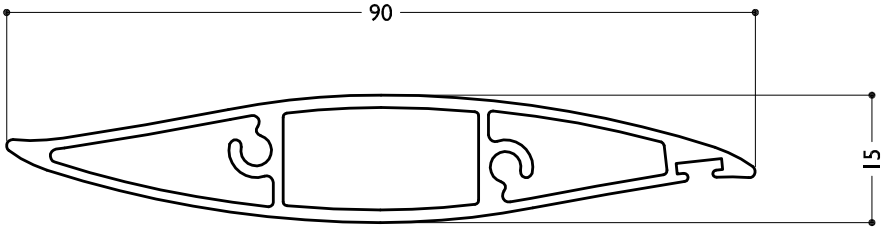

The wider blade spans well and is ideal for closing off decks and verandah spaces. This versatile louvre is available in both Spiral (motorised and hand operable) and KISS (hand adjustable) Pivot systems. KISS Pivot louvres are hand operated and can be locked closed in various opened positions.

A woolpile closing insert ensures a snug fit when closed. This blade is well suited fixed within an opening or within sliding, bifolding or hinged doors. Also available end and bracket fixed.

HAND OPERABLE KISS PIVOT LOUVRES

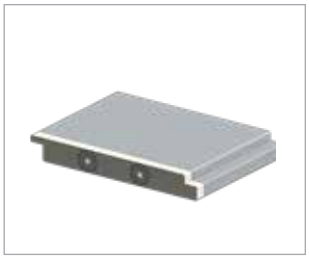

Compatible Louvres: 95 Bella Vista, 95 Bella Vista Heavy

95MM BELLA VISTA

Rectangular option for infills

95MM BELLA VISTA

The Bella Vista family of two louvre blades is available in standard or heavy versions and offers a rectangular option to the 90mm KISS Midi Louvre.

Available as a hand operated KISS Pivot system and offering the advantages of fully adjustable louvres at little more than fixed louvre prices.

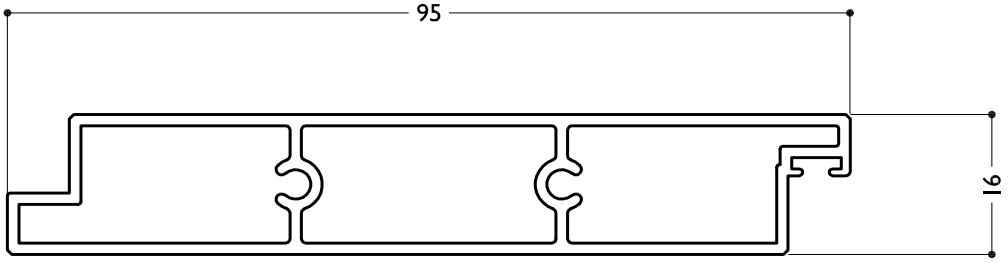

The rectangular blades close onto a woolpile strip and sit flush when closed giving a pleasing contrast to traditional shaped louvres. Particularly well suited to hinged or sliding shutters.

Also available end fixed.

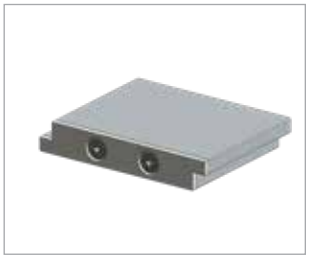

REFER TECHNICAL DETAILS PAGE 10.1.10

95MM BELLA VISTA HEAVY

Ideal for exposed locations

95MM BELLA VISTA HEAVY

The Bella Vista family of two louvre blades is available in standard or heavy versions and offers a rectangular option to the 90mm KISS Midi Louvre.

Bella Vista Heavy is a hand operated KISS Pivot system and shares all the characteristics of the 95mm Bella Vista.

Designed to incorporate increased spanning capability this blade out performs all other louvres in its class and is particularly well suited to exposed locations.

DRIVE SYSTEM: SPIRAL PIVOT

Motorised and Hand Operable Sun Louvre Panels

The Spiral Pivot operating system is as well suited for motorising Sun Louvre panels as it is for motorising Opening Roofs.

HAND ADJUSTABLE, OVERHEAD SUN LOUVRES FITTING WITHIN AN OPENING

The Spiral Pivot System

Louvretec's award winning Spiral Pivot system operates 17 different styles and shapes of louvres.

Engineered to include:

- Marine grade 12.7mm SS hex drive shaft
- Self-lubricating drive and pivot bearings
- Notched angle double fixed blade retention
- Powered by Somfy motors & controls

Everything is hidden from sight & protected from the weather. There are no unsightly drive arms or external motors on show.

Reliability

2025 sees over one million individual louvre blades worldwide pivoting with the Louvretec Spiral Drive system. Numbers that speak volumes regarding style, reliability & being totally fit for purpose.

MOTORISED & HAND OPERABLE SPIRAL PIVOT SUN LOUVRE PANELS

Installation options :

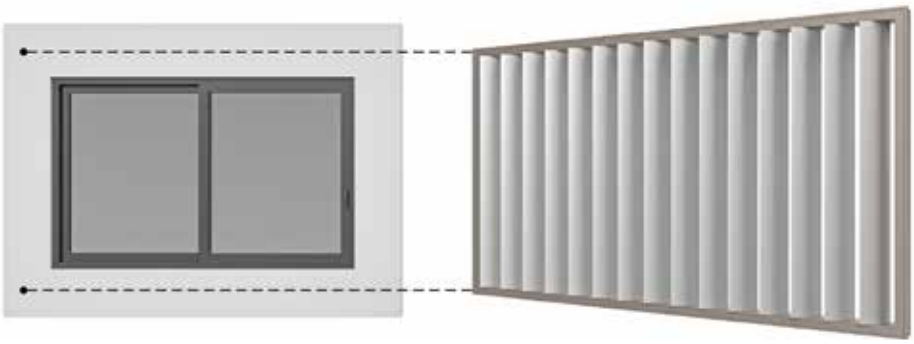

OVERHEAD FITTING INTO AN EXISTING OPENING

Sun Louvre panel may have Drive and Pivot Frames only or may have Frame to Four Sides. Motor may be located on top in motor cover, or down under.

VERTICAL FITTING INTO AN EXISTING OPENING

Sun Louvre panel may have Drive and Pivot Frames only or may have Frames to Four Sides. Motor located down under.

VERTICAL REQUIRING A STRUCTURAL SUB-FRAME

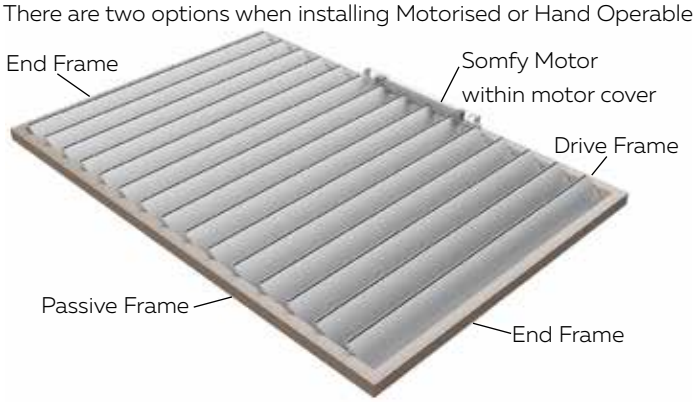

Sun Louvre panel includes Elam-Street Structural Frame to Four Sides. Motor located down under.

©Louvretec 2025 – All Rights Reserved. Technical specifications subject to change without notice.

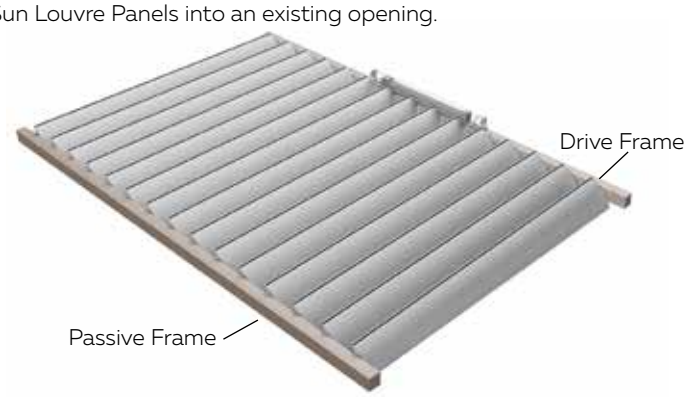

OVERHEAD SUN LOUVRES FITTING IN TO AN EXISTING OPENING

Two Frame Options

There are two options when installing Motorised or Hand Operable Sun Louvre Panels into an existing opening.

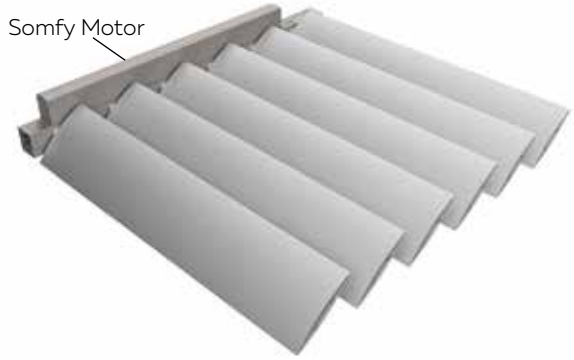

1. FRAME TO FOUR SIDES - WRAP AROUND
Drive and Pivot sides are connected with Passive End Frames.

2. TWO SIDED DRIVE & PASSIVE FRAME
Frame is Two Sided only with Drive and Passive sides.

Motorised: Two Options for Motor Location

1. MOTOR ON TOP - LOCATED WITHIN A MOTOR COVER

2. MOTOR DOWN-UNDER - LOCATED WITHIN A DOWN-UNDER FRAME

Hand Operable Option

VERTICAL SPIRAL PIVOT SUN LOUVRE PANELS

Installation: Blades can be installed vertically or horizontally

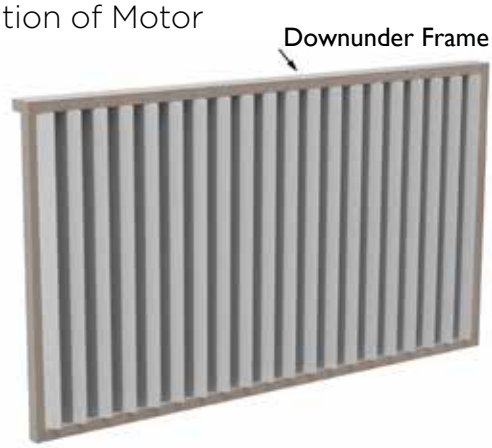

1. VERTICAL MOTORISED LOUVRE PANEL WITH BLADES RUNNING VERTICALLY, FITTING INTO AN EXISTING OPENING

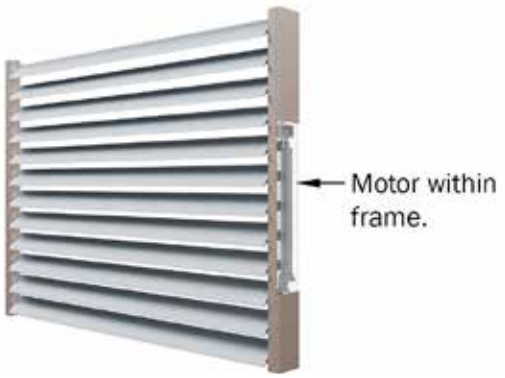

2. VERTICAL MOTORISED LOUVRE PANEL WITH BLADES RUNNING HORIZONTALLY, FITTING INTO AN EXISTING OPENING

Location of Motor

1. FRAME IS FOUR SIDED WRAP AROUND. DRIVE AND PIVOT SIDES ARE CONNECTED WITH PASSIVE END FRAMES

2. FRAME IS TWO SIDED ONLY, DRIVE AND PIVOT SIDES

Hand Operable

VERTICAL LOUVRES CAN BE HAND OPERATED WITH A GEARBOX & CRANK HANDLE

REFER TO PAGE 10.2.14

VERTICAL PANELS

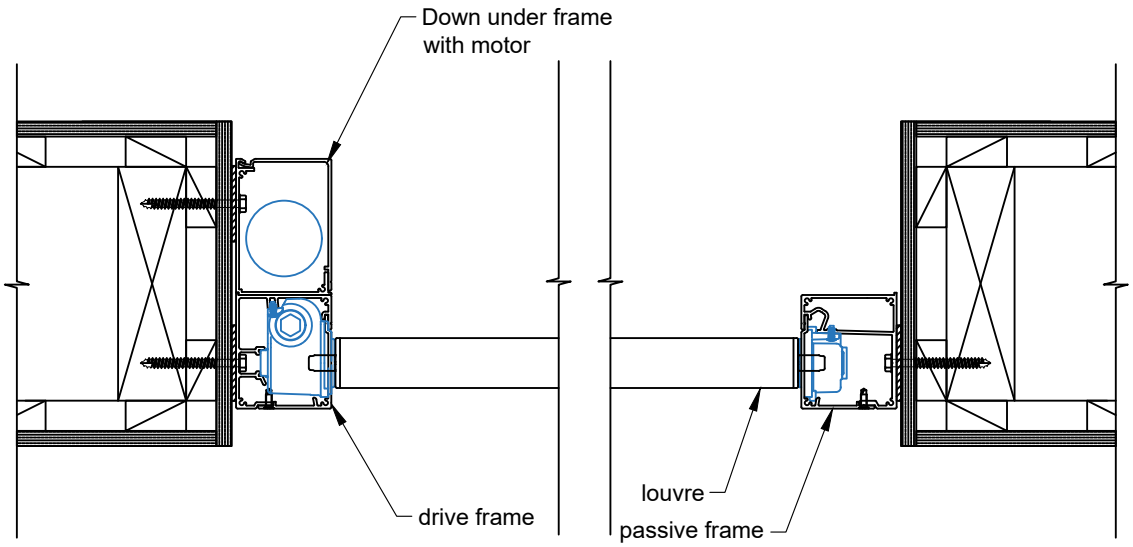

- Short crank handles for easily accessible vertical panels are available in three standard lengths; 30mm, 95mm, 150mm
- Refer to page 10.2.14 for details

OVERHEAD PANELS

- Overhead access is made easy with hook handles available in the following standard lengths; 600mm, 900mm 1200mm, 1500mm, 1800mm
- A short or long eyelet is also available.

VERTICAL SPIRAL PIVOT SUN LOUVRE PANELS

Installation: Blades can be installed vertically or horizontally in a Structural Sub-Frame

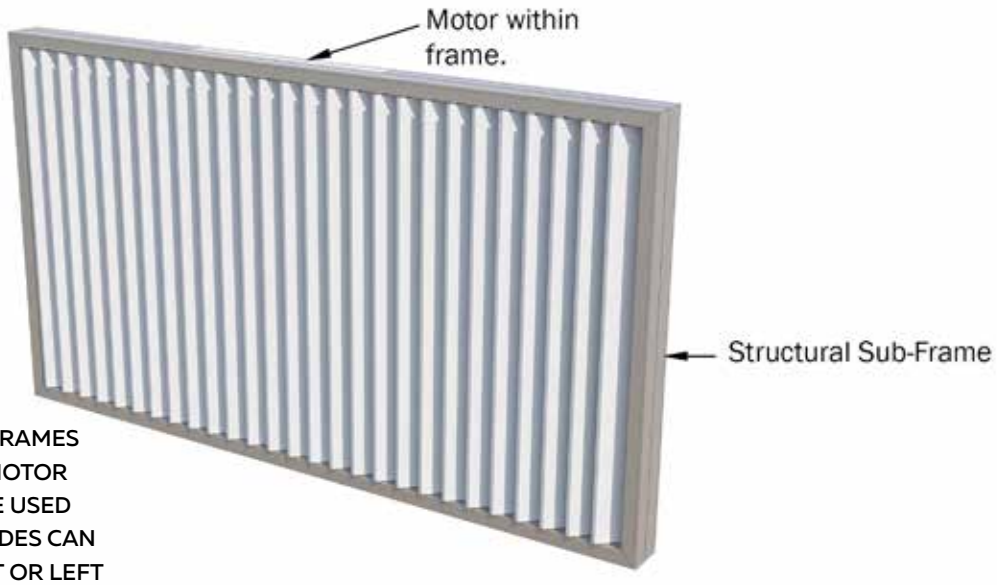

1. VERTICAL MOTORISED SUN LOUVRES RUNNING VERTICALLY, FITTING WITHIN AN ELAM STREET STRUCTURAL SUB-FRAME

2. VERTICAL MOTORISED SUN LOUVRES RUNNING HORIZONTALLY, FITTING WITHIN AN ELAM STREET STRUCTURAL SUB-FRAME

Location of Motor

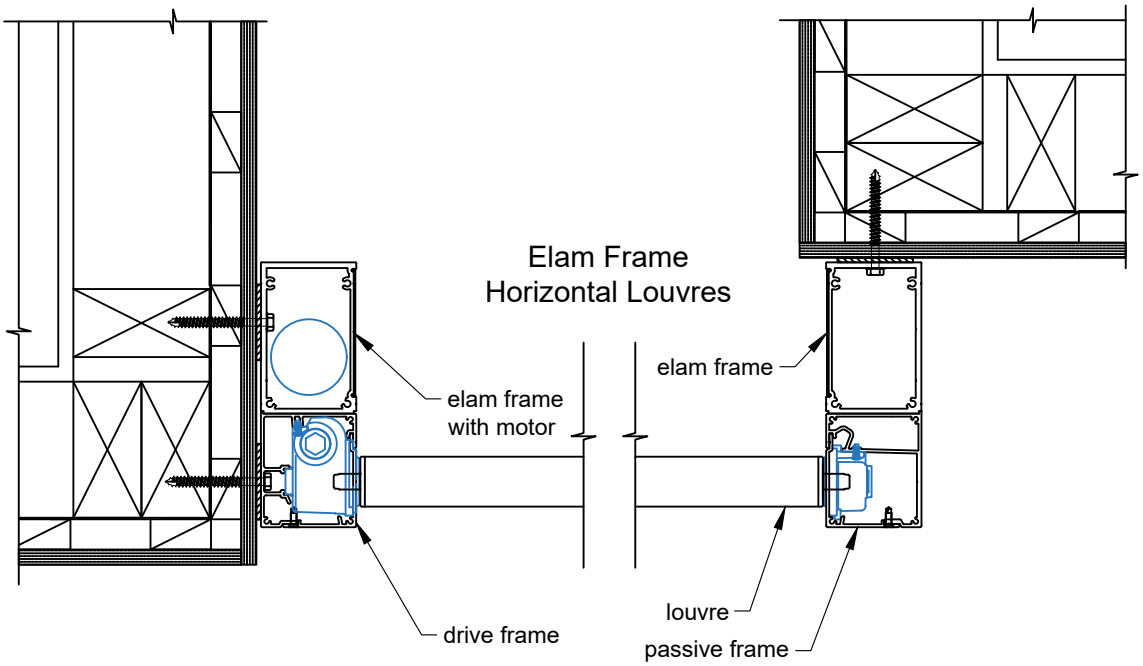

ELAM STREET STRUCTURAL SUB-FRAMES EXTEND ALL FOUR SIDES HIDING MOTOR & WIRING. DEPENDING ON LOUVRE USED CONFIGURATION DRIVE & PIVOT SIDES CAN BE EITHER TOP OR BOTTOM, RIGHT OR LEFT

Hand Operable

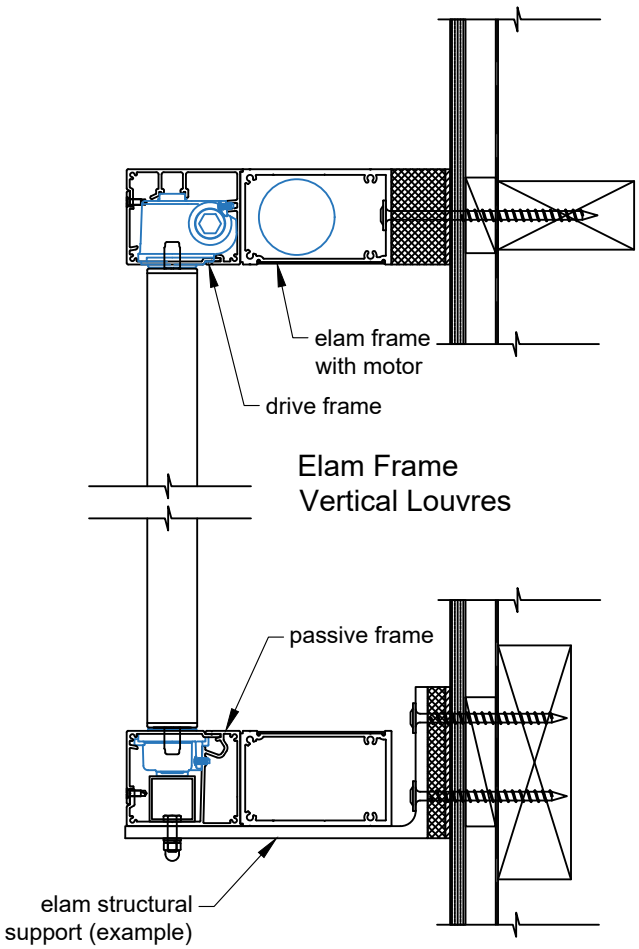

Due to the Structural Frame sitting outside the building, very few Elam Street panels are hand operated as this would require the gearbox shaft protruding through the building. Conventional Motorised or Solar Powered Motorisation (if no power is available) are the preferred options.

DRIVE SYSTEM - SPIRAL PIVOT

Vertical Balustrades

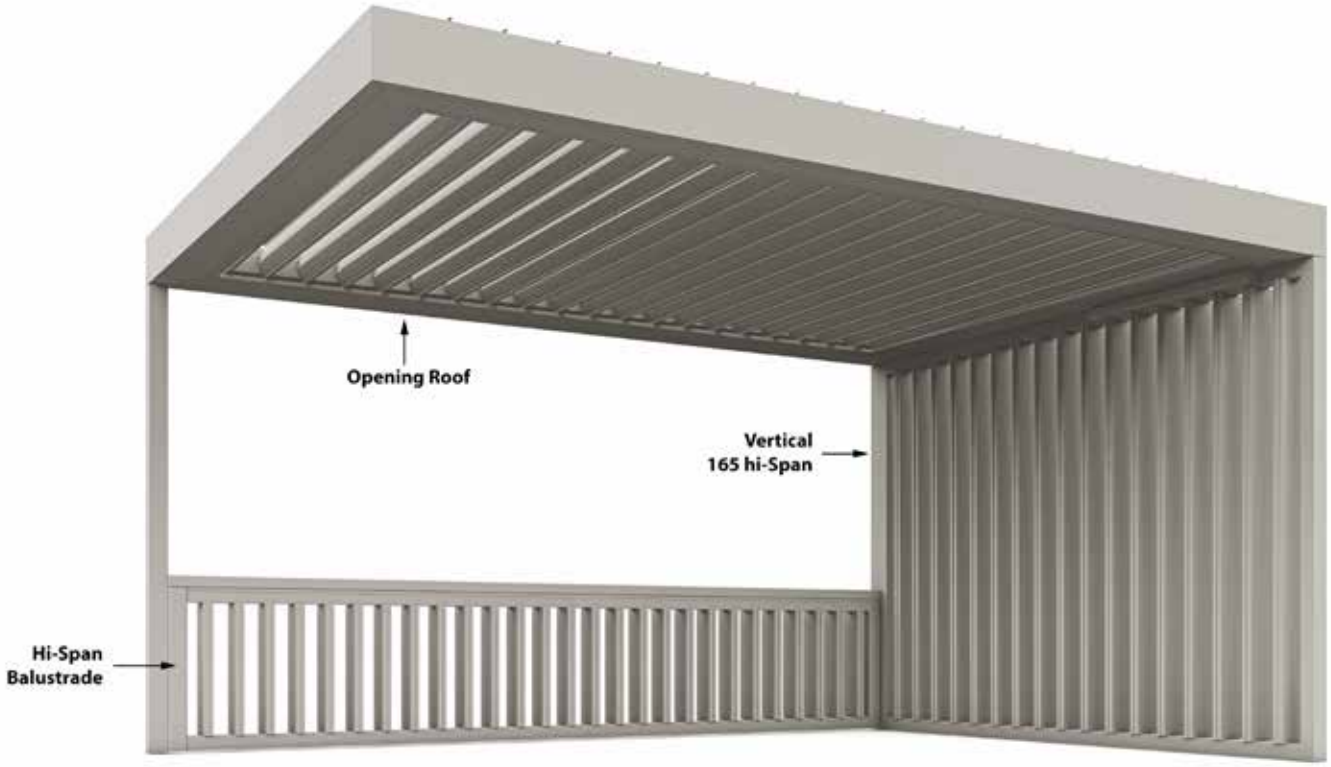

Louvretec's Hi-Span Spiral Pivot operated balustrade louvre system has been designed to meet Australian & NZ Standards.

- Motorised or hand-operated this unique louvre system can be used as a balustrade, spanning up to 3000mm high.
- 165mm Hi-Span opens to a maximum of 125mm as required in Australia.
- 135mm Hi-Span opens to a maximum of 100mm as required in NZ
- The louvre is rated to be used as an infill panel only.
- Structural balustrade support of the infill panel by others.

HAND OPERABLE HI-SPAN BALUSTRADE

MOTORISED RAKING PANEL, THE NETHERLANDS

DRIVE SYSTEM - SPIRAL PIVOT

Raking panels

Louvretec can offer Raking Frames covering a wide range of Spiral Pivot Louvres.

- Choice of Airfoil or Rectangular Louvres
- Suitable for Vertical Wall Panels or Raking Overhead Panels.
- Can be installed on any pitch up to 45 degrees.
- Spiral Drive system sits within non-raking side.

Contact your local Louvretec Dealer regarding custom made Raking Panels.

135MM HI-SPAN BALUSTRADE LOUVRES

Operable Balustrades

The 135mm Hi-Span louvre has been designed to provide an operable Spiral pivoting louvre suitable to be used as a balustrade system in NZ.
The louvre is to be used as an infill panel only and does not include structural horizontal or vertical balustrade supports.
Structural balustrade support by others.

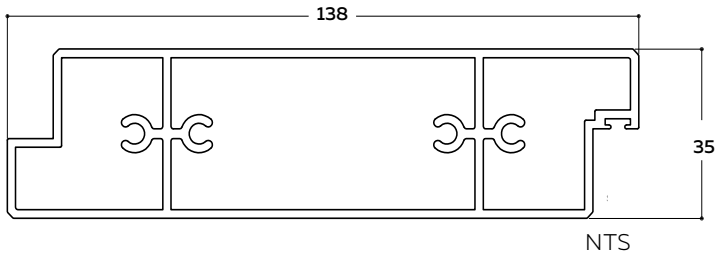

Balustrade - Technical details

NZ AND AUSTRALIAN
COMPLIANCE REQUIREMENTS
This is a general guideline outlining some key requirements as at the time of printing. Please confirm all details with your local regulatory authority prior to balustrade installation.

1. A barrier is required when someone could fall vertically 1m or more.
2. Balustrade or barrier must be 1m high and of adequate strength to cope with people pressing against it.
3. Ensure nowhere on the balustrade a child can get a foot hold between 150mm & 750mm above the deck surface to climb over the balustrade or fall through.
4. In NZ the maximum opening between balustrade verticals is 100mm.
5. In Australia the maximum opening between balustrade verticals is 125mm.

300MM MAXI DRIVE LOUVRE BLADE, FIXED. TIMBER LOOK POWDERCOAT

VERTICAL SUN LOUVRES FITTED INTO A FRAME

300MM MAXI LOUVRE

Elliptical shape

The 300mm Maxi Louvre is available in a motorised option using Louvretec's Maxi-Drive Pivot System.

This pivot system hides both the motor and pivot mechanism within a structural aluminium support frame.

Powered by Somfy, Maxi-Drive incorporates both a reduction gearbox and supporting drive arm, providing strength needed for pivoting large blade louvres. Ideal for both residential and commercial applications.

The 300mm Maxi Louvre is also available End Fixed or Bracket fixed, horizontal or vertical.

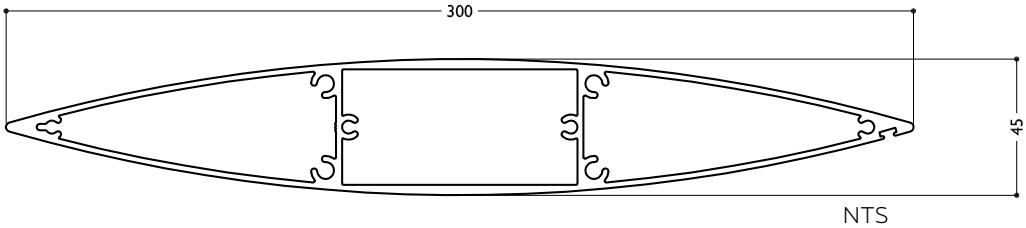

Please note, our RL300 and RL450 Louvres are also compatible with the Maxi Drive system. Please contact your local Louvretec Dealer for more information. We are focused on meeting your needs with tailored solutions.

END FIXED SUN LOUVRES

Fix blades Vertically or Horizontally

All Louvretec sun louvres can be End Fixed and all have internal screw fixing ports which allow the blades to be end fixed, set at any pitch and any centre.

As a rule of thumb blade centres are generally fixed at between 75% - 100% of the blade width.

VERTICAL PANEL END FIXED - HORIZONTAL LOUVRES

VERTICAL PANELS END FIXED

- All Louvretec sun louvres have internal screw fixing ports. This enables the blades to be;
  - set at any angle or pitch (blade pitch)
  - set at any centre (blade centre)
- As a rule of thumb, blade centres are fixed at;
  - between 75% - 100% of their width.
    eg: 180mm Airfoil would have a centre between 135mm - 180mm.
- Blade pitch is an equally important consideration in determining the degree of light, shade, privacy and shelter.

OVERHEAD PANEL END FIXED - HORIZONTAL LOUVRES

OVERHEAD PANELS END FIXED

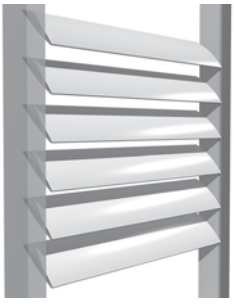

- Horizontal or Overhead louvres may fit within an existing opening or as illustrated may require a separate structural sub-frame.
- Sub-frames are typically aluminium or steel and usually require specific engineering details.
- Louvretec specialises in the supply and installation of aluminium structural sub-frames.
- Please contact Louvretec for further details.

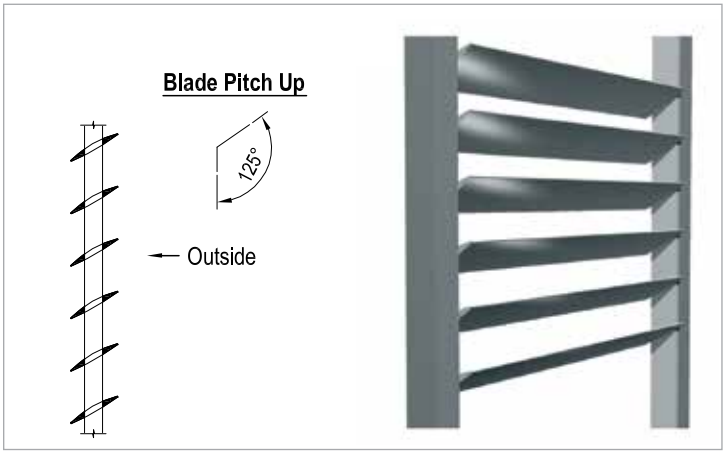

©Louvretec 2025 - All Rights Reserved. Technical specifications subject to change without notice.

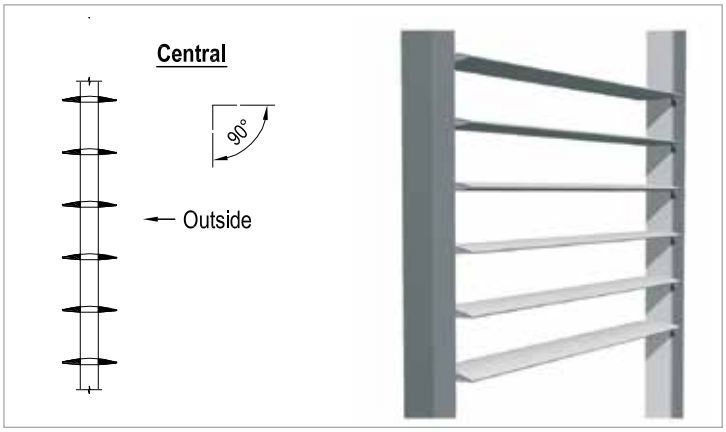

VERTICAL PANELS END FIXED INFILLS

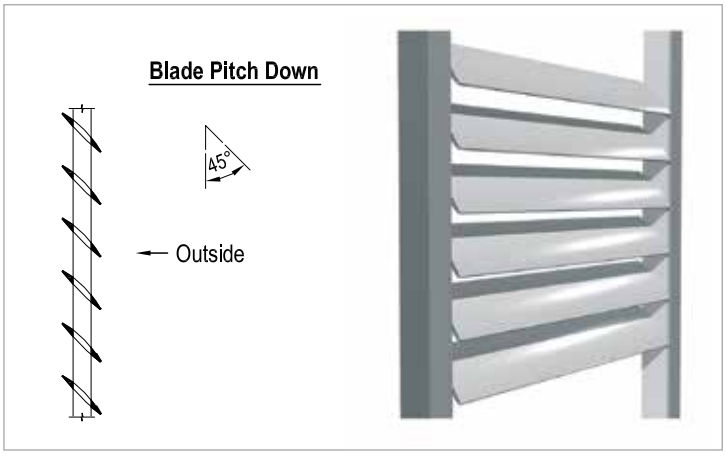

How the system works

- Blades can be set to any pitch or centre
- Three typical options are shown:
  - Blade Pitch Up
  - Central
  - Blade Pitch Down
- All Louvretec sun louvres have internal screw fixing ports. This enables the blades to be;
  - set at any angle or pitch (blade pitch)
  - set at any centre (blade centre)
- As a rule of thumb,
  blade centres are fixed at between 75% to 100% of their width.
  eg: 180mm Airfoil would have a centre between 135mm to 180mm.
- Blade pitch is an equally important consideration in determining the degree of light, shade, privacy and shelter.

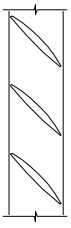

LOUVRE BLADES IN RELATION TO FRAME

- 1. Louvres fit outside of frame, End Caps required

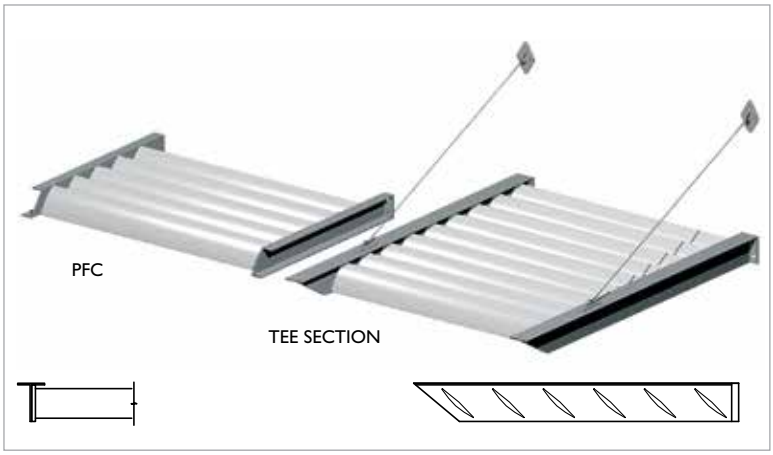

2. Louvres fit within frame, End Caps required

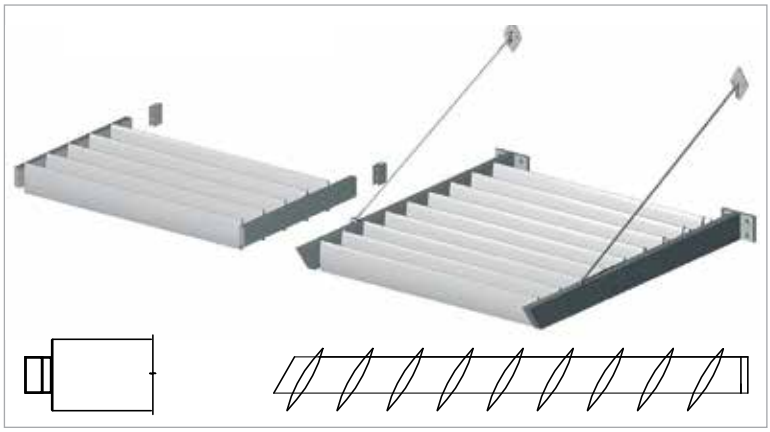

©Louvretec 2025 – All Rights Reserved. Technical specifications subject to change without notice.

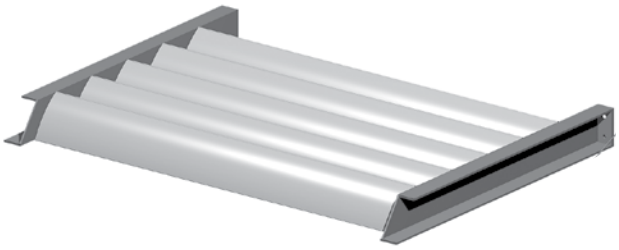

OVERHEAD PANELS END FIXED INFILLS

How the system works

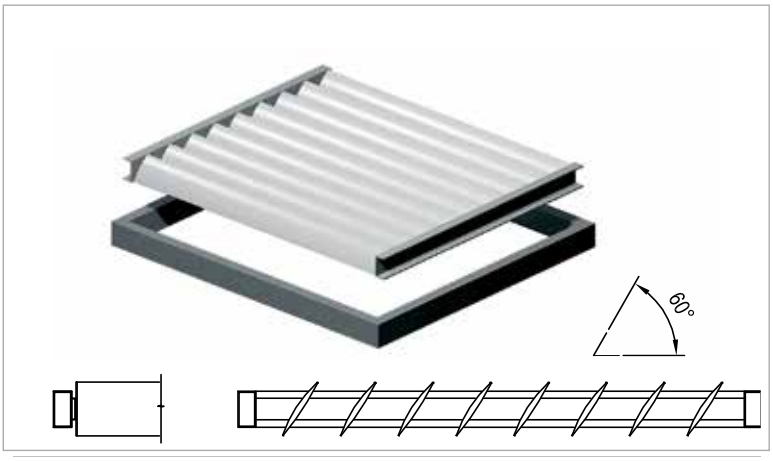

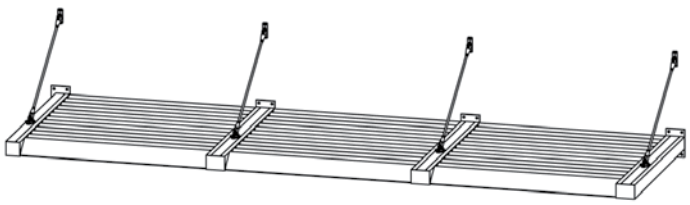

- Horizontal or Overhead louvres may fit within an existing opening or as illustrated may require a separate structural sub-frame.
- Sub-frames are typically aluminium or steel and usually require specific engineering details.
- Engineering is usually also required for the fixing details to the building.

- Louvretec specialises in the supply and installation of aluminium structural sub-frames.

- All louvre panels shown can be joined to create one continuous panel.

©Louvretec 2025 – All Rights Reserved. Technical specifications subject to change without notice.

END FIXED CHIMNEY SURROUND, AUCKLAND

CHIMNEY SURROUNDS

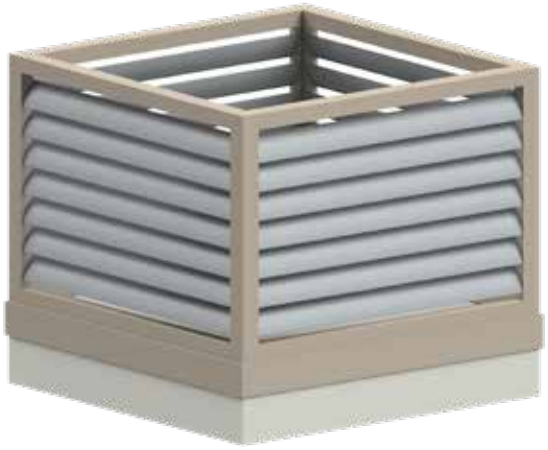

The cherry on top

There are many options available when designing louvre chimney surrounds. The actual shape or footprint of the surround is largely dictated by the chimney itself.

Determine what size louvre blade will be best suited, both aesthetically and functionally. Wind flow through the louvre blades can assist with the actual venting of the chimney. The surround's support structure can be a combination of aluminium box section, angle or channel. Please discuss with Louvretec.

BRACKET FIXED SUN LOUVRES

Fix blades Vertically or Horizontally

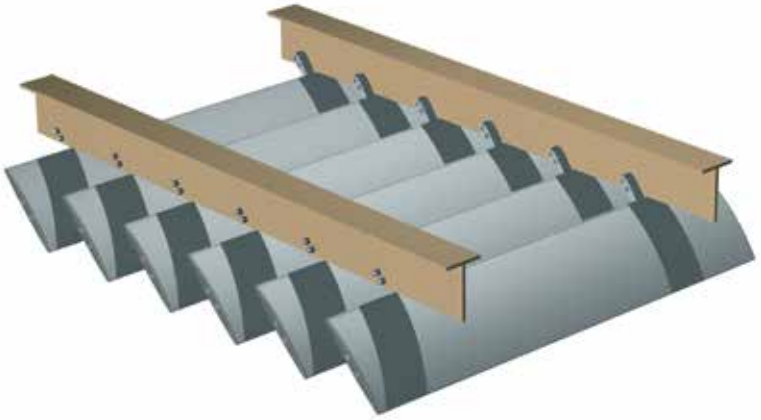

All Louvretec Sun Louvres can be Bracket Fixed using Louvretec's proprietary Bracket Fixing Systems. Die cast or extruded brackets are custom manufactured site specific, enabling the louvre blades to be set at any pitch or to any centres.

VERTICAL PANEL BRACKET FIXED - HORIZONTAL LOUVRES

VERTICAL PANELS BRACKET FIXED - HORIZONTAL LOUVRES

All Louvretec Airfoil and Maxi Louvres can be Bracket Fixed, with the blades:
- set at any angle
- set at any centre (blade centre)

OVERHEAD PANEL BRACKET FIXED - HORIZONTAL LOUVRES

OVERHEAD PANELS BRACKET FIXED - HORIZONTAL LOUVRES

Overhead (Horizontal) louvres may fit above an existing opening, or as illustrated may require a specific structural sub frame.

Sub frames are typically aluminium or steel and usually require specific engineering details.

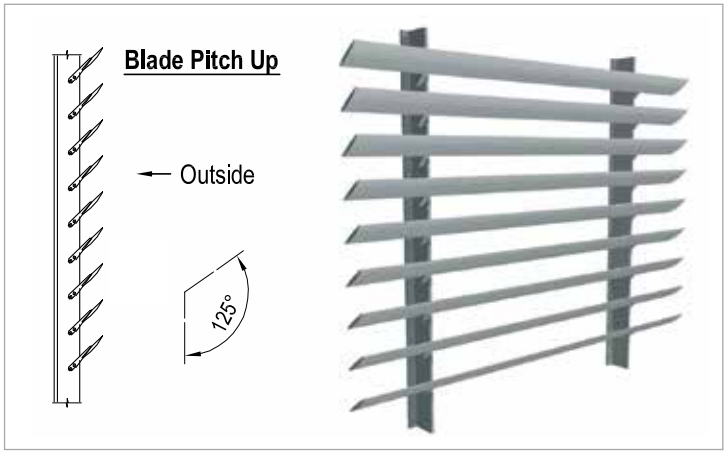

Louvretec specialises in the supply and installation of aluminium structural sub frames.
Please contact Louvretec for further details.

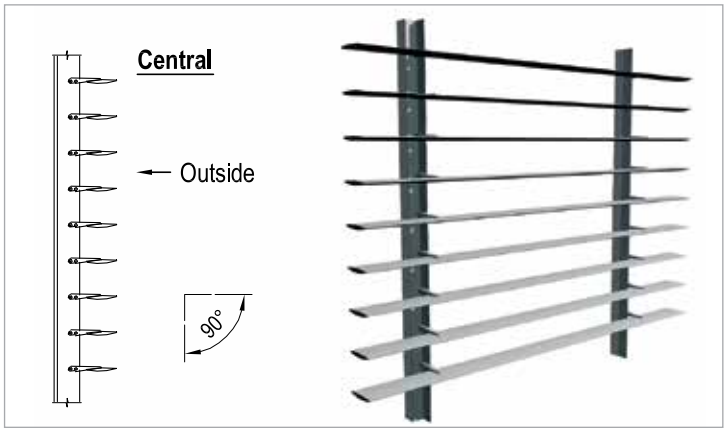

©Louvretec 2025 - All Rights Reserved. Technical specifications subject to change without notice.

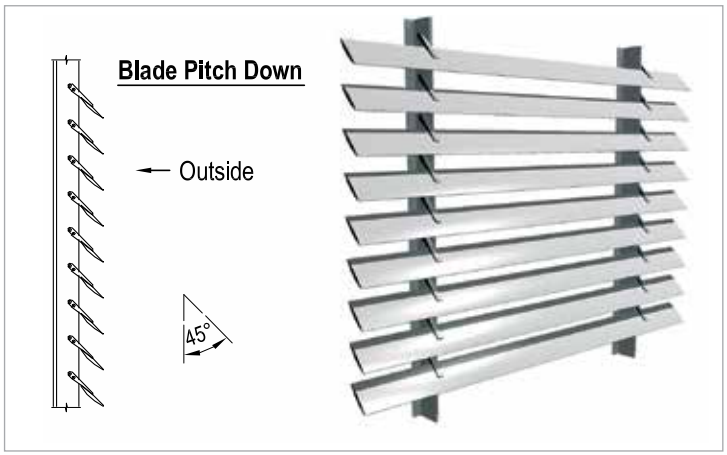

HOW THE VERTICAL SYSTEM WORKS

Bracket fixing

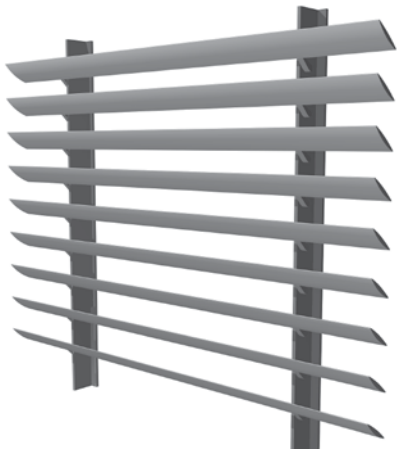

- Blades can be set to any pitch or centre
- Three typical options shown below;

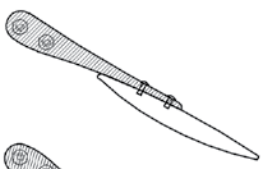

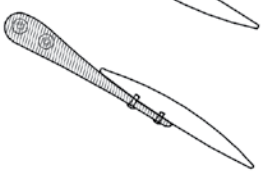

- All Louvretec Airfoil and Maxi Louvres can be bracket fixed with the blades:
  - set at any angle or pitch (blade pitch)
  - set at any centre (blade centre)
- There are four combinations of louvre blade to extruded bracket arm (tear drop) to consider:

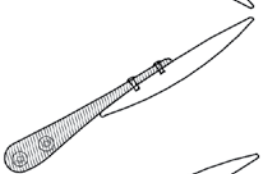

1. Blade pitch down tear drop over

2. Blade pitch down tear drop under

3. Blade pitch up tear drop over

4. Blade pitch up tear drop under

©Louvretec 2025 – All Rights Reserved. Technical specifications subject to change without notice.

BLADE PITCH DOWN TEAR DROP UNDER

SHOWING 120MM AIRFOIL

BLADE PITCH DOWN TEAR DROP UNDER

SHOWING 180MM AIRFOIL

- Horizontal or Overhead louvres may fit above an existing opening or, as illustrated, may require a separate structural sub-frame.
- Sub-frames are typically aluminium or steel and usually require specific engineering details.
- Engineering is usually also required for the fixing details to the building.
- Louvretec specialises in the supply and installation of aluminium structural sub-frames.

©Louvretec 2025 – All Rights Reserved. Technical specifications subject to change without notice.

HOW THE CORNER MITRES WORK

Bracket fixing

- Bracket fixed louvres mitred at the corners are a Louvretec specialty.
- A seamless effect is achieved giving the blades continuity to both sides of the building.
- Both Vertical and Horizontal Bracket Fixed louvres can be mitred.

VERTICAL WALL OF BRACKET FIXED - HORIZONTAL LOUVRES WITH CORNER MITRES

Maxi Airfoil shaped louvre: 300MM MAXI LOUVRE

300MM MAXI LOUVRE

Elliptical shape

NTS

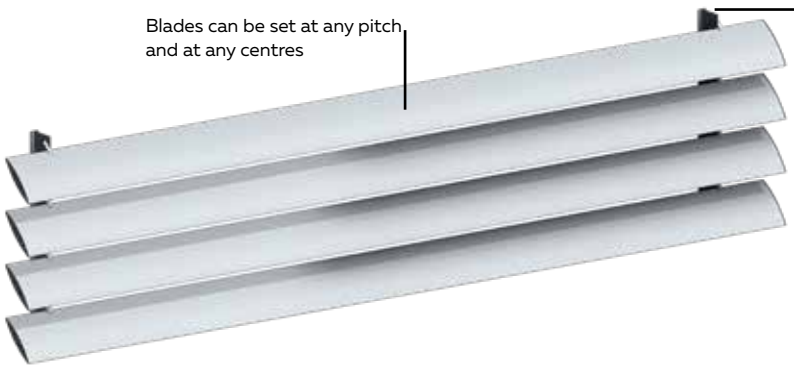

300MM MAXI LOUVRE

The 300mm Maxi Louvre is now available in a motorised option using Louvretec's new Maxi-Drive pivot system.
This new pivot system hides both the motor and pivot mechanism within a structural aluminium support frame.
Powered by Somfy, Maxi-Drive incorporates both a reduction gearbox and supporting drive arm, providing strength needed for pivoting large blade louvres. Ideal for both residential and commercial applications.
Also available as End or Bracket Fixed, Horizontal or Vertical Overhead Panels.

BRACKET FIXED CHIMNEY SURROUND
WITH MITRED CORNERS

AUCKLAND, NZ

CHIMNEY SURROUNDS

The cherry on top

There are many options available when designing louvre chimney surrounds. The actual shape or footprint of the surround is largely dictated by the chimney itself.

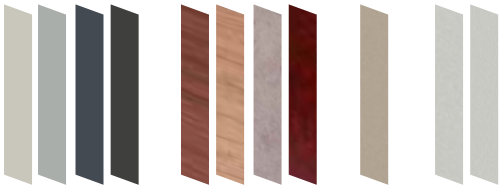

Determine what size louvre blade will be best suited, both aesthetically and functionally. Wind flow through the louvre blades can assist with the actual venting of the chimney. The surround's support structure can be a combination of aluminium box section, angle or channel. Please discuss with Louvretec.

COASTAL SERIES ALUMINIUM SHUTTERS

Sliding, Bifolding and Hinged Shutter systems for Doors and Windows

Ideal for closing in your Louvretec Outdoor Room

Designed to operate in the harshest of conditions, Louvretec's proven Coastal Series Shutters offers a wide range of design options.

Custom made to meet the most demanding design and performance criteria.

All Louvretec Coastal Shutters are manufactured from commercial grade powder coated or anodised aluminium.

SLIDING SHUTTERS, PAUANUI NZ

All Sliding, Bifolding & Hinged componentry have completed extensive corrosion testing and are constructed using 300 series Stainless Steel with componentry die-cast in 316 marine grade.

With Louvretec's extensive range of Louvre shapes and sizes, matched with a range of Door Frames for all Sliding, Bifolding or Hinged installations, Louvretec Coastal Series offers a premium range of Shutters for a wide variety of applications.

1. SLIDING DOOR & WINDOW SHUTTERS

Details at a glance
Coastal Sliding Louvre Panels

Sliding Louvre Shutters vary considerably from glazed aluminium joinery sliding doors. Glazed aluminium joinery doors generally fit within a 4 sided outer frame with the glass assisting with the bracing of the sliding panel.
Sliding Louvre Shutters generally fit to the outside of the building, deck or within a prepared opening and as such only have Top and Bottom Tracks and guides.

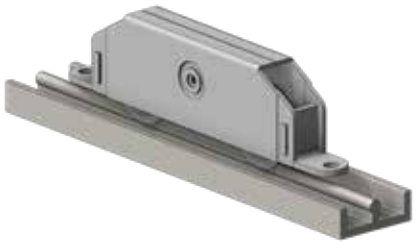

Top Hung Shutters have the advantage of being held captive within the Top Track. A minimal bottom guide only is required.

Bottom Rolling Shutters do not require structural fixing at the head with all the weight being on the Bottom Track. They are easy to operate, particularly with larger doors.

Top Hung or Bottom Rolling?

TOP HUNG SLIDERS - CARRIAGE WITHIN HEAD TRACK

1. SLIDING DOORS & WINDOW SHUTTERS
Coastal Sliding Louvre Panels (CONTINUED)

WITH MULLION

WITH TRANSOM

For more info refer to:
Coastal Top Hung 120kg Pages 12.11, 12.12, 12.13, 12.21
Coastal Top Hung 250kg Pages 12.14, 12.15, 12.16, 12.21
Coastal Bottom Rolling 80kg Pages 12.17, 12.19, 12.20, 12.21
Coastal Bottom Rolling 200kg Pages 12.18, 12.19, 12.20, 12.21

Transom

Adjustable louvres provide no lateral bracing for the sliding panel and in most cases for shutters over 1500mm wide a transom is required.

Fixed louvres however provide excellent lateral bracing eliminating the need for a transom.

Mullion

As generally smaller 90mm - 100mm louvres are used in sliding shutters a mullion may be required in shutters over 1200mm - 1500mm wide in order to meet spanning requirements.

Shutter Weight

Calculating the weight of a sliding louvered shutter allow 12-14 kg per sqm. This includes louvres, outer frame mullions and transoms if required.

2. BIFOLDING SHUTTERS

Coastal Bifolding Shutter System for Doors and Windows

Louvretec Bifold Doors effortlessly slide open with panels following suit, neatly stacking against the wall.

Coastal Bifolding 100
Designed around a maximum panel weight of 100kg

BIFOLD DOOR

BIFOLD WINDOW

Transom

A Transom is standard on all Coastal Bifolds.

Shutter Weight

Calculating the weight of a Coastal Bifold Shutter please allow 12-14 kg per sqm. This includes Louvres, Outer Frame Mullions and Transom.

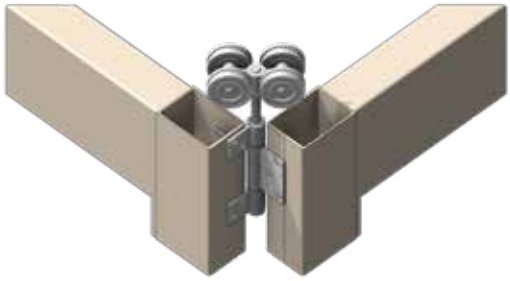

©Louvretec 2025 - All Rights Reserved. Technical specifications subject to change without notice.

2. BIFOLDING SHUTTERS
Coastal Bifolding Shutter System (Continued)

Top Hung

All Coastal Series Bifolds are Top Hung.

As Multi-Panel Bifold Shutters can load considerable weight to the Top Track suitable fixing at the head is essential. Please contact Louvretec for specific weight loadings.

TYPICAL TOP HUNG DETAILS

Mix & Match

The same Louvre infill operating options that are available to our Coastal Sliding Shutters are available to our Coastal Bifold Shutters. These being the KISS Pivot and End Fixed applications.

For more info refer to:

COASTAL BIFOLDING 100 SHUTTER SYSTEM

Bifolding Shutter System for Doors & Windows

Louvretec Bifold Doors effortlessly slide open with panels following suit, neatly stacking against the wall

Coastal Bifolding 100

Designed around a maximum panel weight of 100kg

Top Hung

All Coastal Series bifolds are top hung.

As multi-panel bifolds can load considerable weight to the top track suitable fixing at the head is essential - please contact Louvretec for specific weight loadings.

Transom

A transom is standard on all Coastal Bifolds.

Shutter Weight

Calculating the weight of a bifolding louvered shutter allow 12-14 kg per sqm. This includes louvres, outer frame mullions and transom.

Mix & Match

The same options that are available to our sliding shutters are available to our bifold shutters - these being the KISS Pivot and End Fixed.

HINGED LOUVRE DOORS

For Doors & Windows: Details at a glance

Louvretec Hinged doors are available in a range of three different styles. Choose depending on durability requirements and door size.

Hinged Louvre Doors

Louvretec Hinged doors area available in three distinctive styles:

1. STANDARD HINGED DOOR

1. Standard Hinged Doors
Maximum sizes 2200mm (h) x 900mm (w)
Refer to 12.28 & 12.30 for more info.

2. HEAVY DUTY HINGED DOOR

2. Heavy Duty Hinged Doors
Maximum sizes 2500mm (h) x 900mm (w)
Refer to 12.29 & 12.30 for more info.

3. ULTRA WELDED HINGED DOOR

3. Ultra Welded Hinged Doors
Maximum sizes 3000mm (h) x 1300mm (w)
Refer to 12.31 & 12.32 for more info.

©Louvretec 2025 – All Rights Reserved. Technical specifications subject to change without notice.

1. STANDARD HINGED DOORS

External Shutters

Standard Hinged Doors are designed for a maximum panel size of 2200mm (h) x 900mm (w).

Heavy Duty 105mm top and bottom rails are used with both fixed and adjustable louvre infills. A transom is required for all adjustable louvre infills.

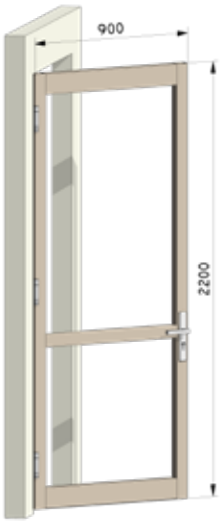

Available in one panel and two panel French Door configurations.

HINGED LOUVRE & PLANTATION SHUTTERS

Hinged Louvre Windows

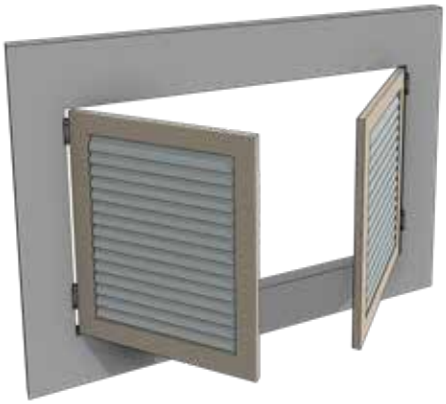

Louvretec's Hinged louvre shutters and Plantation Shutters use standard hinged doors extrusions and componentry. Originally used in Plantation homes in the old south of America to assist with cooling, Louvretec Plantation Shutters bring a fresh, modern design when placed externally on a home or buidling.

Bringing both form and function, Hinged Louvre &/ Plantation Shutters let you enjoy your view, natural light & ventilation when open and heat reduction, sun and privacy control when closed.

LOUVRETEC PRODUCT WARRANTY

OPENING ROOFS - SUN LOUVRES - SHUTTERS

The Louvretec range of products:

All Louvretec branded products are designed and engineered in Australia & New Zealand by Louvretec to comply with relevant AS/NZS standards - refer to full Louvretec Engineering data Design Manual 2025 Section 13.

Louvretec has the most extensive range of outdoor sun shading/ outdoor living products available in Australasia, backed by a comprehensive network of Louvretec Dealers.

Most Louvretec products sold in Australia are made in Australia*

Most Louvretec products sold in New Zealand are made in New Zealand*

*Some specialised products may only be made in Australia or in NZ and are shipped between each country.

The Authorised Louvretec Dealer Network:

Your Louvretec product will have been supplied and installed by your local Authorised Louvretec Dealer. All Louvretec Dealerships are privately owned, and the same Louvretec Dealer who supplied your Louvretec will also service your Louvretec.

Your Louvretec product has been "Engineered for Life" and we are committed to ensuring that happens.

Louvrecare:

Preventative maintenance and valet. Regular scheduled servicing by a Louvrecare team has real benefits. Louvrecare can vary between Dealerships - consult your local Louvretec Dealer.

LOUVRETEC PRODUCT WARRANTY

OPENING ROOFS - SUN LOUVRES - SHUTTERS

warranty details	All product installed by Louvretec (excluding Outoor Blinds - please refer separate warranty for this) , or an Authorised Louvretec Installer, is from date of invoice, fully warranted for the first two years. This warranty covers workmanship, louvres and all componentry, motors, switches and electronics with all labour costs included. In addition, from year two to end of year five, a warranty replacement of parts only applies for all motors, switches and electronics. Labour costs excluded. (Excludes any wiring and electrical connections done by others).
motorisation	Louvretec exclusively uses Somfy motors, switches and electronics. Somfy offers a 5-year warranty on all motors and electronics. Please contact Louvretec NZ or Somfy for a complete list of all terms and conditions.
product materials	All aluminium louvres and extrusions used in Louvretec's systems are manufactured in an IS09002 quality assured environment to AS1866 & AS3902 standards. Marine grade T316 stainless steel is used for drive axles, with stainless steel componentry fixings being standard. Plastic injected moulded componentry is all UV stabilised
powdercoat finishes	A wide range of exterior powder coat finishes are available. Duralloy or equivalent is the standard finish supplied unless stated otherwise and this carries a 10 year film and colour integrity warranty as per the Dulux Powder and Industrial Coatings Warranty. If your project has used the Duratec powdercoat range please refer to the Dulux Powder and Industrial Coatings Warranty wording.
anodised finishes	The current specifications re anodised aluminium range from 12-20-25 microns depth. The greater the microns the better the protection. With regular cleaning anosided material will retain its original integrity for no less than 10 years.
fully engineered	Our louvre systems are designed to conform to New Zealand and Australian standards wind loadings. Full engineering details available on request.
cleaning	Periodic cleaning is essential to remove dirt, grime and accumulated salt deposits from both powder coated and anodised surfaces. Three steps for cleaning are: 1 Carefully remove any loose deposits with a wet sponge. 2 Use a soft non abrasive brush and a mild car cleaning detergent solution to remove dust, salt and other deposits. 3 Rinse off with clean fresh water.
product description	_____
louvrecare	Louvrecare is a planned preventative maintenance and valet service designed to keep your Louvretec product clean and in good working order. Contact your Louvretec Dealer for full details.

ENGINEERING REFERENCES & DESIGN INFORMATION FOR LOUVRETEC SYSTEMS & SUPPORT FRAMES

09 March 2025

The following calculations and design tables apply exclusively to LouvreTec Aluminium Louvre Systems and their supporting structures. Substitutions are not permitted.

Users must ensure they reference the most recent version of the design manual, as the calculations and tables are subject to updates in response to design code changes and amendments at the time of publication.

Maximum spans for aluminium members have been calculated based on wind zones and wind speeds derived from NZS 3604:2011, in alignment with AS/NZS 1170:2021. Ultimate Limit State (ULS) wind speeds are based on a 1-in-500-year return period and are applied at the building, with site exposure multipliers accounted for. Serviceability Limit State (SLS) wind speeds correspond to a 1-in-25-year return period. Associated wind pressures are determined using AS/NZS 1170.2:2021 – Structural Design Actions, Part 2: Wind Actions and are reduced to reflect the classification of louvre frames as Importance Level 1 structures. Section capacities are calculated in accordance with AS/NZS 1664.1:1997 – Aluminium Structures, Part 1: Limit State Design.

Deflection limits are as follows:

- Dead load deflections: Limited to span/250 for both louvres and beams, with an additional cap of 20mm for louvre dead load deflections.
- Wind load deflections: Restricted to span/40 for louvres, span/250 for beams and height/100 for posts.

Wind Zone	**ULS Wind Speed (m/s)**	**(km/h)**
Low	32	115
Medium	37	133
High	44	158
Very High	50	179
Extra High	55	198

The following load case combinations have been applied to the member loads
0.9G,W ULS uplift pressure
1.2G, W ULS downthrust pressure
G, W SLD for deflection

Notes:

1) When the louvre structure is to be attached to an existing building, care must be taken to ensure that supporting structure has adequate strength to carry the additional loads. If there is any doubt contact Louvretec for advice.

©Louvretec 2025 - All Rights Reserved. Technical specifications subject to change without notice.

CODES OF PRACTICE

Design has been carried out using the following codes of practice:

Structural Design Actions:
Part 0: General Principles - AS/NZS 1170.0:2002
Part 1: Permanent, imposed and other actions - AS/NZS 1170.1:2002
Part 2: Wind Actions - AS/NZS 1170.2.2021

Aluminium Structures:
Part 1: Limit state design - AS/NZS 1664.1: 1997

Timber-framed Buildings:
NZS 3604:2011

SPIRAL PIVOT SYSTEM LOAD TEST

Louvretec Products Ltd has conducted a static load test on the Spiral Pivot System. The test confirmed that the Spiral Pivot System is capable of resisting a downward static load greater than would be generated by the application of the structural design loads used in this publication to an equivalent structure. More detailed test information is available from Louvretec upon request.

CATEGORIES, TYPES AND INTENDED PURPOSES OF PRODUCER STATEMENTS

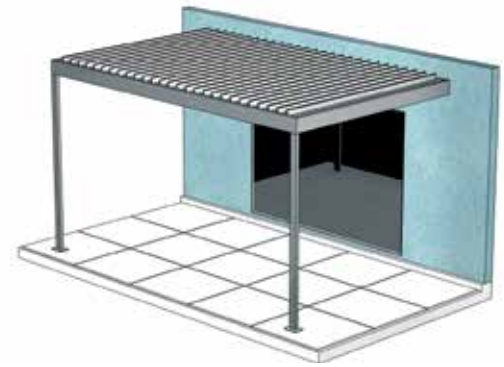

Design	PS1 Producer Statement Design	Used by designers to certify specific design elements comply with specified standards or codes in order to comply with the provisions of the Building Code.
	PS2 Producer Statement Design Review	Used by people undertaking a peer review of all or part of a design to say that the design or the specified part of the design complies with specified standards or codes in order to comply with the provisions of the Building Code.
Construction	PS3 Producer Statement Construction	Used by constructors or trades people to certify that the specified building work that they have undertaken complies with the building consent.
	PS4 Producer Statement Construction Review	Used by people undertaking a peer review of specified building work undertaken by constructors or trades people to certify that the building work that has been undertaken complies with the building consent.

DETERMINING THE TRIBUTARY LENGTH

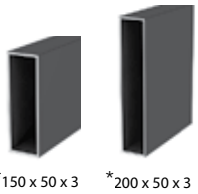

Typically the tributary length for simply supported beams only is half the length of the louvres span.
Determining the tributary length is shown through figures 1-5 on pages 13.15-17 of this Engineering section.

Note: Care must be taken when cacluating the tributary length for beams on continuous spanning structures as half of the louvre span on either side of the beam may not be equal.

BEAM TYPES

* REFER APPENDIX

Fix double beams together with 2/10g x 25mm S/S pan head self tapping screws 50mm in from top and bottom of box sections at 900mm centres.
Use continuous flexible sealant/adhesive along top and bottom between box sections.

TYPICAL DETAIL // SIMPLY SUPPORTED EXTERNAL BEAM WITH INTERNAL CONNECTED BEAM

NOTES

1. WHERE AN EXTERNAL BEAM SUPPORTS ONE INTERNAL BEAM THAT SUPPORTS THE LOUVRES, THE EXTERNAL BEAM SHOULD BE DESIGNED USING A LOUVRE TRIBUTARY LENGTH EQUAL TO HALF OF THE LENGTH OF THE INTERNAL BEAM. THE INTERNAL BEAM SHALL BE DESIGNED AS A TYPICAL BEAM SUPPORTING LOUVRES.

2. THE INTERNAL BEAM CAN BE LOCATED ANYWHERE ALONG THE LENGTH OF THE EXTERNAL BEAM.

SPECIFIYING POSTS

To use the following tables you need to know the Tributary Area (Roof Area) on the post, the Tributary Edge Length (L_E) and the height of the post. For Tributary Area and Tributary Edge refer to page 19.

POST LOADS

Wind speeds taken from NZS 3604; 2011, are ultimate limit state wind speeds

L = Low wind speed
M = Medium wind speed
H = High wind speed
VH = Very high wind speed
EH = Extra high wind speed

	ULS (capacity)					SLS (deflection)				
Wind Zone	L	M	H	VH	EH	L	M	H	VH	EH
Factored design wind speed at building (m/s)	32	37	44	50	55	27	31	37	42	46
Drag pressure on beam (kPa) (for C_{fig} = 1.45)	0.74	0.99	1.40	1.81	2.18	0.54	0.71	1.01	1.30	1.55
Drag pressure on roof (kPa) (for C_{fig} = 0.04)	0.02	0.03	0.04	0.05	0.06	0.01	0.02	0.03	0.04	0.04

TYPICAL DETAIL | SIMPLY SUPPORTED BEAM (FIGURE 6) AND CANTILEVERED BEAM (FIGURE 7)

FIGURE 6

PLAN VIEW SIMPLY SUPPORTED BEAM

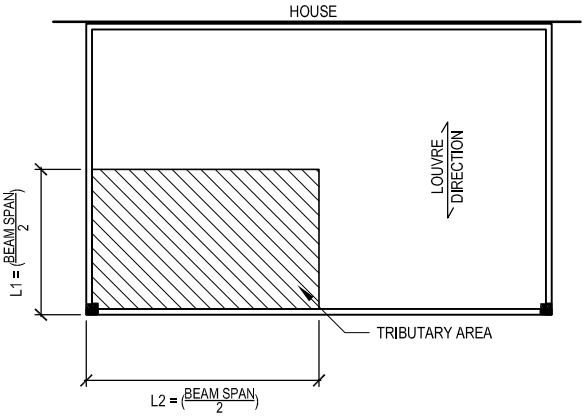

FIGURE 7

PLAN VIEW CANTILEVERED BEAM

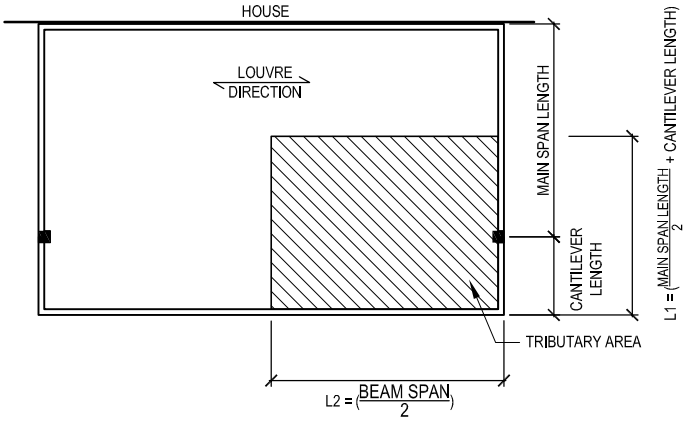

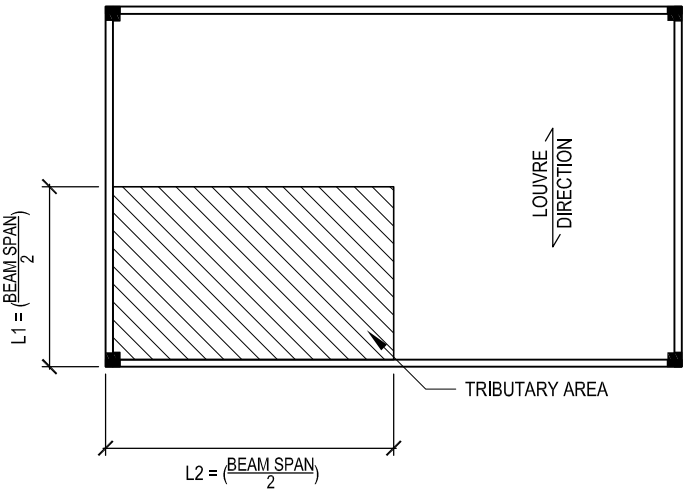

FIGURE 8

PLAN VIEW

L2 is longer than L1
therefore: LE = L2

Refer Note 3.

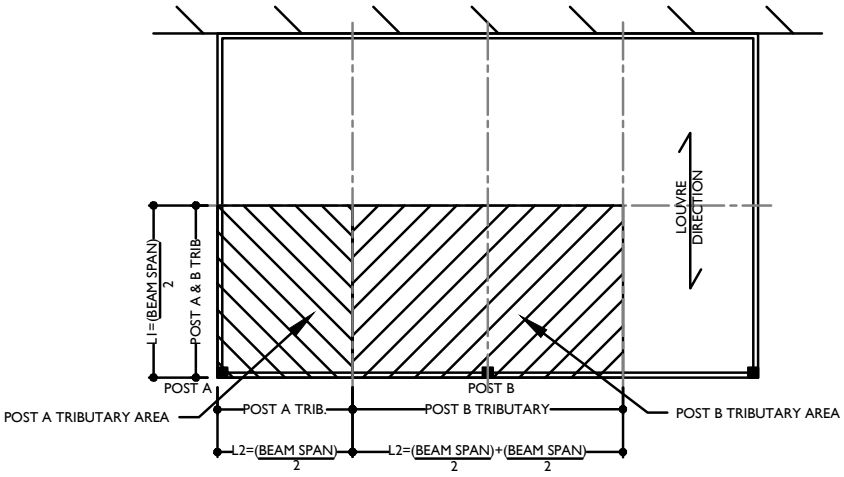

NOTES

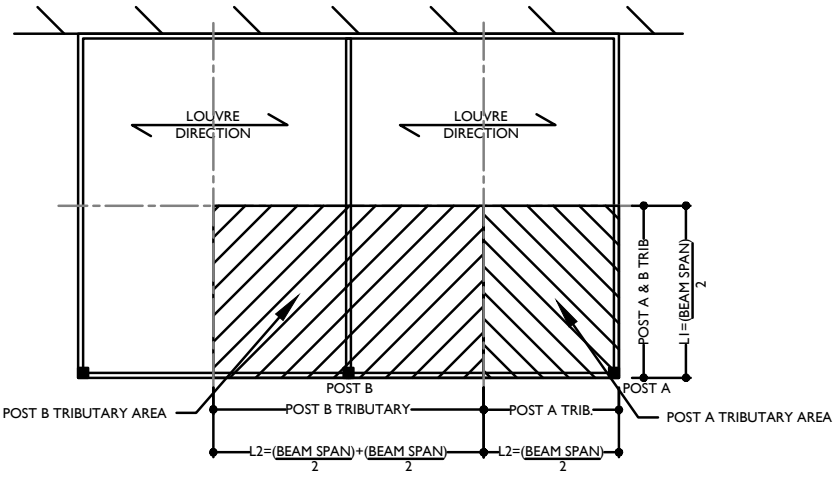

1. THE TRIB AREA FOR A POST AND FOOTING IS THE PRODUCT OF HALF THE DISTANCE TO THE ADJACENT SUPPORTS IN EACH DIRECTION ie; L1 X L2 (SEE FIG.6)
2. WHERE A POST SUPPORTS A CANTILEVER, CONSIDER FOR THE FULL CANTILEVER LENGTH (SEE FIG.7)
3. TRIBUTARY EDGE LENGTH (L_E) IS USED TO SELECT POST SIZE.
   FOR A STRUCTURE ATTACHED TO A HOUSE, L_E = L1(PERPENDICULAR TO HOUSE)
   FOR A FREE STANDING STRUCTURE, L_E = THE LONGER OF L1 & L2 (SEE FIG.8)

Post Footing Calculations

GOOD GROUND

Ground conditions are considered a minimum of "good ground" as per NZS3604, within minimum soil properties as follow:

Geotechnical ultimate bearing capacity = 300kPa (apply 0.5 safety factor)

Undrained shear strength = 100kPa (apply 0.5 safety factor)

Geotechnical ultimate skin friction capacity = 20kPa (apply 0.5 safety factor)

Questionable ground conditions must be reviewed by Engineer

- If Louvre frame is supported by building on less than 2 sides, **uplift AND bracing** must be considered for Footing Calculations (Tables 1a, 1b & 2).
  If Louvre frame is supported by building on 2 or more sides, **uplift** only needs to be considered (Tables 1a & 1b only).

TABLE 1a MINIMUM CONCRETE VOLUME FOR ROOF TRIBUTARY ROOF AREA ON POST TO RESIST *UPLIFT*

	Concrete Volume Required (m^3)				
Wind Zone:	L	M	H	VH	EH
Tributary Area (m^2)					
1.0	0.03	0.04	0.06	0.08	0.10
2.0	0.06	0.09	0.12	0.16	0.20
3.0	0.09	0.13	0.19	0.25	0.30
4.0	0.12	0.17	0.25	0.33	0.40
5.0	0.15	0.21	0.31	0.41	0.50
6.0	0.18	0.26	0.37	0.49	0.60
7.0	0.22	0.30	0.44	0.57	0.70
8.0	0.25	0.34	0.50	0.65	0.80
9.0	0.28	0.38	0.56	0.74	0.90

DESIGN PROCEDURE

(1) Determine the tributary area on post (determined previously for post design)

(2) From Table 1a, determine the minimum concrete volume to resist uplift based on tributary area.

(3) From Table 1b, determine the Footing Dimensions required for minimum volume calculated in (2). If bracing is required to be considered, please follow steps (4) and (5) below.

(4) From Table 2, determine Footing Dimensions based on the post size selected. For ease of comparing, select same Footing Type as selected in (3)

(5) Please use maximum of dimensions from (3) and (4)

TABLE 1b FOOTING DIMENSIONS REQUIRED FOR PARTICULAR VOLUMES FOR *UPLIFT* RESISTANCE

	ROUND PILES				SQUARE PADS	
Volume (m^2)	300 diameter	400 diameter	450 diameter	600 diameter	Square pad 300mm deep	Square pad 600mm deep
	minimum depth (mm)				minimum dimension (mm)	
0.1	700	650	600	550	600	400
0.2	950	800	750	650	800	600
0.3	1150	950	850	700	1000	700
0.4	1350	1100	1000	800	1150	800
0.6	1800	1400	1250	1000	1400	1000
0.8	2250	1700	1550	1200	1650	1150
1.0	2650	2000	1800	1400	1850	1300

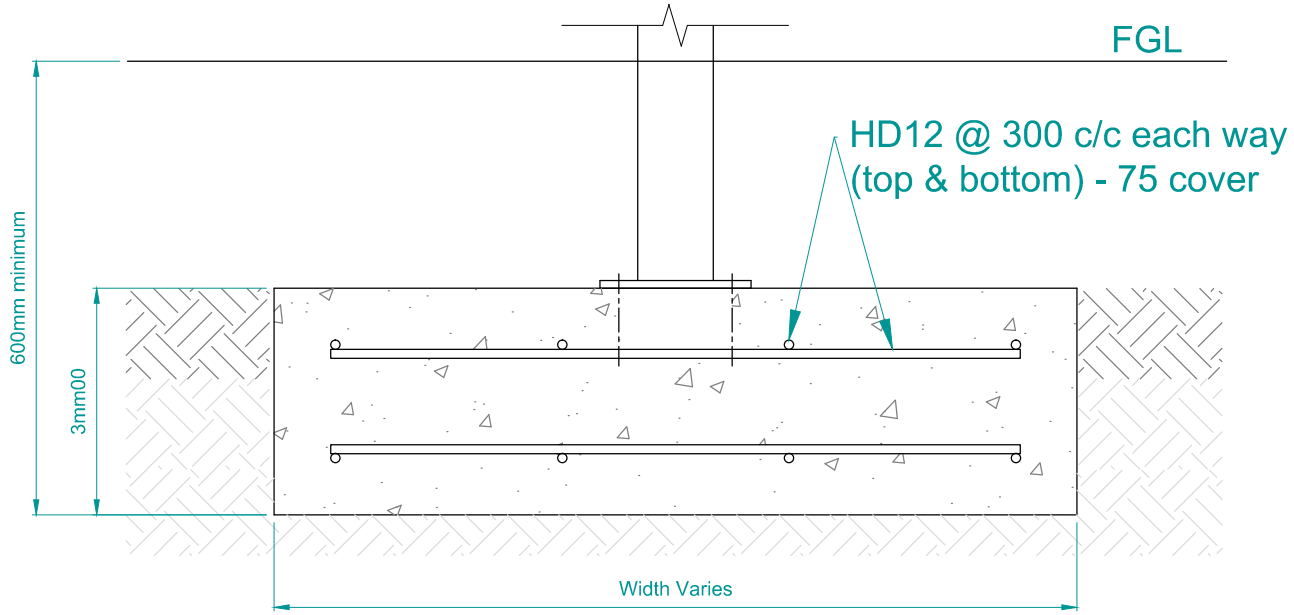

NB: Round piles depths are calculated including skin friction so final concrete volume will differ to that in first column.

TABLE 2 MINIMUM FOOTING SIZES REQUIRED FOR *BRACING* OF EACH POST SIZE

	ROUND PILES				SQUARE PADS	
Post Size	300 diameter	400 diameter	450 diameter	600 diameter	Square pad 300mm deep	Square pad 600mm deep

SNOW LOADINGS. AS REQUIRED BY NZS3604:2011 (SECTION 15)

Where a louvre roof forms part of a lower roof meeting an upper wall and the exposed height of the upper wall is greater than 0.6mm, the roof is defined as an abutting roof (similar to NZS3604:2011 15.3). In this situation, the louvre spans and beam spans determined from the Louvretec Tables shall be multiplied by 0.8.

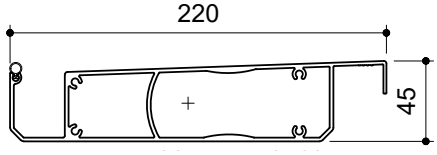

FIGURE 9

STANDARDS NZ 1.5 AND 2.5 kPa SNOW LOADING ZONES NZS 3604:2011

For information about snow zones in New Zealand please see Figure 15.1 from NZS 3604:2011 Timber Framed Buildings. Wind speeds and snow loads must always be considered together. The lesser span taking precedence.

OPENING OR RETRACT ROOF BLADE FOR ALPINE CONDITIONS

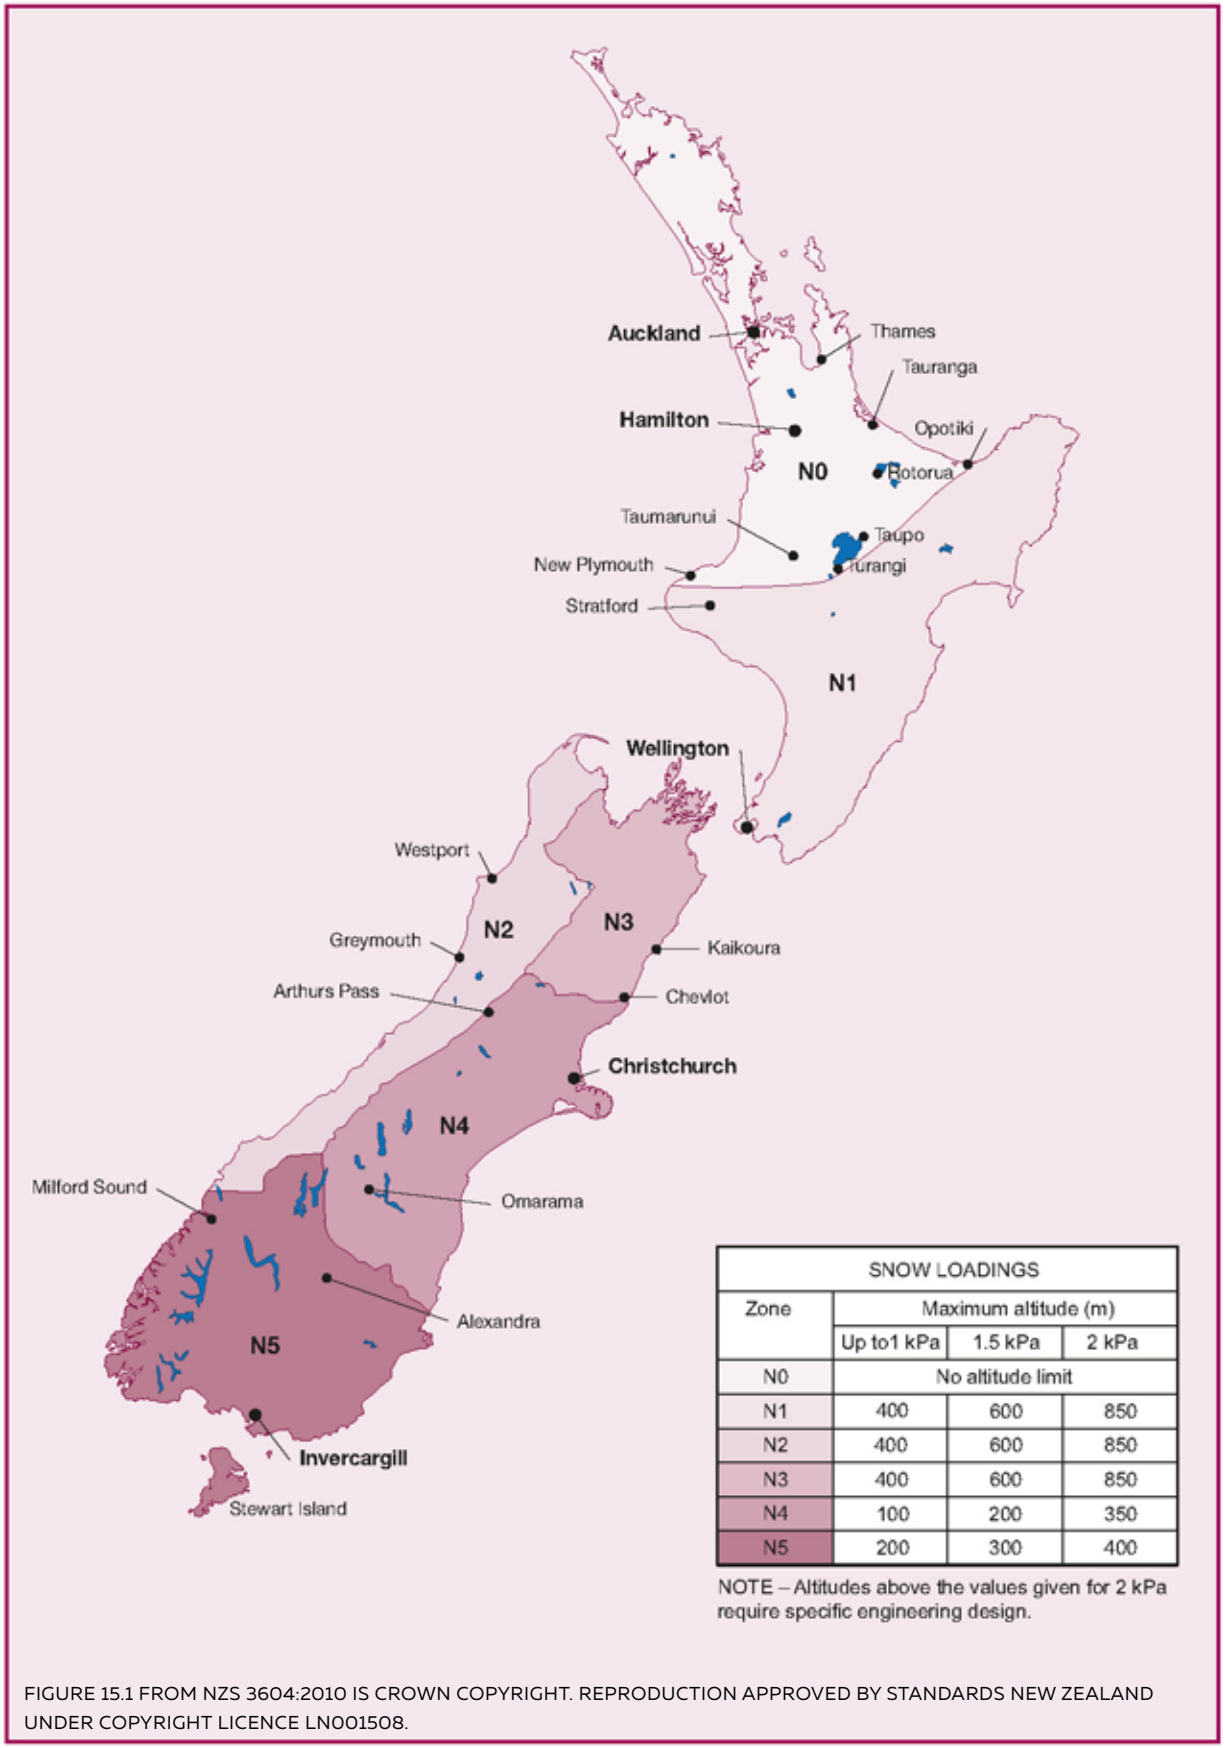

220/45 ALPINE ROOF (RETRACT COMPATIBLE)

SNOW LOAD	LOUVRE ROOF SPANS (mm)
1kPa	5000
1.5kPa	5000
2kPa	5000
3kPa	4200
3.3kPa	4000

SOMFY TELIS 16 CHANNEL RETRACT ROOF REMOTE

WIRING DIAGRAMS

Overview

The Wiring Diagrams shown in this Design Manual cover a wide range of typical Louvretec motorised and electrical installations.

They provide the specific wiring details as required by architects, designers, builders and specifiers when planning Louvretec installations, and of course for electricians when providing connections.

Please contact your nearest Louvretec Dealer to discuss any customised options not currently shown.

Important Safety Instructions for Installation

An incorrect installation could lead to serious injury. Follow all of these instructions as well as those supplied with the motor & controls.

- Install an Omnipolar Isolation Switch upstream with a minimum contact opening space of 3mm
- All cabling must be protected from UV and physical stress (by others)
- Motors must be installed and programmed by competent installers
- For products necessary for the safe functioning of the motorised installation, refer to your nearest Louvretec Dealer
- Use only approved accessories
- Use only approved transmitters with the RTS Motors
- Before carrying out any form of maintenance, isolate the power to the motor and/or controls
- Examine the installation at regular intervals. Do not use the installation until any faults have been rectified
- Should you have any questions regarding the installation of Motors & Controls, contact your nearest Louvretec Dealer

©Louvretec 2025 – All Rights Reserved. Technical specifications subject to change without notice.

CURRENT REMOTE CONTROL OPTIONS FOR OPENING ROOFS & OTHER LOUVRETEC MOTORISED PRODUCTS

Remote options

Remote Control technology is constantly changing and upgrading. Please discuss with your local Louvretec Dealer and view our website for current updates.

Key: Remote Compatibility

opening roofs

louvretec retract (ADI Retract Technology)
Lighting
sun louvres
Heating

Situo 1 & Smoove 1 Wall Switch The Situo 1 Remote by Somfy is a one-channel handheld remote using Radio Technology Somfy (RTS). Smoove is a wireless wall mounted switch providing the same functionality as a remote. Perfect for controlling a single Opening Roof.	
Situo 5 & Smoove 4 Wall Switch The Situo 5 by Somfy is a five-channel handheld remote using Radio Technology Somfy (RTS). Perfect for controlling a group of motorised Louvretec products (excluding the Retract Roof). Smoove 4 is a wireless wall switch providing the same functionality as a remote but with 4 channels. With the addition of the BST11 Bridge, both remotes can control Lighting and Heating.	
Telis 16 The Telis 16 is a 16-channel handheld remote using Radio Technology Somfy (RTS). Made to control a larger group of motorised Louvretec products (excluding the Retract Roof). The addition of a BST 11 Bridge allows this remote to control Lighting & Heating.	
Noon Duo The Noon Duo is a 9-channel handheld remote. The Noon Duo allows control for Louvretec Retract Roofs, Lighting and Heating.	
Daisy App Daisy is an app by Teleco that allows the control of Louvretec Retract Roofs, Lighting and Heating. Download the free app and install a Daisy Box which communicates with your devices via radio signal.	
Solar Powered No power connection required, the solar powered motor can be controlled by a wireless handheld remote or a Smart Home solution. Battery has a 45-day life cycle based on two open/close cycles/ day. Algorithms for power management allow for battery charging without direct sunlight.	 SOLAR POWER OPTION FOR SPIRAL PIVOT OPENING ROOFS

CURRENT REMOTE CONTROL OPTIONS FOR OPENING ROOFS & OTHER LOUVRETEC MOTORISED PRODUCTS

Remote options

Remote Control technology is constantly changing and upgrading. Please discuss with your local Louvretec Dealer and view our website for current updates.

Key: Remote Compatibility

opening roofs
outdoor blinds By Louvretec
louvretec retract ADI Retract Technology
Lighting
sun louvres By Louvretec
Heating

Connexoon

Connexoon is an app by Somfy that allows the control of Louvretec Opening Roofs from your device. The addition of a BST 11 Bridge also allows control of Louvretec Lighting & Heating. Download the app & install the RTS Box (plugs in to your router & wall socket) which communicates with your devices via signal.

BST 11 BRIDGE & CONNEXOON APP BY SOMFY

TaHoma

Tahoma by Somfy is the central hub that connects and controls the smart home ecosystem. Convenient, intuitive & easy to configure across a wide range of smart home systems.

TAHOMA CENTRAL HUB

BMS

A Building Management System (BMS) is a pad from which you can manage a home's shading, heating, cooling, ventilation & lighting controls. Louvretec Opening Roofs can be integrated into a home or building's BMS. Retract Roof, Heating & Lighting can be integrated via an RS232 Transmitter.

BUILDING MANAGEMENT SYSTEM (BMS)

Hard Wired Switch

A Somfy Hard Wired Switch provides control of a motorised Opening Roof via a 230v wall switch wired directly to the motor.

SOMFY SWITCH
FOR AN OPENING ROOF

Wall Mounted Remote

A Teleco Wall Mounted Remote provides control of a single Retract Roof, LED Lights, or a Dimmable Heater.

TELECO WALL MOUNTED REMOTE
FOR A RETRACT ROOF

RAIN SENSOR OPTION

Teleco Wired Rain102H

The Rain102H by Teleco Rain Sensor can be programmed to automatically close the Louvres & includes integrated heating function for preventing false activation in case of ice and snow.

REMOTE CONTROL INSTRUCTION CARD FOR SITUO 5 REMOTE

READ ME FIRST:

- *DETERMINE WHICH STYLE OF REMOTE CONTROL YOU HAVE (see over)*

This Situo 5 Remote Control has the ability to control five Louvretec Products individually or grouped - including;
Motorised Opening Roofs | Sun Louvre Panels | Outdoor Blinds | Heating & Lighting.

Use this instruction card to guide you through each button's function depending on product selected as indicated on the Channel Indicator. It's important to first select the product you wish to operate using the Channel Change Button at the bottom of the remote.
