

SLIDETEC GLASS DOORS & WINDOWS & FIXED PANELS

A freshly designed range of engineered sliding & fixed glazed options.

Slidetec Frameless Glass Sliding Doors & Windows, along with Slidetec Fixed Glazing Panels offer a freshly designed range of engineered sliding and fixed glazed options.

Specifically designed for the closing in of outdoor spaces. Ideal as sliding wall infills for your Louvretec room, or simply for closing off any outdoor deck space.

1. Slidetec ST10 & ST12 Frameless Glass Sliding Doors

Available in 10mm & 12mm toughened glass Slidetec has been designed to meet the rigors and demands of Australian and New Zealand climatic conditions.

The sliding systems have been considerably upgraded to meet these demands, with new extrusions, and heavy duty adjustable stainless-steel ball bearing mounted sliding carriages.

Simple, clean functional lines offering clear view and wonderful protection from the elements.

2. Slidetec Glazed Fixed Panels

Available in 6mm or 8mm toughened glass, Slidetec fixed panels are designed to complement and enhance the Slidetec sliding door range.

Ideal as overhead fixed panels if overall height exceeds sliding door design specifications.

Can also be used as conventional glazed fixed panels if sliding access is not required.

Enhance your outdoor space

Enhance and enjoy your outdoor spaces protected from the weather without compromising your view.

Close up snug for wet days, open wide for cooling breezes. Enjoy the best of whatever the weather has on offer.

Close in the sides of an outdoor area
SlideteC Frameless Glass Sliding systems have been specifically designed for the closing in of outdoor areas.

The frameless design ensures maximum view with clean, uninterrupted lines. Designs such as these are only suitable for closing in outdoor areas and can not be used as house joinery.
